Top Most C_THR92_2505 Reliable Questions | High-quality Reliable C_THR92_2505 Test Braindumps: SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting

A SAP C_THR92_2505 practice questions is a helpful, proven strategy to crack the SAP C_THR92_2505 exam successfully. It helps candidates to know their weaknesses and overall performance. TestInsides software has hundreds of SAP exam dumps that are useful to practice in real time. The SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting (C_THR92_2505) practice questions have a close resemblance with the actual C_THR92_2505 exam.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q68-Q73):

NEW QUESTION # 68

You are using a Multi-Dataset table report without Business Intelligence Reporting Tools (BIRT). What are characteristics of the report output? Note: There are 2 correct answers to this question.

- A. Report results are shown on separate tabs in the output.
- B. Data is NOT joined in the query.
- C. Data is joined in the query.
- D. Report results are shown on a single tab in the output.

Answer: A,B

Explanation:

When using a Multi-Dataset Table Report without Business Intelligence Reporting Tools (BIRT), the following characteristics apply:

- * Report results are shown on separate tabs in the output (A):
- * Each dataset's output is displayed on its respective tab. This is because the data is not integrated or merged in the query.
- * Data is NOT joined in the query (D):
- * Multi-dataset reports without BIRT do not perform data joins. Each dataset is treated independently.

NEW QUESTION # 69

A user wants to build a pivot chart based on a list report that has a run-time filter. What must the user do?

- A. Create a filter group within the run-time filter before building the report.
- B. Create the run-time filter before building the report.
- C. Create the pivot chart after adding the run-time filter.
- D. Create the pivot chart before adding the run-time filter.

Answer: C

Explanation:

- * Pivot Chart Creation Process
- * To build a pivot chart based on a list report with a run-time filter, the filter must first be added to ensure the data being visualized reflects the selected filter criteria.
- * Explanation of Correct Answer
- * A pivot chart dynamically organizes and summarizes data. Adding the run-time filter beforehand ensures the chart is based on the filtered dataset.
- * Creating the chart after applying the filter allows for a more accurate representation of the desired data.
- * Why Other Options are Incorrect
- * A: Filter groups are unrelated to this scenario.

- * B: Creating the chart before the filter would lead to inaccurate results.
- * C: While adding the filter first is correct, the chart must be created after this step.

NEW QUESTION # 70

You want to create a report that returns only employees who were born in 1961. You also want to enable the person who runs the report to specify a different birth year. How can you achieve this? Note: There are 2 correct answers to this question. Select Date Options from the Toolbar. Set Date Type to Show All. Select Manage Run Time Filters from the Toolbar. Expand Personal Information table. Select Date of Birth column. Select OK.

- A. Select Date Options from the Toolbar. Set Date Type to As of Date. Set As of Date to 1/1/1961. Set Use Custom Columns. Select Date of Birth from Start Date Column. Select Date of Birth from End Date Column. Set Selectable At Runtime.
- B. Select Date Options from the Toolbar. Set Date Type to Date Range (On Start Date). Set From date to 1/1/1961 and To date to 12/31/1961. Set Use Custom Columns. Select Date of Birth from Start Date Column. Set Selectable At Runtime.
- C. Select OK and then select Add. Expand Personal Information table and select Date of Birth. Select less than or equal to from the operator list. Set Custom filter date to 12/31/1961. Select OK.
- D. Select Manage Query Filters. Expand Personal Information table and select Date of Birth. Select Greater than or equal to from the operator list. Set Custom filter date to 1/1/1961.

Answer: A,D

Explanation:

To create a report that returns only employees born in 1961 and enable runtime customization:

* Option A:

* Use Manage Query Filters to specify the condition:

* Expand the Personal Information table and select the Date of Birth column.

* Set the filter operator to Greater than or equal to and input a custom date of 1/1/1961.

* Option D:

* Use Date Options from the Toolbar and select the following:

* Set Date Type to As of Date.

* Set the As of Date to 1/1/1961.

* Set Use Custom Columns, selecting Date of Birth for both the Start Date and End Date columns.

* Ensure the filter is marked Selectable at Runtime.

NEW QUESTION # 71

If you want to create a single filter that utilizes criteria from multiple tables in the same query, which filter do you need to use in Query Designer?

- A. Query Scope filter
- B. Query Advanced filter
- C. Table Simple filter
- D. Table Advanced filter

Answer: B

Explanation:

* Filter Types in Query Designer

* A Query Advanced Filter is used to define filter conditions across multiple tables in a single query. This is necessary when the criteria involve fields from different data sources.

* Why Other Options are Incorrect

* A (Query Scope filter): Used to limit data based on scope, but it does not combine criteria across multiple tables.

* B (Table Simple filter): Applies filters only to a single table.

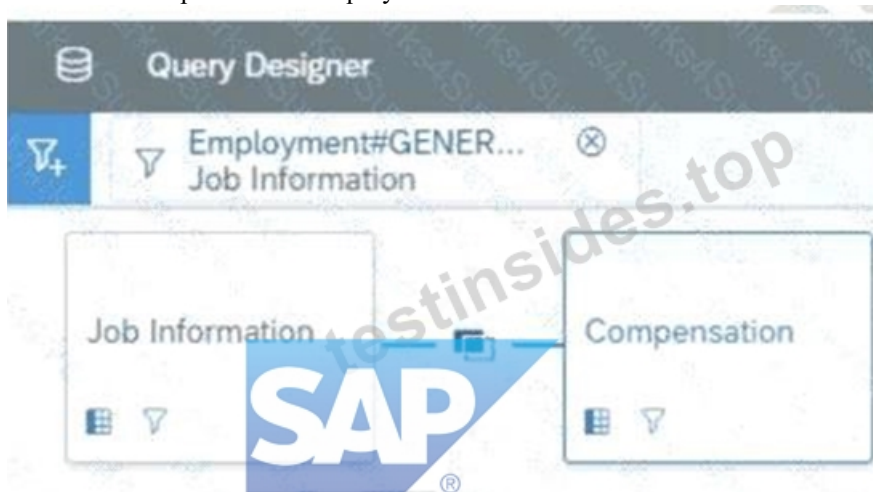

* D (Table Advanced filter): Applies advanced criteria but only within a single table.

* SAP SuccessFactors Query Designer Documentation

NEW QUESTION # 72

You are creating a query for a historical compensation story report in Query Designer. You have added the Job Information table to the query, configured a scope filter, and previewed the result to verify you are returning the appropriate employees. You add the related table Compensation to the query.

When you preview the query, you only get the current compensation information for the employees. Why do you only receive the current records? Note: There are 2 correct answers to this question.

- A. The compensation table time filter is set to: As of Date > Dynamic Date: Today.
- B. The compensation table time filter is set to: Same Filter as First Table.
- C. The Job information table time filter is set to: As of Date > Dynamic Date: Today.
- D. The Query Advanced Filter is set to: Job Information effective start date equal to Dynamic Date Today.

Answer: A,D

Explanation:

* Understanding Time Filters in Query Designer

* When creating a query, time filters determine the scope of the data retrieved. Filters such as As of Date or Dynamic Date often default to "Today," which retrieves only current records.

* Reason for Current Records Only

* Option B: The Compensation table filter is explicitly set to As of Date > Dynamic Date: Today.

This restricts the results to only the current compensation records.

* Option D: The Job Information filter is configured to match records with the effective start date equal to today, which also limits the results to current data.

* Why Other Options are Incorrect

* A: This filter applies to Job Information, not Compensation, and does not explain why only current compensation records are retrieved.

* C: "Same Filter as First Table" would align filters between tables, but does not necessarily restrict to current data.
