Answer: D

NEW QUESTION # 147

Session unique identifiers are passed to the web api using which http header option?

- A. Application
- B. Proxy-Authorization
- C. X-chkp-sid
- D. Accept-Charset

Answer: B

NEW QUESTION # 148

Which of the following situations would not require a new license to be generated and installed?

- A. The Security Gateway is upgraded.
- B. The license is upgraded.
- C. The existing license expires.

- D. The IP address of the Security Management or Security Gateway has changed.

Answer: A

Explanation:

Explanation

Upgrading the Security Gateway does not require a new license to be generated and installed. The license is tied to the IP address or hostname of the Security Gateway, not the software version. However, if the IP address or hostname changes, the existing license expires, or the license is upgraded, a new license must be generated and installed

- C. SmartUpdate, SmartBackup, or SmartConsole
- D. WebUI, CLI, or SmartUpdate

Answer: A

Explanation:

Backup and Restore These options let you:

To back up a configuration:

The Backup window opens.

NEW QUESTION # 150

Name the utility that is used to block activities that appear to be suspicious.

- A. Penalty Box
- B. Drop Rule in the rulebase
- C. Stealth rule
- D. Suspicious Activity Monitoring (SAM)

Answer: D

Explanation:

Suspicious Activity Monitoring (SAM) is the utility that is used to block activities that appear to be suspicious. SAM allows administrators to block connections from specific IP addresses or network objects for a specified period of time. Penalty Box is a feature of SAM that automatically blocks connections from sources that generate too many log entries. Drop Rule in the rulebase is a firewall action that discards packets that match certain criteria. Stealth rule is a firewall rule that prevents direct access to the Security Gateway from external sources.

NEW QUESTION # 151

.....
