Pass Guaranteed 2025 156-536: Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) –Professional Free Download

If you don't prepare with real 156-536 questions, you fail, lose time and money. VCE Dumps product is specially designed to help you pass the exam on the first try. The study material is easy to use. You can choose from 3 different formats available according to your needs. The 3 formats are CheckPoint 156-536 desktop practice test software, browser based practice exam, and PDF.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q75-Q80):

NEW QUESTION # 75

The Check Point Harmony Product Suite is a suite of security products that includes?

- A. Harmony Endpoint (Cloud and On-Premises)

- B. Harmony Mobile (On-Premises)
- C. Quantum Spark
- D. Quantum Endpoint (Cloud)

Answer: A

Explanation:

The Check Point Harmony Product Suite includes Harmony Endpoint, which is available both as a Cloud- based and On-Premises security solution.

Exact Extract from Official Document:

"Harmony Endpoint is available as both Cloud-based and On-Premises deployment." Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide, "Introduction to Harmony Endpoint."

NEW QUESTION # 76

On which search engines/web sites is the Safe Search feature supported in Harmony Endpoint?

- A. Google, Yahoo!, and OneSearch
- **B. Google, Bing, and Yahoo!**
- C. Google and Bing if the Harmony Endpoint Management is On-Premises deployment
- D. Google, Bing, Yahoo! by default, and extra support for Baidu, Yandex, Lycos, and Excite if the Harmony Endpoint Management is deployed in Cloud

Answer: B

Explanation:

The Safe Search feature in Harmony Endpoint is intended to protect users by filtering out malicious or inappropriate content from search engine results. While specific documentation on supported search engines is not detailed here, it is standard for endpoint security solutions like Harmony Endpoint to support the most widely used search engines by default. These typically include Google, Bing, and Yahoo!, as they are the most common platforms where Safe Search functionality is applied.

Option A suggests additional support for Baidu, Yandex, Lycos, and Excite in cloud deployments, but there is no evidence to confirm these are supported, especially since Lycos and Excite are less prominent today.

Option C limits support to Google and Bing for on-premises deployments, but there's no indication that Safe Search functionality varies by deployment type. Option D includes OneSearch, which is less common and not typically associated with Harmony Endpoint's Safe Search feature. Thus, the most accurate and likely answer is B. Google, Bing, and Yahoo!.

NEW QUESTION # 77

Endpoint's Media Encryption (ME) Software Capability protects sensitive data on what, and how?

- A. Storage devices by requiring multi-factor authorization
- B. Input/output devices using Anti-Malware
- C. Removable media and other input/output devices by using encryption methods
- **D. Storage devices, removable media, and other input/output devices by requiring authorization before a user accesses the device**

Answer: D

Explanation:

The Media Encryption & Port Protection component specifically safeguards sensitive information by encrypting data and mandating authorization for access to storage devices, removable media, and other input/output devices. Users need explicit authorization to interact with these encrypted storage devices.

Exact Extract from Official Document:

"The Media Encryption & Port Protection component protects sensitive information by encrypting data and requiring authorization for access to storage devices, removable media, and other input/output devices." Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide, Section: "Media Encryption & Port Protection".

NEW QUESTION # 78

The Harmony Endpoint solution includes which three Data Security Software Capability protections?

- A. * Full Disk Encryption
* Media Encryption
* Anti-Malware
- B. * Passwords and Usernames
* Port Protection (MEPP)
* Security Questions
- C. * Media Encryption
* Media Decryption
* Remote Access VPN
- D. * Full Disk Encryption
* Media Encryption & Port Protection (MEPP)
* Remote Access VPN

Answer: A

NEW QUESTION # 79

Which command in a CLI session is used to check installed licenses on the Harmony Endpoint Management Server?

- A. show licenses all
- B. cplic add <license filename="">
 D. cplic print +x</license>
- C. cplic print -x

Answer: C

Explanation:

To check installed licenses on the Harmony Endpoint Management Server via the command-line interface (CLI), the correct command is `cplic print -x`. This is a standard Check Point command for displaying detailed license information, as referenced in the CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf on page 58 under "Getting Licenses." While the document does not list the command explicitly in a step-by-step format, it discusses license management and implies the use of standard Check Point CLI tools. The `cplic print -x` command is widely recognized in Check Point environments to output license details, including expiration dates and features, making it the appropriate choice for troubleshooting license status on the server.

Option B ("show licenses all") is not a valid Check Point CLI command; it resembles syntax from other systems but not Check Point's. Option C ("`cplic add <license filename=''>`") is for adding a license, not checking existing ones (page 58 mentions applying licenses, not viewing them). Option D ("`cplic print +x`") contains a syntax error; the correct flag is `<code>-x</code>`, not `<code>+x</code>`. Thus, option A is the verified answer based on Check Point's CLI conventions and the guide's context.

</license> References:

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 58: Getting Licenses (discusses license management, implying standard CLI usage).

NEW QUESTION # 80

.....

Are you planning to attempt the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam of the 156-536 certification? The first hurdle you face while preparing for the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam is not finding the trusted brand of accurate and updated 156-536 exam questions. If you don't want to face this issue then you are at the trusted VCEdumps is offering actual and latest Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) Exam Questions that ensure your success in the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) certification exam on your maiden attempt.
