156-536 Test Labs - Latest 156-536 Exam Answers

If you are a child's mother, with 156-536 test answers, you will have more time to stay with your if you are a student, with 156-536 exam torrent, you will have more time to travel to comprehend the wonders of the world. In the other worlds, with 156-536 guide tests, learning will no longer be a burden in your life. You can save much time and money to do other things what meaningful. You will no longer feel tired because of your studies, if you decide to choose and practice our 156-536 Test Answers. Your life will be even more exciting.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.
Topic 2	Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.

Topic 3	• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.
Topic 4	• Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.
Topic 5	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.
Topic 6	• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q48-Q53):

NEW QUESTION # 48

In a Standalone installation, the EMS is installed on the same computer or a different one than the NMS?

- A. Half on one and half on another computer
- B. Different
- C. Same
- D. Both

Answer: C

Explanation:

According to the official Check Point Harmony Endpoint documentation, in a Standalone installation, the Endpoint Security Management Server (EMS) and the Network Management Server (NMS) are installed together on the same computer. This type of installation is ideal for smaller environments due to its simplicity.

Exact Extract from Official Document:

"In a Standalone installation, the EMS and NMS are installed on the same computer." Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide.

NEW QUESTION # 49

What does the Endpoint Security Homepage offer useful resources for?

- A. Unix Client OS Support
- B. Quantum Management
- C. Complicated Practices
- D. Best Practices

Answer: D

NEW QUESTION # 50

What capabilities does the Harmony Endpoint NGAV include?

- A. Anti-IPS, Anti-Firewall & Anti-Guard
- B. Threat Extraction, Threat-Emulation & Zero-Phishing
- C. Zero-Phishing, Anti-Bot & Anti-Virus
- D. Anti-Ransomware, Anti-Exploit & Behavioral Guard

Answer: D

Explanation:

Harmony Endpoint's Next-Generation Anti-Virus (NGAV) is designed to combat advanced threats using a combination of behavioral analysis, exploit prevention, and ransomware protection. The documentation specifies that NGAV includes Anti-Ransomware, Anti-Exploit, and Behavioral Guard as core capabilities.

The CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf outlines these on page 20, under "Endpoint Security Client":

"Harmony Endpoint Anti-Ransomware, Behavioral Guard and Forensics: Prevents ransomware attacks.

Monitors files and the registry for suspicious processes and network activity. Analyzes incidents reported by other components."

Additionally, on page 358, under "Harmony Endpoint Threat Extraction, Emulation and Anti-Exploit":

"Anti-Exploit: Detects and prevents exploitation of vulnerabilities in software." While the term "NGAV" is not explicitly used, these components—Anti-Ransomware, Behavioral Guard, and Anti-Exploit—represent the next-generation approach to antivirus protection, focusing on behavior-based detection and prevention of advanced threats like exploits and ransomware. This matches Option A.

The other options are incorrect:

* Option B ("Anti-IPS, Anti-Firewall & Anti-Guard"): These are not recognized capabilities in the documentation; they appear to be fabricated terms.

* Option C ("Zero-Phishing, Anti-Bot & Anti-Virus"): Zero-Phishing (page 366) and Anti-Bot (page 353) are separate features, and Anti-Virus is traditional, not NGAV-specific.

* Option D ("Threat Extraction, Threat-Emulation & Zero-Phishing"): These relate to document sanitization and phishing protection (pages 358-366), not NGAV's core focus.

Thus, Option A accurately reflects Harmony Endpoint NGAV capabilities.

NEW QUESTION # 51

You must make a decision of which FDE algorithm to be used by one of your clients who specializes in multimedia video editing. What algorithm will you choose?

- A. Any kind of data is very important and the Full Disk Encryption technic must be used with the strongest secret key possible. Your client has to use strong encryption like XTS-AES 256 bit.
- B. Video processing is a high bandwidth application which utilizes a lot of HDD access time. You have to use a FDE algorithm with small secret key like XTS-AES 128 bit.
- C. The implementation of a Secure VPN with very strong encryption will make your data invisible in cases of live internet transmission.
- D. In Multimedia applications you do not need to implement any kind of Full disk encryption. You can use software like 7Zip in order to encrypt your data.

Answer: A

NEW QUESTION # 52

default, an FDE Action does what?

- A. Encrypts all visible disk volumes
- B. Re-defines all visible disk volumes
- C. Decrypts all visible disk volumes
- D. Rebuilds the hard drive

Answer: A

NEW QUESTION # 53

.....

We will refund your money if you fail to pass the exam if you buy 156-536 exam dumps from us, and no other questions will be asked. We are famous for high pass rate, with the pass rate is 98.75%, we can ensure you that you pass the exam and get the corresponding certificate successfully. In addition, 156-536 Exam Dumps of us will offer you free update for 365 days, and our system will send the latest version of 156-536 exam braindumps to your email automatically. We also have online service stuff, and if

you have any questions just contact us.
