## 2025 100% Free 156-536 –Pass-Sure 100% Free Reliable Test Price | Reliable 156-536 Exam Blueprint

TopExamCollection Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) practice test software is the answer if you want to score higher in the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam and achieve your academic goals. Don't let the 156-536 certification exam stress you out! Prepare with our 156-536 exam dumps and boost your confidence in the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam. We guarantee your road toward success by helping you prepare for the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) certification exam. Use the best TopExamCollection CheckPoint 156-536 practice questions to pass your Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam with flying colors!

### CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.</li> </ul>

## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q82-Q87):

### NEW QUESTION # 82

Endpoint Security Clients are applications installed on company-owned desktop and laptop computers which include the following:

- A. Endpoint Security software Capabilities and a GUI client to manage policies for all capabilities
- B. GUI client that connects to the Endpoint Security Management Server to manage the policy and other configuration for Endpoints
- C. GUI client that connects to the local Endpoint Capability Software to manage the policy and all other configuration for that Endpoint only
- D. Endpoint security software Capabilities and a device agent which operates as a container for the Capabilities and communicates with the Endpoint Management Server

**Answer: D**

### NEW QUESTION # 83

Does the Endpoint Client GUI provide automatic or manual prompting to protect removable storage media usage?

- A. Automatic Only
- B. Either automatic or manual
- C. Manual Only
- D. Neither automatic nor manual

**Answer: B**

Explanation:

The Endpoint Client GUI in Check Point Harmony Endpoint provides either automatic or manual prompting to protect removable storage media usage, depending on how the administrator configures the system. This functionality is part of the Media Encryption & Port Protection component, which allows flexible control over removable media such as USB drives. According to the CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 282, under the section "Working with Actions in a Media Encryption & Port Protection Rule," the documentation states:

"You can configure rules to automatically encrypt media or prompt users to encrypt or access media in a protected manner." This extract confirms that administrators can set policies to either automatically apply encryption (automatic prompting) or require user interaction (manual prompting) when removable media is detected. For example, an automatic rule might encrypt a USB drive without user intervention, while a manual rule might display a prompt in the Endpoint Client GUI asking the user to confirm encryption or access permissions. This dual capability makes Option B ("Either automatic or manual") the correct answer.

\* Option A ("Manual Only") is incorrect because the system supports automatic prompting, not just manual.

\* Option C ("Automatic Only") is incorrect because manual prompting is also an available option.

\* Option D ("Neither automatic nor manual") is false, as the documentation clearly describes both methods.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 282: "Working with Actions in a Media Encryption & Port Protection Rule" (describes the ability to configure automatic encryption or user prompts for removable media).

### NEW QUESTION # 84

Before installing the Endpoint Security Management Server, it is necessary to consider this

- A. An Endpoint Security Gateway must be installed

- B. A Network Security Management Server must NOT be installed on the same machine
- C. A Network Security Management Server must be installed
- D. MS SQL Server must be available with full admin access

**Answer: D**

#### NEW QUESTION # 85

What are the benefits of the Check Point Consolidated Cyber Security Architecture?

- A. Consolidated network functions
- B. Single policy
- C. Consolidated security functions
- D. Decentralized management

**Answer: C**

Explanation:

The Check Point Consolidated Cyber Security Architecture is designed to integrate multiple security functions into a unified platform. This architecture provides "consolidated security functions," which is its primary benefit. This means it combines endpoint protection, data security, and threat prevention into a single, manageable system, improving efficiency and simplifying security administration for organizations. While

"Consolidated network functions" (A) might sound similar, it's too vague and not the focus of the architecture. "Single policy" (B) is not highlighted as a standalone benefit, and "Decentralized management" (C) contradicts the centralized approach of this architecture. Thus, "Consolidated security functions" (D) is the correct answer, as it aligns directly with the documented advantages.

#### NEW QUESTION # 86

In a Standalone installation, the EMS is installed on the same computer or a different one than the NMS?

- A. Both
- B. Same
- C. Different
- D. Half on one and half on another computer

**Answer: B**

#### NEW QUESTION # 87

.....

We offer you free demo for you to have a try before buying the 156-536 study guide, so that you can have a better understanding of what you are going to buy. 156-536 exam dumps of us also offer you free update for one year after purchasing, and our system will send the latest version to you automatically. Besides we have the online and offline chat service stuff, and if you have any questions about the 156-536 Study Guide, you can consult them, and they will offer you the suggestions.
