100% Pass Quiz CheckPoint - 156-582 - Check Point Certified Troubleshooting Administrator - R81.20 –High Pass-Rate Vce Free

Choose a good 156-582 exam quiz and stick with it, you will be successful! Our 156-582 study questions will provide you with professional guidance and quality resources, but you must also be aware of the importance of adherence. As you know, life is like the sea. Only firm people will reach the other side. After you have chosen 156-582 Preparation materials, we will stay with you until you reach your goal.

CheckPoint 156-582 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Troubleshooting: This section of the exam measures the skills of Check Point security administrators and covers the foundational concepts of troubleshooting within network security environments. It introduces the principles and methodologies used to identify and resolve issues effectively. A key skill assessed is the ability to apply systematic approaches to diagnose problems.
Topic 2	• Troubleshooting SmartConsole: This section of the exam measures the skills of Check Point security professionals and covers troubleshooting techniques specific to SmartConsole, the management interface for Check Point products.

Topic 3	• Basic Site-to-Site VPN Troubleshooting: This section of the exam measures the skills of Check Point security administrators and covers foundational troubleshooting techniques for site-to-site VPN connections. It includes diagnosing connectivity issues and verifying configuration settings.
Topic 4	• Troubleshooting NAT: This section of the exam measures the skills of Check Point security administrators and covers troubleshooting Network Address Translation (NAT) configurations. It emphasizes understanding NAT rules, translations, and common pitfalls.
Topic 5	• Fundamentals of Traffic Monitoring: This section of the exam measures the skills of Check Point security administrators and covers essential techniques for monitoring network traffic. It includes understanding traffic flows, analyzing logs, and identifying anomalies.
Topic 6	• Log Collection: This section of the exam measures the skills of Check Point security administrators and covers methods for collecting and managing logs from various security devices.
Topic 7	• Licenses and Contract Troubleshooting: This section of the exam measures the skills of Check Point security administrators and covers troubleshooting related to licensing issues and contract management for Check Point products.

CheckPoint Check Point Certified Troubleshooting Administrator - R81.20 Sample Questions (Q20-Q25):

NEW QUESTION # 20

Select the correct statement about service contracts.

- A. Valid service contracts are only stored and required on the Primary Security Management Server and never downloaded on any other system
- **B. Valid service contracts must be stored on the Security Management Server before they can be downloaded to a Security Gateway**
- C. Valid service contracts must be stored only on the Security Gateways that have Threat Prevention blades enabled
- D. Service contracts are provided on paper only

Answer: B

Explanation:

Service contracts in Check Point environments must be stored on the Security Management Server before they can be downloaded to any Security Gateway. This centralized approach ensures that all gateways receive consistent and authorized contract information, which is essential for maintaining compliance and enabling the required security features across the network.

NEW QUESTION # 21

What Check Point process controls logging?

- A. CPM
- B. CPWD
- **C. FWD**
- D. CPD

Answer: C

Explanation:

The FWD (Firewall Daemon) process is responsible for controlling logging in Check Point environments. It manages the creation, storage, and transmission of logs from Security Gateways to the Security Management Server, ensuring that all relevant security events are recorded and available for analysis.

NEW QUESTION # 22

Which of the following would be the most appropriate command in debugging a HideNAT issue?

- A. fw ctl zdebug + fwalloc hidenat
- B. fw ctl zdebug + dynamic natips natports
- C. fw ctl zdebug + fwn allnat
- **D. fw ctl zdebug + xlate xtrc nat**

Answer: D

Explanation:

For debugging Hide NAT issues, the `fw ctl zdebug + xlate xtrc nat` command is the most appropriate. This command provides detailed tracing of NAT translations, including those related to Hide NAT configurations.

It allows administrators to monitor how internal IP addresses are being translated to external addresses, facilitating effective troubleshooting.

NEW QUESTION # 23

How would you check the connection status of a gateway to the Log server?

- A. Run `netstat -anp | grep :257` in CLISH on Log server
- B. Run `netstat -anp | grep :18187` in CLISH on Log server
- **C. Run `netstat -anp | grep :257` in expert mode on Log server**
- D. Run `netstat -anp | grep :18187` in expert mode on Log server

Answer: C

Explanation:

To check the connection status between a gateway and the Log server, use the `netstat -anp | grep :257` command in expert mode on the Log server. This command filters the network connections to display only those related to port 257, which is used for log collection. Running it in expert mode provides the necessary privileges to view detailed network information.

NEW QUESTION # 24

You need to verify the license on Security Gateway. What command can you use from the command line?

- A. `sh lic stat`
- B. `cplic list`
- **C. `cplic print`**
- D. `cplic -l`

Answer: C

Explanation:

To verify the license on a Security Gateway, the `cplic print` command is used. This command displays the current licensing information, including the status and details of installed licenses, ensuring that the gateway has the necessary permissions and features enabled for its operation.

NEW QUESTION # 25

.....

With the cumulative effort over the past years, our 156-582 study guide has made great progress with passing rate up to 98 to 100 percent among the market. A lot of professional experts concentrate to making our 156-582 preparation materials by compiling the content so they have gained reputation in the market for their proficiency and dedication. About some esoteric points, they illustrate with examples for you on the 156-582 Exam Braindumps.
