順便提一下，可以從雲存儲中下載KaoGuTi Plat-Admn-202考試題庫的完整版：<https://drive.google.com/open?id=1EEiqYNFildFsdnMERTcLF7qdrBhZief>

你想在IT行業中大顯身手嗎，你想得到更專業的認可嗎？快來報名參加Plat-Admn-202資格認證考試進一步提高自己的技能吧。KaoGuTi可以幫助你實現這一願望。這裏有專業的知識，強大的考古題，優質的服務，可以讓你高速高效的掌握知識技能，在考試中輕鬆過關，讓自己更加接近成功之路。

## Salesforce Plat-Admn-202 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.</li></ul>

主題 2	<ul style="list-style-type: none"> <li>• <b>User Interface:</b> This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.</li> </ul>
主題 3	<ul style="list-style-type: none"> <li>• <b>Salesforce Fundamentals:</b> This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.</li> </ul>
主題 4	<ul style="list-style-type: none"> <li>• <b>App Deployment:</b> This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.</li> </ul>
主題 5	<ul style="list-style-type: none"> <li>• <b>Business Logic and Process Automation:</b> This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.</li> </ul>

## Plat-Admn-202題庫更新資訊 & Plat-Admn-202題庫更新

如果你仍然在努力獲得Salesforce的Plat-Admn-202考試認證，我們KaoGuTi為你實現你的夢想，KaoGuTi Salesforce的Plat-Admn-202考試培訓資料是品質最好的培訓資料，為你提供了一個好的學習平臺，問題是你如何準備這個考試，以確保你百分百成功，答案是非常簡單的，如果你有適當的時間學習，那就選擇我們KaoGuTi Salesforce的Plat-Admn-202考試培訓資料，有了它，你將快樂輕鬆的準備考試。

## 最新的 Salesforce Developer Plat-Admn-202 免費考試真題 (Q131-Q136):

### 問題 #131

Cloud Kicks (CK) captures all shipping information in a custom object called Shipments\_\_c. CK's app builder is tasked with creating an approval process to ensure department members can approve all overnight shipments. Where should the app builder route the approval request?

- A. Public group
- B. Hierarchy field
- C. Queue
- D. Role

答案：A

### 解題說明：

Public group is the best option to route the approval request for overnight shipments. Public groups can include users, roles, or other groups. Queues are used to assign ownership of records to a group of users, not for approval processes. Hierarchy field and role are not flexible enough to include only the department members.

### 問題 #132

When an opportunity has a closed date that is pushed more than 30 days, manager approval is required. An approval process is in place but reps frequently forget to submit for approval to run the process.

How can an app builder ensure that these opportunities are submitted into the approval process?

- A. Change the entry criteria on the approval process to criteria are met and lock the record on initial submission.
- B. Use a validation rule and an email alert to the manager requesting approval.
- C. Give the manager the "API Enabled" permission to permit approval responses by email.
- **D. Submit the record for approval from an automated process.**

答案： D

解題說明：

Sales reps are forgetting to manually submit the record for approval. The correct declarative solution is to automate the submission when conditions are met - in this case, when the Opportunity Close Date is pushed more than 30 days.

This can be achieved using Flow Builder or Process Builder (deprecated) to automatically submit the record into the existing approval process.

Why C (Submit the record for approval from an automated process) is correct:Exact Extract:"You can automatically submit a record for approval from a process or flow when specified criteria are met." - Salesforce Help | Automate Record Approval with FlowThis ensures the approval process runs automatically whenever the rule is triggered, eliminating user dependency.

Why C (Submit the record for approval from an automated process) is correct:Exact Extract:"You can automatically submit a record for approval from a process or flow when specified criteria are met." - Salesforce Help | Automate Record Approval with FlowThis ensures the approval process runs automatically whenever the rule is triggered, eliminating user dependency.

Why not A:The "API Enabled" permission allows programmatic access; it has no impact on triggering approvals.

Why not B:A validation rule and email alert only notify; they do not submit the record into the approval process.

Why not D:Changing entry criteria doesn't auto-submit; it only defines which records can enter if submitted.

### 問題 #133

AW Computing has a custom object for service plans.

A service plan needs to be associated to one and only one contact. The support manager noticed if the wrong contact is associated, the reps are unable to change the contact. The app builder already confirmed the user has correct access to the field and there are no validations associated with the service plans.

What could be causing the issue?

- A. The Read Only radio button, Allows users with at least Read access to the Master record to create, edit, or delete related Detail records, is selected.
- B. The Allow reparenting checkbox, Child records can be reparented to other parent records after they are created, is checked.
- C. The Read/Write radio button, Allows users with at least Read/Write access to the Master record to create, edit, or delete related Detail records, is selected.
- **D. The Allow reparenting checkbox, Child records can be reparented to other parent records after they are created, is unchecked.**

答案： D

解題說明：

The issue described occurs due to the settings in the master-detail relationship. Specifically:

The Allow reparenting checkbox, Child records can be reparented to other parent records after they are created, is unchecked (B).

This setting prevents changing the parent record (contact) of a child record (service plan) once it has been set. If 'Allow reparenting' is unchecked, it restricts the ability to change the associated contact, leading to the issue observed.

The other options do not directly address the inability to change the associated contact on a service plan record. The 'Read Only' and 'Read/Write' settings (A and C) pertain to access rights to the detail records based on the master record's access but do not affect the ability to reparent a record.

For a detailed understanding of master-detail relationships and their settings, including reparenting, see the Salesforce documentation on relationships:

#### 問題 #134

The app builder at Northern Trail Outfitters created a report type for opportunities with or without shipments. The operations team wants to see the account rating information on the report.

What should the app builder do to fulfill this request?

- A. Add the Account Rating field to the opportunity record page.
- B. Change the primary object of the custom type to the Account object.
- C. Change the account/opportunity relationship to a master/detail relationship.
- **D. Use add fields related via lookup with the view set to opportunities.**

答案: D

解題說明:

#### 問題 #135

DreamHouse Realty is rethinking its sandbox utilization strategy after acquiring Cloud Kicks. The Salesforce COE already utilizes a partial and a full sandbox, which it refreshes on their own regular schedules. Teams are expanding and have to begin each of their small projects in a sandbox before committing to the larger pool for collaborative testing while still keeping costs down.

What type of sandbox should each team member use?

- A. Developer pro sandbox
- **B. Developer sandbox**
- C. Partial sandbox
- D. Full sandbox

答案: B

解題說明:

The best type of sandbox for each team member to use is a developer sandbox. A developer sandbox is a copy of production that includes only the metadata, such as objects, fields, layouts, etc. It does not include any data, such as records or attachments. A developer sandbox is ideal for small projects that do not require data testing, such as developing new features or customizations. A developer sandbox has a storage limit of 200 MB and can be refreshed once per day. A developer sandbox is also cheaper than other types of sandboxes. A full sandbox is a copy of production that includes all the metadata and data. It is ideal for large projects that require data testing, such as performance testing or integration testing. A full sandbox has the same storage limit as production and can be refreshed every 29 days. A full sandbox is also the most expensive type of sandbox. A developer pro sandbox is similar to a developer sandbox, but it has a larger storage limit of 1 GB and can be refreshed every 5 days. It is ideal for projects that require some data testing, such as data migration or quality assurance testing. A partial sandbox is similar to a full sandbox, but it has a smaller storage limit of 5 GB and can be refreshed every 5 days. It is ideal for projects that require selective data testing, such as user acceptance testing or staging testing.
