## **Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q71-Q76):**

### **NEW QUESTION # 71**

When reloading Gmail in Chrome, the web browser returns a 500 Error. As part of the troubleshooting process, Google support asks you to gather logs. How can this be accomplished?

- A. chrome://net-export > Start Logging to Disk > Confirm validity with <https://netlog-viewer.appspot.com>
- B. Chrome > Window Context Menu > More Tools > Task Manager > Screen Capture List of Running Processes
- C. Chrome > Window Context Menu > More Tools > Developer Tools > Network Tab > Reload the page to replicate the error > "Export HAR"
- D. Admin.google.com > Reporting > Reports > Apps Reports > Gmail

**Answer: C**

### **NEW QUESTION # 72**

The company's ten most senior executives are to have their offices outfitted with dedicated, standardized video conference cameras, microphones, and screens. The goal is to reduce the amount of technical support they require due to frequent, habitual switching between various mobile and PC devices throughout their busy days.

You must ensure that it is easier for the executives to join Meet video conferences with the dedicated equipment instead of whatever device they happen to have available.

What should you do?

- A. Set up unmanaged Chromeboxes and set the executives' homepage to [meet.google.com](https://meet.google.com) via Chrome settings.
- B. Deploy Hangouts Meet Hardware Kits to each executive office, and associate the Meet hardware with the executives' calendars.
- C. Set up the executive offices as reservable Calendar Resources, deploy Hangouts Meet Hardware Kits, and associate the Meet hardware with the room calendars.
- D. Provision managed Chromeboxes and set the executives' Chrome homepage to [meet.google.com](https://meet.google.com) via device policy.

**Answer: C**

Explanation:

- \* Create Calendar Resources:
  - \* In the Google Workspace Admin console, navigate to "Directory" > "Buildings and resources" > "Manage resources".
  - \* Create new resources for each executive office and name them appropriately.
- \* Deploy Hangouts Meet Hardware Kits:
  - \* Set up the Hangouts Meet Hardware Kits in each executive office.
  - \* Connect the hardware kits to the network and ensure they are configured correctly.
- \* Associate Meet Hardware with Room Calendars:
  - \* Link each Hangouts Meet Hardware Kit to the corresponding room calendar resource.
  - \* This allows meetings scheduled in the room to automatically connect to the Meet hardware.
- \* Set Up and Test:
  - \* Ensure that the hardware is functioning correctly by testing video conferences.
  - \* Train executives on how to use the dedicated equipment for joining Meet video conferences.

### NEW QUESTION # 73

Your organization has implemented Single Sign-On (SSO) for the multiple cloud-based services it utilizes. During authentication, one service indicates that access to the SSO provider cannot be accessed due to invalid information. What should you do?

- A. Verify the Recipient attribute in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- B. Verify the NameID Element in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- C. Verify the Subject attribute in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- D. **Verify the Audience Element in the SAML Response matches the Assertion Consumer Service (ACS) URL.**

#### Answer: D

Explanation:

### NEW QUESTION # 74

Your organization recently bought 1,000 licenses for Cloud Identity Premium. The company's development team created an application in the enterprise service bus (ESB) that will read user data in the human resources information system (HRIS) and create accounts via the Google Directory REST API.

While doing the original test before production use, the team observes a 503 error coming from Google API response after a few users are created. The team believes the ESB is not the cause, because it can perform 100 requests per second without any problems. What advice would you give the development team in order to avoid the issue?

- A. Use the domain-wide delegation API to avoid the limitation per account.
- B. Switch from REST API to gRPC protocol for performance improvement
- C. Use the batch request architecture, because it can pack 1,000 API calls in one HTTP request.
- D. **Use an exponential back-off algorithm to retry failed requests.**

#### Answer: D

### NEW QUESTION # 75

Security and Compliance has identified that data is being leaked through a third-party application connected to Google Workspace. You want to investigate using an audit log.

What log should you use?

- A. SAML audit log
- B. Drive usage audit log
- C. **OAuth Token audit log**
- D. Admin audit log

#### Answer: C
