Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q67-Q72):

NEW QUESTION # 67

What are the three different key modules of Public Sector Solutions: Business Rules Engine?

- A. Expression Maps
- B. Decision Tree
- C. Decision Table
- D. Expression Sets
- E. Decision Matrix

Answer: C,D,E

Explanation:

Expression Sets, Decision Table, and Decision Matrix are three different key modules of Public Sector Solutions: Business Rules Engine (BRE). Expression Sets are modules that can define expressions that can be reused across multiple rules or matrices. Decision Table is a module that can evaluate data based on rows of conditions and actions in a tabular format. Decision Matrix is a module that can evaluate data based on columns of conditions and outcomes in a tabular format. Reference:

NEW QUESTION # 68

The Department of Disaster Assistance has received the approval to fund government agencies if a disaster occurs in their region. What is the best solution to capture the fund-related requirements, objectives, and supporting documents?

- A. Utilize the "Funding Program" object to capture the details
- B. Utilize the "Funding Program Request" object to capture the details
- C. Utilize the "Business Licence Application" object to capture the details
- D. Utilize the "Funding Request" object to capture the details

Answer: D

Explanation:

The "Funding Request" object is the best solution to capture the fund-related requirements, objectives, and supporting documents. The "Funding Request" object is a standard object that comes with Public Sector Solutions. It can be used to track requests for funding from different sources, such as government agencies or external organizations. The "Funding Request" object can store information such as the funding program, the funding amount, the funding status, the funding requestor, and the funding recipient. It can also have related records such as documents, tasks, or disbursements. Reference: https://help.salesforce.com/s/articleView?id=psc_admin_setup_funding_request.htm&type=5&language=en_US

NEW QUESTION # 69

Foodvania has adopted Salesforce Public Sector Solutions to get relief to small businesses experiencing hardship due to the pandemic. Foodvania would like the recipients to apply for relief in a self-service portal, allowing for the upload of supporting documentation and the capability to check the status of their application. What should the consultant recommend using?

- A. The consultant should recommend the Outbound Funds Module Which Includes the Grants Portal feature and the procurement for an allotment to Experience Cloud licenses so as the recipients may review their applications status
- B. The consultant should recommend the Grants Management product which Includes the Grants Portal feature
- C. The consultant should recommend the Outbound Funds Module Which Includes the Grants Portal feature
- D. The consultant should recommend the Grants Management product with the Outbound Funds Module to give the recipients the capability to review their applications status.

Answer: B

Explanation:

The consultant should recommend the Grants Management product which includes the Grants Portal feature to allow the recipients to apply for relief in a self-service portal, allowing for the upload of supporting documentation and the capability to check the status of their application. Grants Management is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to manage the entire grant lifecycle, from application to award to reporting. Grants Portal is a component of Grants Management that can help public sector agencies to create a digital experience site for grant applicants or recipients. Grants Portal can allow the recipients to apply for relief in a self-service portal, upload supporting documentation, and check the status of their application. NEW QUESTION # 70

A company discovered that Salesforce already has a pre-built DataPack, that comes with industry-standard procedures; system administrator wants to move and deploy the DataPack, to achieve this.

Which tool can be used to deploy the DataPack Lightning Web Component?

- A. VSCode and Salesforce DX
- B. Change Sets
- C. VSCode
- D. ANT Migration Tool

Answer: A

Explanation:

To deploy a pre-built DataPack, such as a Lightning Web Component, the combination of Visual Studio Code (VSCode) and Salesforce Developer Experience (Salesforce DX) provides a powerful toolset. VSCode, as an integrated development environment, offers extensive support for Salesforce development, including Lightning Web Components. Salesforce DX enhances this with version control, continuous integration, and deployment capabilities, making it an ideal choice for deploying complex packages like DataPacks. This approach allows system administrators to manage and deploy Salesforce configurations and code with precision and control.

NEW QUESTION # 71

When configuring an inspection, the administrator wants a violation record to be automatically generated when an inspector indicates that a standard requirement failed or an issue was identified.

What is the recommended approach for configuring the inspection to achieve this requirement?

- A. Create a new violation type record and associate it with an appropriate Assessment Indicator Definition. Select the "Auto-generate" checkbox so it will generate a V record whenever the AID fails.
- B. In the "Results" picklist field of the Inspection Assessment Indicator Object, edit the "Fail" and "Issue" picklist values and select the "Violations" checkbox for the values to generate a V record when selected.
- C. In the AP Template, xxxxx
- D. Build an auto-launched Flow that will get all the assessment questions in an inspection. For each question that has a result marked as "Issue" or "Fail", generate a V record.

Answer: D

Explanation:

In Salesforce Public Sector Solutions, automating the creation of violation records when certain conditions are met during an inspection can be efficiently achieved using Salesforce Flow. Building an auto-launched Flow allows for detailed customization and control over the logic and actions performed based on the inspection results. Here's how to set it up:

* Create the Flow:

* Navigate to Setup > Process Automation > Flows.

* Create a new Auto-launched Flow.

* Define the Trigger:

* Use a Record-Triggered Flow if you want the flow to be triggered automatically when an inspection record is created or updated.

* Get Assessment Questions:

* Use a Get Records element to retrieve all assessment questions related to the inspection.

* Decision Element:

* Add a Decision element to check each question's result. If the result is marked as "Issue" or "Fail", proceed to create a violation record.

* Create Records:

* Use the Create Records element to generate a violation record for each failed or problematic assessment indicator.

* Activate the Flow:

* Save and activate the Flow.

This method ensures that the logic is flexible and can be modified without changing the underlying data model. It leverages Salesforce's powerful Flow Builder to create sophisticated automation rules.
