It might be time-consuming and tired to prepare for the 1z0-1075-25 exam without a specialist study material. So it's would be the best decision to choose our 1z0-1075-25 study tool as your learning partner. Our 1z0-1075-25 study tool also gives numerous candidates a better perspective on the real exam. Having been specializing in the research of 1z0-1075-25 Latest Practice Materials, we now process a numerous of customers with our endless efforts, and we believe that our 1z0-1075-25 exam guide will percolate to your satisfaction.

The web-based 1z0-1075-25 practice exam can be taken via the internet from any browser like Firefox, Safari, Opera, MS Edge, Internet Explorer, and Chrome. You don't need to install any excessive plugins and software to take this Oracle 1z0-1075-25 Practice Test. Windows, Mac, iOS, Android, and Linux support this Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) practice exam.

1z0-1075-25 Pass4sure Study Materials, Updated 1z0-1075-25 Demo

We offer free demos and updates if there are any for your reference beside real 1z0-1075-25 real materials. By downloading the free demos you will catch on the basic essences of our 1z0-1075-25 guide question and just look briefly at our practice materials you can feel the thoughtful and trendy of us. About difficult or equivocal points, our experts left notes to account for them. To fill the

void, we simplify the procedures of getting way, just place your order and no need to wait for arrival of our 1z0-1075-25 Exam Dumps or make reservation in case people get them all, our practice materials can be obtained with five minutes.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41

Your customer runs production 24 x 7 x 365 and wants to track Overall Equipment Effectiveness (OEE) online. Which key setup can they use to achieve this?

- A. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production Monitoring " In Inventory Organization.
- B. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " in Resources.
- C. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " In Plant Parameters.
- D. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production
- E. Enable IoT Fleet Monitoring and enable synchronization to IoT Production Monitoring in Plant Parameters.

Answer: A

Explanation:

To track Overall Equipment Effectiveness (OEE) in real-time, Oracle Manufacturing Cloud can integrate with IoT solutions. The correct setup involves:

* Enabling IoT Production Monitoring and turning on synchronization to IoT Production Monitoring in the Inventory Organization . This allows real-time data from the shop floor to be captured, processed, and used to monitor equipment effectiveness, performance, and availability.

Incorrect options:

* IoT Fleet Monitoring (A) and IoT Asset Monitoring (B, D) focus on tracking assets and fleets, which are more relevant for logistics or asset management, not production monitoring for OEE.

Oracle Cloud documentation on IoT Production Monitoring details how to set up the system to track OEE and integrate production data with IoT capabilities.

NEW QUESTION # 42

Which statement is NOT true about user-defined work order statuses?

- A. All the new statuses are searchable so you can filter your job and manage the work order life cycle more easily.
- B. The system automatically updates user-defined work order statuses.
- C. They are displayed on work order reports.
- D. It is not recommended to update the name of the system status.

Answer: B

Explanation:

User-defined work order statuses provide flexibility in managing the lifecycle of work orders in Oracle Manufacturing Cloud.

However, the following is not true :

* The system does not automatically update user-defined work order statuses . These statuses are manually updated by users to reflect the work order ' s progress through custom-defined states.

Correct statements:

* Displayed on work order reports : User-defined statuses are visible in work order reports, allowing users to track the status of different orders.

* Name changes to system status : It is not recommended to alter system-defined status names as it could disrupt core system processes and workflows.

* Searchability of new statuses : User-defined statuses are searchable, making it easier to manage and track work orders.

Oracle Manufacturing Cloud guide explains that user-defined statuses are not automatically updated and require manual input for lifecycle management.

NEW QUESTION # 43

A Production Supervisor queries a work order, WO-1025, from the Manage Work Orders page. On the Entering Edit Work Order: WO-1025 page, the supervisor finds a General Information, Operations, and History tab, but no Reservations tab.

What are two reasons for the Reservations tab not being displayed for WO-1025?

- A. It is not a Back-to-Back work order.
- B. It is not a Configured Item work order.
- C. It Is not a Drop-Ship work order.
- D. It is not a Pick-to-Order work order.
- E. It is not a Plan-to-Produce work order.

Answer: A,B

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab on the Edit Work Order page is displayed only for specific types of work orders that require reservations of components or materials. The absence of the Reservations tab in work order WO-1025 indicates that the work order is not one of the following types:

* Configured Item Work Order (A) : Configured items are typically built based on specific customer requirements, and reservations of components are often necessary. Since WO-1025 is not a configured item work order, the Reservations tab is not shown.

* Back-to-Back Work Order (E) : Back-to-back work orders are linked to sales orders and require reservations of materials to fulfill the specific demand. Since WO-1025 is not a back-to-back work order, the tab is not displayed.

Incorrect options:

* B, C, D : Drop-Ship, Pick-to-Order, and Plan-to-Produce work orders do not typically require reservations in the same way as configured or back-to-back orders, which is why they are not the reasons for the absence of the Reservations tab.

Oracle Cloud documentation on work order types and the Reservations tab explains the conditions under which reservations are required and when the tab is displayed.

NEW QUESTION # 44

A Production Operator needs to load work order operation transactions from an external system into Manufacturing Cloud.

What is the correct sequence of tasks to achieve this?

- A. Load data to data repository > Export file to UCM server > Load file from UCM to interface table > Process import operations transactions.
- B. Load data to data repository > Export file to UCM server > Process import operations transactions > Load file from UCM to Interface table.
- C. Export file to UCM server > Load data to data repository > Process import operations transactions > Load file from UCM to interface table.
- D. Load data to data repository > Load file from UCM to interface table > Export file to UCM server > Process import operations transactions.

Answer: A

Explanation:

When loading work order operation transactions from an external system into Oracle Manufacturing Cloud, the correct sequence of tasks is:

* Load data to the data repository : This step ensures the external data is available in Oracle Manufacturing Cloud.

* Export file to UCM server : The data file is then exported to the Universal Content Management (UCM) server, which acts as a staging area for further processing.

* Load file from UCM to interface table : The data from the UCM server is loaded into the appropriate interface table.

* Process import operations transactions : Finally, the system processes the imported transactions and updates the work orders accordingly.

Incorrect sequences:

* Options A, B, C do not follow the correct order, particularly around the interaction between the UCM server and the interface tables.

Oracle Manufacturing Cloud documentation on File-Based Data Import (FBDI) explains the necessary steps and sequence for loading work order transactions from external systems.

NEW QUESTION # 45

In a Manufacturing Cloud implementation, users are finding it difficult to track information about work orders executed across various work centers.

Which three information types in the Work Order Traveler can help users in this situation?

- A. Item on-hand quantity
- B. Hard pegging of items
- C. Work definition details
- D. Product serial information
- E. Reservation against sales orders

Answer: C,D,E

Explanation:

The Work Order Traveler in Oracle Manufacturing Cloud provides detailed information about work orders to help users track and manage work orders across various work centers. The following types of information are especially useful:

* Work definition details (D) : This provides detailed information about the operations and resources required to complete the work order, helping users understand the manufacturing process and requirements.

* Product serial information (E) : Tracking serial numbers for products is critical, especially in industries where traceability and product lifecycle management are important.

* Reservation against sales orders (A) : This information links work orders to specific sales orders, providing clarity on how the work order aligns with customer demand.

Incorrect options:

* Hard pegging of items (B) and Item on-hand quantity (C) are not typically tracked through the Work Order Traveler report, as this report focuses more on the work order 's execution rather than inventory management.

Oracle Manufacturing Cloud documentation on the Work Order Traveler report explains the different types of information provided to help users track work orders and manage production.

NEW QUESTION # 46

.....

ActualTorrent is the leading position in this field and famous for high pass rate of the 1z0-1075-25 learning guide. If you are headache about your qualification exams, our 1z0-1075-25 learning guide materials will be a great savior for you. Now it is your opportunity that we provide the best valid and professional 1z0-1075-25 Study Guide materials which have 100% pass rate. If you really want to clear exam and gain success one time, choosing us will be the wise thing for you. If you hesitate about us please pay attention on below about our satisfying service and high-quality 1z0-1075-25 guide torrent.

1z0-1075-25 Pass4sure Study Materials: <https://www.actualtorrent.com/1z0-1075-25-questions-answers.html>

So that customers can prepare according to the latest 1z0-1075-25 exam content and pass it with ease, The most complete online service of our company will be answered by you, whether it is before the purchase of 1z0-1075-25 training guide or the installation process, or after using the 1z0-1075-25 latest questions, no matter what problem the user has encountered, The Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25 practise test software is valid for Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25.

This tool is similar to the Alt+Tab feature of Windows that 1z0-1075-25 allows for fast application switching. Mark is a widely recognized expert in distributed systems and operating systems.

So that customers can prepare according to the latest 1z0-1075-25 Exam content and pass it with ease, The most complete online service of our company will be answered by you, whether it is before the purchase of 1z0-1075-25 training guide or the installation process, or after using the 1z0-1075-25 latest questions, no matter what problem the user has encountered.

1z0-1075-25 PDF Cram Exam - Realistic Oracle Oracle Manufacturing Cloud 2025 Implementation Professional PDF Cram Exam Pass Guaranteed

The Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25 practise test software is valid for Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25, Our system will store your payment information and send the update dumps for you as soon as there is some update information.

Order now and get high score in Oracle 1z0-1075-25 exam with comfort.
