SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q20-Q25):

NEW QUESTION # 20

Where do you find industry cloud solutions to address a customer's unique requirement?

- **A. SAP Store**
- B. SAP Discovery Center
- C. SAP Signavio Process Navigator
- D. SAP Business Technology Platform

Answer: A

Explanation:

Industry cloud solutions are cloud-based solutions that address specific industry needs and challenges. They are designed to complement and extend the capabilities of SAP S/4HANA Cloud Public Edition and other SAP solutions. You can find industry cloud solutions on the SAP Store, which is the online marketplace for SAP and partner offerings. On the SAP Store, you can browse, discover, try, buy, and deploy industry cloud solutions that suit your business needs. References = SAP S/4HANA Cloud Public Edition, SAP Learning, SAP Store

NEW QUESTION # 21

You are using the Test Automation Tool.

When do you define a data variant??

- A. After creating a test plan.
- **B. After providing consent for Post-Upgrade Testing.**
- C. After binding a process step field to a Test Data Container.
- D. After customizing a test process.

Answer: B

NEW QUESTION # 22

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note:

There are 2 correct answers to this question

- **A. Demonstrate SAP Best Practice business processes in the starter system.**
- B. Conduct end-user training on active scope items.
- **C. Highlight areas that require configuration or customization decisions.**
- D. Determine set up instructions for customer-driven integrations.

Answer: A,C

Explanation:

During the Fit-to-Standard workshops, an implementation consultant supports customer experts by doing the following:

- * Demonstrate SAP Best Practice business processes in the starter system. The consultant shows the customer experts how the standard processes work in SAP S/4HANA Cloud Public Edition and how they fit their business needs¹.
- * Highlight areas that require configuration or customization decisions. The consultant identifies and documents the gaps between the standard processes and the customer requirements, and proposes solutions that are aligned with the cloud mindset¹.

The other options are not the correct ways to support customer experts during the Fit-to-Standard workshops. Determining set up instructions for customer-driven integrations is done in the integration phase, after the Fit-to-Standard workshops are completed².

Conducting end-user training on active scope items is done in the deploy phase, before the go-live of the system³. References = Conducting Fit-to-Standard Workshops - SAP Learning, SAP S/4HANA Cloud Public Edition - Integration, Deploying SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 23

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- **A. Multidimensional Reports**
- B. Lumira Dashboards
- C. Object Views
- **D. SAC Stories**
- **E. Review Booklets**

Answer: A,D,E

NEW QUESTION # 24

Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- **A. A Defect document created through an industry application**
- **B. A Time Sheet Record from a 3rd party application**
- C. An unattended bot in SAP Build Process Automation
- D. A Production Order created through a non-SAP front-end

Answer: A,B

Explanation:

Indirect digital access occurs when humans, devices, or systems use the digital core indirectly through non-SAP intermediary software, such as a non-SAP front end, a custom-solution, or any other non-SAP application¹. Indirect digital access is measured by the number of documents created, updated, or deleted in the SAP system as a result of the indirect use². Examples of indirect digital access include:

* A Defect document created through an industry application: This is an example of indirect digital access because the industry application is a non-SAP software that triggers the creation of a document in the SAP system.

* A Time Sheet Record from a 3rd party application: This is also an example of indirect digital access because the 3rd party application is a non-SAP software that triggers the creation of a document in the SAP system.

* An unattended bot in SAP Build Process Automation: This is not an example of indirect digital access because the bot is using SAP software to access the SAP system directly, not through a non-SAP intermediary software.

* A Production Order created through a non-SAP front-end: This is not an example of indirect digital access because the production order is not a document type that is counted for indirect digital access. The document types that are counted are: Sales Order, Invoice, Purchase Order, Service and Maintenance Document, Manufacturing Document, Quality Management Document, Time Sheet, Financial Document, and Material Document².
