## Trustable C-CPI-2506 Valid Dumps Book & Leading Offer in Qualification Exams & Verified SAP SAP Certified Associate - Integration Developer

We are intent on keeping up with the latest technologies and applying them to the C-CPI-2506 exam questions and answers not only on the content but also on the displays. Our customers have benefited from the convenience of state-of-the-art. That is why our pass rate on C-CPI-2506 practice quiz is high as 98% to 100%. The data are unique-particular in this career. With our C-CPI-2506 exam torrent, you can enjoy the leisure study experience as well as pass the C-CPI-2506 exam with success ensured.

## SAP Certified Associate - Integration Developer Sample Questions (Q54-

## Q59):

### NEW QUESTION # 54

You want to implement a synchronous call to a remote HTTP API as an integration flow component. Which adapter can you use?

- A. Mail
- B. SFTP
- C. OData
- D. AMQP

**Answer: C**

Explanation:

You can use an OData adapter to implement a synchronous call to a remote HTTP API as an integration flow component. An OData adapter allows you to send and receive messages using the OData protocol. OData stands for Open Data Protocol and is a standard for exposing and consuming data over HTTP or HTTPS. You can use an OData adapter to communicate with OData services that support CRUD (Create, Read, Update, Delete) operations on resources. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 55

Which data store operation can you use to save a customer ID?

- A. GET
- B. WRITE
- C. SELECT
- D. POST

**Answer: B**

Explanation:

In SAP Cloud Integration (part of Integration Suite), the Data Store operations allow temporary or persistent storage of messages for asynchronous processing or correlation.

WRITE # Used to save/store data (e.g., Customer ID) in the Data Store.

GET # Retrieves stored data.

SELECT # Reads stored data with filters.

POST # Not a valid Data Store operation in SAP CPI (it's an HTTP verb).

Hence, to save a customer ID, the correct operation is WRITE.

### NEW QUESTION # 56

Which expression language can you use to access the content of a message in an integration flow?

- A. XML expression language
- B. JavaScript expression language
- C. Spring expression language
- D. Simple expression language

**Answer: D**

Explanation:

In SAP Cloud Integration, the runtime message content, headers, and properties can be accessed using the Camel Simple Expression Language.

Examples:

`${body}` # Accesses the message payload.

`${header.<headerName>}` # Accesses message headers.

`${property.<propertyName>}` # Accesses integration properties.

Other options:

XML expression language # Not supported directly.

Spring expression language # Used in Spring apps, not in SAP CPI.

JavaScript expression language # Not used; JavaScript/Groovy scripts exist, but not for message expressions.

Thus, the correct language is Simple expression language.

#### NEW QUESTION # 57

What is a characteristic of a product in the API Management capability within SAP Integration Suite?

- A. It encapsulates the API provider.
- B. It is a separate artifact and is required for basic authentication.
- C. It is deployed as a separate artifact on the API business hub enterprise

**Answer: C**

Explanation:

A product in the API Management capability within SAP Integration Suite is a bundle of one or more API proxies that are grouped together for a specific business scenario or use case. A product is a separate artifact that can be deployed to the API business hub enterprise, which is a centralized platform for discovering, consuming, and managing APIs. A product can have its own metadata, such as name, title, description, quota limits, and so on. A product can also have its own policies that apply to all the APIs included in it. Reference: Create a Product | SAP Help Portal, API Business Hub Enterprise | SAP Help Portal

#### NEW QUESTION # 58

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: Request-Reply. Process Settings: Robust
- B. Message Exchange Pattern: One-Way. Process Settings: WS Standard
- C. Message Exchange Pattern: One-Way. Process Settings: Robust
- D. Message Exchange Pattern: Request-Reply. Process Settings: WS Standard

**Answer: C**

Explanation:

For asynchronous processing in a SOAP adapter (SAP Cloud Integration):

Use Message Exchange Pattern = One-Way # Indicates no response is expected.

Choose Process Settings = Robust # Ensures message reliability and error handling in async flows.

Other combinations:

Request-Reply # Used for synchronous scenarios, not async.

WS Standard # Not the correct configuration for async reliability in CPI SOAP adapter.

Thus, correct async configuration is: One-Way + Robust.

#### NEW QUESTION # 59

.....

Our C-CPI-2506 study materials have three versions which are versions of PDF, Software/PC, and APP/Online. Each format has distinct strength and shortcomings. We have printable PDF format that you can study our C-CPI-2506 training engine anywhere and anytime since it is printable. We also have installable Software version which is equipped with simulated real exam environment. And the APP online version of our C-CPI-2506 Exam Dumps can support all kinds of electronic devices.
