

# HP HPE7-J02 Exam Questions 2026 Tips To Pass

All we want you to know is that people are at the heart of our manufacturing philosophy, for that reason, we place our priority on intuitive functionality that makes our HPE7-J02 exam question to be more advanced. So with our HPE7-J02 guide torrents, you are able to pass the HPE7-J02 Exam more easily in the most efficient and productive way and learn how to study with dedication and enthusiasm, which can be a valuable asset in your whole life. It must be your best tool to pass your HPE7-J02 exam and achieve your target.

There is a high demand for HP Development certification, therefore there is an increase in the number of HP HPE7-J02 exam candidates. Many resources are available on the internet to prepare for the Advanced HPE Storage Integrator Solutions Written Exam exam. ActualVCE is one of the best certification exam preparation material providers where you can find newly released HP HPE7-J02 Dumps for your exam preparation. With years of experience in compiling top-notch relevant HP HPE7-J02 dumps questions, we also offer the HP HPE7-J02 practice test (online and offline) to help you get familiar with the actual exam environment.

>> Valid HPE7-J02 Exam Sims <<

## Start Your HP HPE7-J02 Exam Preparation with HPE7-J02 Actual Exam Questions

We also provide timely and free update for you to get more HPE7-J02 questions torrent and follow the latest trend. The HPE7-J02 exam torrent is compiled by the experienced professionals and of great value. You can master them fast and easily. We provide varied versions for you to choose and you can find the most suitable version of HPE7-J02 Exam Materials. So it is convenient for the learners to master the HPE Storage Solutions questions torrent and pass the exam in a short time.

### HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Competitive Positioning of HPE Storage:</b> This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Storage Transport in Multi-Site Solutions:</b> This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Optimizing the Customer's Environment:</b> This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.</li> </ul>

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

You need to evaluate a customer virtual server environment to size an HPE Block storage solution according to the metrics seen on the system over a period of time. The environment consists of Lenovo servers and Pure Storage as the storage vendor for a Microsoft Hyper-V cluster managed by Microsoft SCVMM.

Which HPE tools can you utilize to gather the usage metrics of this setup?

- A. Install the SAFcollector agents into the environment and use SAFanalyze to import the agent output.
- B. Use the HPE InfoSight Primary Storage sizing tool to calculate the competitive performance metrics.
- C. Export the Microsoft System Center Virtual Machine Manager database for NinjaProtected analysis.
- **D. Import the HPE CloudPhysics.vhdx collector to the Hyper-V cluster to gather the analytics.**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE CloudPhysics provides comprehensive environment assessment and competitive sizing for virtualized environments (VMware, Hyper-V, etc.). The CloudPhysics collector (available as a .vhdx for Hyper-V) is deployed into the cluster to gather metrics on CPU, memory, storage IOPS/latency, and utilization trends.

These analytics feed into the sizing of HPE storage solutions.

Distractors:

B: InfoSight sizing tools work with HPE systems, not competitive 3rd-party storage like Pure.

C: SAF is a manual assessment requiring email submission and is not the correct modern method for this case.

D: NinjaProtected applies to backup analysis, not production Hyper-V cluster sizing.

Key Concept: CloudPhysics.vhdx collector for Hyper-V sizing with 3rd-party infrastructure.

Reference: HPE CloudPhysics Assessment Guide.

### NEW QUESTION # 15

Your customer is a software development company using Kubernetes, Canonical, and Tanzu. They are expanding their Dev/Ops container environment and are considering HPE Private Cloud Business Edition (PCBE).

What is a unique benefit that HPE PCBE would bring to this customer's environment?

- A. Container level protection
- B. Infinite scale to the customer at no additional cost
- **C. Full stack intelligence**
- D. Multi-tenant VASA

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE PCBE provides full-stack intelligence across compute, storage, and virtualization layers. It integrates with Kubernetes distributions like Tanzu and Canonical, giving visibility and lifecycle automation across the entire stack. This helps Dev/Ops teams simplify operations, capacity planning, and performance optimization in hybrid environments.

Distractors:

B: Multi-tenant VASA applies more to VMware vVols in multi-tenant setups.

C: No platform offers "infinite scale at no cost" - this is misleading.

D: Container-level protection is delivered through HPE CSI with data protection solutions, not unique to PCBE.

Key Concept: HPE PCBE delivers unified lifecycle management with full-stack intelligence.

Reference: HPE Private Cloud Business Edition Overview.

## NEW QUESTION # 16

You are sizing an HPE Alletra Storage MP B10000 array (graphic provided).

What happens when the High Availability (HA) option is switched from Drive Level to Enclosure Level?

- A. The Enclosure Level option is only available with a switched configuration
- B. The estimated performance decreases due to lower IOPS and GB/s values
- C. The Enclosure Level option is not possible with the current number of disk enclosures
- **D. The Usable Capacity for the array decreases when selecting Enclosure Level HA**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Changing HA from Drive Level to Enclosure Level means the system must reserve additional capacity to tolerate the loss of an entire disk enclosure. This decreases usable capacity, as more parity/spare space is required. Performance remains similar, but capacity overhead increases.

Distractors:

A: Multiple enclosures exist in the config; option is valid.

B: Switched vs direct-connect is unrelated to HA settings.

C: Performance estimates are not directly reduced by HA level change; capacity is.

Key Concept: Enclosure HA = more reserve overhead # less usable capacity.

Reference: HPE Alletra MP Sizing Tool User Guide.

## NEW QUESTION # 17

Which statement is correct when enabling port trunking (FC ISL / Ethernet link aggregation)?

- A. The port speed of the trunk ports can be different based on the used switches in the ISL group.
- B. For optimal performance, no more than 100 meters of cable length difference is acceptable.
- **C. Ports need to belong to the same port group of the switch.**
- D. Port Trunking is supported by default on every B-Series FC switch.

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In B-Series (Brocade) SAN switches, trunking requires that all ports in a trunk group belong to the same port group (same ASIC) and run at the same speed. This ensures frame ordering and load balancing across ISLs.

Distractors:

A: Incorrect - cable length differences must be minimal, but not stated in meters like this.

C: Incorrect - speeds must match across all trunked ports.

D: Trunking requires a license on some Brocade models; not always enabled by default.

Key Concept: Port trunking requires same port group and same speed.

Reference: HPE B-Series SAN Switch Trunking Best Practices.

### NEW QUESTION # 18

A financial services company is planning to upgrade its data center infrastructure. Their considerations are:

Budget Management: Prefer one-time expense, avoid variable costs.

Flexibility: Growth planned in yearly budget cycles.

Ownership: Want to own equipment outright.

Operational Control: Full control of equipment lifecycle and customization.

Which procurement option best meets these needs?

- A. Capital lease
- B. Consumption model
- **C. Capital purchase**
- D. Operating lease

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The requirements align with a Capital Purchase - outright ownership with a one-time CapEx expense. This provides complete lifecycle control and no ongoing payments, fitting the financial services company's budgeting and governance model.

Distractors:

A: Operating lease is OpEx, variable payments, and no ownership.

B: Capital lease provides eventual ownership but still requires periodic lease payments.

C: Consumption model (e.g., GreenLake) uses variable OpEx, opposite of the customer's request.

Key Concept: CapEx model = one-time purchase, ownership, full control.

Reference: HPE Financial Services Procurement Options Guide.

### NEW QUESTION # 19

.....

Though our HPE7-J02 study guide has three formats which can meet your different needs, PDF version, software version and online version, i love the PDF version to the best. If you choose the PDF version, you can download our HPE7-J02 exam material and print it for studying everywhere. And you can take notes on them as long as any new thoughts come to you. If a new version of the HPE7-J02 learning guide comes out, we will send you a new link to your E-mail box and you can download it again.
