The old clients enjoy some certain discounts when they buy our C_SIGDA_2403 exam torrent. Our experts check whether there is the update of the test bank every day and if there is the system will send to the client automatically. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important C_SIGDA_2403 Exam Torrent in the shortest time and finally pass the exam successfully.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q18-Q23):

NEW QUESTION # 18

What is the goal of Process Mining? Note: There are 2 correct answers to this question.

- A. To create reports for analysis
- B. To simulate business processes
- C. To transform business data into actionable insights
- D. To reveal the current state of processes in a system

Answer: C,D

Explanation:

The goal of Process Mining includes:

* Option C (To reveal the current state of processes in a system): One of the primary goals of Process Mining is to provide transparency into the actual execution of processes within an organization. By analyzing event logs, Process Mining uncovers the real, as-is state of business processes, revealing

* inefficiencies, deviations, and opportunities for optimization.

* Option D (To transform business data into actionable insights): Process Mining lever

NEW QUESTION # 19

When is a new version of the workflow created?

- A. After publishing the workflow
- B. After manually saving
- C. Automatically after creating a new case
- D. Automatically after changing the workflow

Answer: C

NEW QUESTION # 20

What are some aggregation functions in SiGNAL? Note: There are 3 correct answers to this question.

- A. GROUP BY
- B. FIRST()
- C. INNER JOIN
- D. AVG()
- E. BOOL_OR

Answer: B,D,E

Explanation:

In SAP Signavio, SiGNAL is a scripting language used for manipulating and analyzing process data. Among the aggregation functions available in SiGNAL, AVG(), FIRST(), and BOOL_OR are correct answers. These functions serve different purposes:

* AVG() calculates the average value of a numeric column, useful for finding mean values in datasets.

* FIRST() returns the first value in a data set based on a specified order. This can be particularly useful in scenarios where you're interested in retrieving an initial value from a series of events or values.

* BOOL_OR is a boolean aggregation function that returns true if at least one of the input values is true.

This can be used to aggregate boolean data across different rows or entries.

INNER JOIN and GROUP BY are not aggregation functions. INNER JOIN is used to combine rows from two or more tables based on a related column between them. GROUP BY is used to arrange identical data into groups with the help of some aggregate functions like AVG(), but it is not an aggregation function itself.

References: SAP Signavio documentation on SiGNAL scripting language and its functions.

NEW QUESTION # 21

What are the typical roles required in Process Mining projects? Note: There are 3 correct answers to this question.

- A. Process Manager
- B. Data & IT Expert
- C. Process Analyst
- D. Project Lead
- E. Process Owner

Answer: B,C,E

Explanation:

Process Mining projects require a combination of technical, analytical, and process-specific expertise.

According to the SAP Signavio documentation:

* Option A (Data & IT Expert): This role is responsible for extracting and preparing data from source systems, configuring ETL pipelines, and ensuring data quality for Process Mining analysis.

* Option C (Process Analyst): The Process Analyst interprets Process Mining results, identifies improvement opportunities, and translates insights into actionable recommendations.

* Option E (Process Owner): The Process Owner provides domain knowledge, defines analysis objectives, and ensures that Process Mining outcomes align with business goals.

* Option B (Project Lead) is incorrect as, while a project lead may oversee the project, it is not a role specifically required for Process Mining tasks.
