What's more, part of that PracticeDump NCLEX-RN dumps now are free: <https://drive.google.com/open?id=1JTqwjznUlk0mpcXTFGZhdcewoKeE7Bb>

With our NCLEX NCLEX-RN study materials, you can make full use of those time originally spent in waiting for the delivery of exam files so that you can get preparations as early as possible. There is why our NCLEX NCLEX-RN learning prep exam is well received by the general public.

NCLEX-RN (National Council Licensure Examination for Registered Nurses) is a standardized exam that assesses the competency of nursing graduates for entry-level nursing practice. NCLEX-RN exam is developed and administered by the National Council of State Boards of Nursing (NCSBN) and it is required for all nurses who want to practice in the United States and Canada. The NCLEX-RN Exam is designed to test nursing knowledge, skills, and abilities required for safe and effective nursing practice. Passing the NCLEX-RN exam is a requirement for obtaining a nursing license and becoming a registered nurse.

## NCLEX NCLEX-RN Exam Questions - Tips To Pass

If you free download the demos of our NCLEX-RN study guide to have a try, then you will find that rather than solely theory-oriented, our NCLEX-RN actual exam provides practice atmosphere when you download them, you can practice every day just like answering on the real NCLEX-RN Practice Exam. We can help you demonstrate your personal ability and our NCLEX-RN exam materials are the product you cannot miss.

The NCLEX NCLEX-RN exam covers a broad range of topics related to nursing practice, including health promotion and maintenance, psychosocial integrity, physiological adaptation, and pharmacological and parenteral therapies. The questions are designed to test the test-taker's critical thinking and clinical reasoning skills, as well as their ability to apply nursing concepts and principles in real-world situations.

NCLEX-RN (National Council Licensure Examination for Registered Nurses) is a standardized exam that is used to determine whether a nurse is qualified to practice as a registered nurse. It is administered by the National Council of State Boards of Nursing and is required in all 50 states in the United States. NCLEX-RN Exam is designed to test the knowledge, skills, and abilities

necessary for safe and effective nursing practice.

## NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q441-Q446):

### NEW QUESTION # 441

A female client is concerned that she is in a "high-risk" group for the development of acquired immunodeficiency syndrome (AIDS). She wants to know about the advisability of donating blood. Which of the following responses is correct?

- A. "It is not a good idea for you to donate. If you have AIDS, the information is made public and could destroy your personal life."
- B. "You should not donate since it takes time to develop antibodies to the AIDS virus. If you donate blood before you develop the antibody, you could pass it on in the blood."
- C. "It's OK for you to donate because the blood bank has a test that is 100% effective."
- D. "Individuals who donate blood are at risk of getting the AIDS virus. You should not donate."

**Answer: B**

Explanation:

(A) The AIDS virus cannot be transmitted to the donor through the blood donation procedure. (B) The test for the AIDS virus is not absolutely foolproof; therefore, it is not wise for a person with known risk factors to donate blood. (C) It takes time for antibodies to the AIDS virus to develop. An infected individual could donate contaminated blood without it testing positive for the virus. (D) For reasons of confidentiality, information about individuals infected with AIDS is not made public.

### NEW QUESTION # 442

A mother came to the pediatric clinic with her 17- month-old child. The mother would like to begin toilet training. What should the nurse teach her about implementing toilet training?

- A. Take two or three favorite toys with the child.
- B. Show disapproval if she does not void or defecate.
- C. Explain to the child she is going to "void" and "defecate."
- D. Have a child-sized toilet seat or training potty on hand.

**Answer: D**

Explanation:

Explanation

(A) Giving her toys will distract her and interfere with toilet training because of inappropriate reinforcement.

(B) A child-sized toilet seat or training potty gives a child a feeling of security. (C) She should use words that are age appropriate for the child. (D) Children should be praised for cooperative behavior and/or successful evacuation.

### NEW QUESTION # 443

A gravida 2 para 1 client is hospitalized with severe preeclampsia. While she receives magnesium sulfate (MgSO<sub>4</sub>) therapy, the nurse knows it is safe to repeat the dosage if:

- A. Respirations are >16 breaths/min
- B. MgSO<sub>4</sub> serum levels are >15 mg/dL
- C. Deep tendon reflexes are absent
- D. Urine output is 20 mL/hr

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

(A) MgSO<sub>4</sub> is a central nervous system depressant. Loss of reflexes is often the first sign of developing toxicity. (B) Urinary output at <25 mL/hr or 100 mL in 4 hours may result in the accumulation of toxic levels of magnesium. (C) The therapeutic serum range for MgSO<sub>4</sub> is 6-8 mg/dL. Higher levels indicate toxicity.

(D) Respirations of >16 breaths/min indicate that toxic levels of magnesium have not been reached.

Medication administration would be safe.

#### NEW QUESTION # 444

As a nurse works with an adolescent with cystic fibrosis, the nurse begins to notice that he appears depressed and talks about suicide and feelings of worthlessness. This is an important factor to consider in planning for his care because:

- A. It may be a bid for attention and an indication that more diversionary activity should be planned for him
- B. He needs to be observed carefully for signs that his depression has been relieved
- C. He needs to be confronted with his feelings and forced to work through them
- D. No threat of suicide should be ignored or challenged in any way

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

(A) Threats of suicide should always be taken seriously. (B) This client has a life-threatening chronic illness. He may be concerned about dying or he may actually be contemplating suicide. (C) Sometimes clients who have made the decision to commit suicide appear to be less depressed. (D) Forcing him to look at his feelings may cause him to build a defense against the depression with behavioral or psychosomatic disturbances.

#### NEW QUESTION # 445

The nurse teaches a male client ways to reduce the risks associated with furosemide therapy. Which of the following indicates that he understands this teaching?

- A. "I'll be sure to rise slowly and sit for a few minutes after lying down."
- B. "I'll be sure to walk at least 2-3 blocks every day."
- C. "I'll be sure not to take any more aspirin while I am on this drug."
- D. "I'll be sure to restrict my fluid intake to four or five glasses a day."

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

(A) This response will help to prevent the occurrence of postural hypotension, a common side effect of this drug and a common reason for falls. (B) Although walking is an excellent exercise, it is not specific to the reduction of risks associated with diuretic therapy. (C) Clients on diuretic therapy are generally taught to ensure that their fluid intake is at least 2000-3000 mL daily, unless contraindicated. (D) Aspirin is a safe drug to take along with furosemide.

#### NEW QUESTION # 446
