

# MB-820 VCE Dumps, Passing MB-820 Score Feedback

2026 Latest Exam4Free MB-820 PDF Dumps and MB-820 Exam Engine Free Share: [https://drive.google.com/open?id=10\\_Cx9j7J1iDJgflTD9hgk-Wu9ldWl1fmc](https://drive.google.com/open?id=10_Cx9j7J1iDJgflTD9hgk-Wu9ldWl1fmc)

We will provide you with three different versions of our MB-820 exam questions on our test platform. You have the opportunity to download the three different versions from our test platform. The three different versions of our MB-820 Test Torrent include the PDF version, the software version and the online version. The three different versions will offer you same questions and answers, but they have different functions.

## Microsoft MB-820 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Integrate Business Central with other applications: Accessing Representational State Transfer (REST) services is discussed in this topic. It also explains implementation of APIs.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Develop by using AL objects: Building and extending tables and reports is discussed in this topic. It also explains Designing and creating an XMLport. Lastly, it discusses how to work with entitlement and permission set objects.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Develop by using AL: How to Customize the UI experience and Use AL for business central extension is discussed here. It also delves into explaining the essential development standards.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Install, develop, and deploy for Business Central: It delves into the installation and configuration of a Business Central development environment. Moreover, it discusses creating, debugging, and deploying an extension in Business Central.</li></ul>

## Get Microsoft MB-820 Exam Questions with High Probability in PDF

Exam4Free can provide a shortcut for you and save you a lot of time and effort. Exam4Free will provide good training tools for your Microsoft Certification MB-820 Exam and help you pass Microsoft certification MB-820 exam. If you see other websites provide relevant information to the website, you can continue to look down and you will find that in fact the information is mainly derived from our Exam4Free. Our Exam4Free provide the most comprehensive information and update fastest.

## Microsoft Dynamics 365 Business Central Developer Sample Questions (Q41-Q46):

### NEW QUESTION # 41

You need to improve performance when ticketAPI is used to analyze the POS data. What should you do?

- A. Set the AccessByPermission property to Read on the ticketAPI API page.
- B. Set the ODataReadOnlyGetEnabled parameter to True in the Business Central admin center.
- C. Set the DataAccessIntent property to ReadOnly on the ticketAPI API page.
- **D. Enable read scale-out on the Business Central database.**

**Answer: D**

Explanation:

Read Scale-Out:

Read scale-out is a feature in Business Central that allows you to improve performance by distributing read-only queries (such as the ones from the ticketAPI) across multiple read replicas in the cloud database. This reduces the load on the primary database and helps improve the response time for read-intensive operations, like analyzing POS data through the ticketAPI.

Data Access Intent - ReadOnly:

When enabling read scale-out, you can configure the DataAccessIntent property of APIs to be ReadOnly. This directs the system to use read replicas to handle read-only queries, which enhances performance by offloading such queries from the primary database.

Why Not Other Options?

Option A (ODataReadOnlyGetEnabled): This parameter is unrelated to read scale-out and primarily affects OData services behavior, not API performance tuning.

Option B (AccessByPermission): Setting the permission to Read does not directly affect the performance. It only controls access based on user permissions.

Option D (DataAccessIntent ReadOnly): While setting this property to ReadOnly helps in read-only operations, enabling read scale-out (option C) ensures the underlying infrastructure is optimized to handle such read operations, which is the fundamental action required.

DRAG DROP Documentation:

Read Scale-Out in Business Central

Data Access Intent in AL

### NEW QUESTION # 42

A company plans to import and export data with Business Central

You must configure an XMLport that provides the following implementation;

- \* Specifies import or export on the Request page at runtime
- \* Formats the data in a non-fixed length CSV format

You need to create the XMLport.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

Direction: Both

Format: VariableText

You are configuring an XMLport for Business Central with the following requirements:

- \* Specifies import or export on the Request page at runtime.
- \* Formats the data in a non-fixed length CSV format.

XMLport Configuration:

- \* Specifies import or export on the Request page at runtime. The Direction property must be set to Both.
- \* This allows the XMLport to both import and export data depending on user selection during runtime.
- \* Formats the data in a non-fixed length CSV format. The Format property must be set to VariableText.
- \* VariableText is used for delimited text formats like CSV, which do not have a fixed length for fields.

### NEW QUESTION # 43

You are creating a new Business Central report.

You plan to use triggers and functions to dynamically create a dataset and control the report behavior.

You must provide the following implementation.

- \* Run when the report is loaded.
- \* Run when the data item is iterated for the last time.
- \* Skip the rest of the report.

You need to select the triggers and functions for the report.

Which triggers and functions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

- \* Run when the report is loaded: OnInitReport
- \* Run when the data item is iterated for the last time: OnPostDataItem
- \* Skip the rest of the report: CurrReport.Skip()

Triggers and Functions:

- \* Run when the report is loaded. The correct trigger for running a function when the report is loaded is OnInitReport.
- \* OnInitReport is triggered when the report is initialized, which aligns with the requirement to run when the report is loaded.
- \* Run when the data item is iterated for the last time. The correct trigger here is OnPostDataItem.
- \* OnPostDataItem runs when the data item has been fully processed and iterated for the last time, which is the specific requirement for this condition.
- \* Skip the rest of the report. The correct function here is CurrReport.Skip().
- \* CurrReport.Skip() is used to skip the remaining records and terminate the current iteration, allowing you to skip the rest of the report as required.

**NEW QUESTION # 44**

You need to handle the removal of the Description field and the Clone procedure without breaking other extensions.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation:

Explanation:

In Business Central, when you need to handle the removal of fields and procedures to ensure that other extensions are not affected by these changes, you typically follow a two-step deprecation process. This allows other developers and users to adapt to the changes before they are fully enforced. Here are the steps to handle the removal:

- \* Mark as Obsolete: In the first version where the decision to remove the field or procedure is made, you set the ObsoleteState to Pending and provide an ObsoleteReason. This doesn't remove the feature but indicates to users and developers that it will be removed in the future. This step is crucial for backward compatibility.
- \* Removal: In a subsequent version, after users have had time to adapt to the deprecation warning, you can then remove the field or procedure or set the ObsoleteState to Removed.

Based on these guidelines, here are the three actions you should perform in sequence:

- \* Set the Description field as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.
- \* Set the Clone procedure as ObsoleteState = Pending and ObsoleteReason = 'Not in use' in version 2.0.0.0.
- \* Remove the Description field from the Issue table in version 2.0.0.1.

These steps will ensure that anyone using the Description field or Clone procedure will receive a warning about the pending deprecation before it is actually removed, thereby minimizing the impact on other extensions and providing a clear path for migration. When handling the removal of fields and procedures in Microsoft Dynamics 365 Business Central, the process should be carried out in a way that allows other extensions or dependent features to adapt to the changes without causing immediate failures.

\* Set Obsolete State and Reason for Description Field (Version 2.0.0.0): The first step involves marking the Description field as obsolete by setting the ObsoleteState to 'Pending'. This is a non-breaking change, signaling to other developers and users that the field is planned for removal in a future version.

An ObsoleteReason should also be provided to explain why the field is being deprecated.

\* Set Obsolete State and Reason for Clone Procedure (Version 2.0.0.0): Similarly, the Clone procedure should be marked as obsolete with the ObsoleteState set to 'Pending'. This indicates that the procedure is no longer in use and will be removed in the future. Providing an ObsoleteReason is best practice as it explains the rationale behind the decision.

\* Remove the Description Field (Version 2.0.0.1): In the subsequent version, after the developers and users have been given time to adapt to the deprecation notice, the Description field can be safely removed from the Issue table. This is considered a breaking change, hence it is done after the field has been marked as obsolete in a previous version.

The reason for not removing the Description field and Clone procedure immediately in version 2.0.0.0 is to avoid causing runtime errors for any extensions or integrations that may depend on these components. By following this sequence, you provide a clear deprecation path that helps maintain the stability of the overall system while evolving the schema.

#### NEW QUESTION # 45

You develop a test application.

You must meet the following requirements:

\* Roll back changes to a test method after run time.

\* Run an approve action on a test page named TestPageA.

You need to implement the given requirements on the test codeunit

Which actions should you perform? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

To roll back changes to a test method after run time, you should:

\* Set the TransactionModel attribute to AutoRollback.

To run an approve action on a test page named TestPageA, you should:

\* Configure TestPageA.Approve.Invoke().

In Business Central's testing framework, the TransactionModel attribute can be set to AutoRollback. This ensures that any changes made during the test are rolled back after the test is complete, leaving the database in its original state.

For running an action on a test page, you would use the 'Invoke' method on the action you wish to perform. In this case, to run an approve action on TestPageA, you would use TestPageA.Approve.Invoke() within your test codeunit. This simulates the user action of approving something on the page.

These actions ensure that the testing environment is properly set up to test specific functionalities without persisting test data and to invoke actions as part of the test scenarios.

#### NEW QUESTION # 46

.....

First and foremost, our company has prepared MB-820 free demo in this website for our customers. Second, it is convenient for you to read and make notes with our PDF version of our MB-820 learning guide. Last but not least, we will provide considerate on line after sale service for you in twenty four hours a day, seven days a week. So let our MB-820 practice materials to be your learning partner in the course of preparing for the exam, especially the PDF version is really a wise choice for you.
