

# New Top FCSS\_NST\_SE-7.6 Questions | High-quality FCSS\_NST\_SE-7.6: FCSS - Network Security 7.6 Support Engineer 100% Pass

BTW, DOWNLOAD part of Pass4Test FCSS\_NST\_SE-7.6 dumps from Cloud Storage: [https://drive.google.com/open?id=1Vp\\_2jk3SCaofUHCwQwkjGyKU\\_DTbYnuo](https://drive.google.com/open?id=1Vp_2jk3SCaofUHCwQwkjGyKU_DTbYnuo)

Pass4Test has the ability to help IT people for success. Pass4Test Fortinet FCSS\_NST\_SE-7.6 exam dumps are the training materials that help you succeed. As long as you want to Pass FCSS\_NST\_SE-7.6 Test, you must choose Pass4Test. We guarantee your success in the first attempt. If you fail, we will give you a FULL REFUND of your purchasing fee.

When we are in some kind of learning web site, often feel dazzling, because web page design is not reasonable, put too much information all rush, it will appear desultorily. Absorbing the lessons of the FCSS\_NST\_SE-7.6 test prep, will be all kinds of qualification examination classify layout, at the same time on the front page of the FCSS\_NST\_SE-7.6 test materials have clear test module classification, so clear page design greatly convenient for the users, can let users in a very short period of time to find what they want to study, and then targeted to study. Saving the precious time users already so, also makes the FCSS\_NST\_SE-7.6 Quiz torrent look more rich, powerful strengthened the practicability of the products, to meet the needs of more users, to make the FCSS\_NST\_SE-7.6 test prep stand out in many similar products.

## Free PDF Quiz Fortinet - FCSS\_NST\_SE-7.6 Authoritative Top Questions

Pass4Test provides the most reliable and authentic FCSS - Network Security 7.6 Support Engineer (FCSS\_NST\_SE-7.6) prep

material there is. The 3 kinds of Fortinet FCSS\_NST\_SE-7.6 preparation formats ensure that there are no lacking points in a student when he attempts the actual FCSS\_NST\_SE-7.6 exam. The FCSS - Network Security 7.6 Support Engineer (FCSS\_NST\_SE-7.6) exam registration fee varies between 100\$ and 1000\$, and a candidate cannot risk wasting his time and money, thus we ensure your success if you study from the updated Fortinet FCSS\_NST\_SE-7.6 practice material. We offer the demo version of the actual Fortinet FCSS\_NST\_SE-7.6 questions so that you may confirm the validity of the product before actually buying it, preventing any sort of regret.

## Fortinet FCSS - Network Security 7.6 Support Engineer Sample Questions (Q109-Q114):

### NEW QUESTION # 109

What can cause an IKEv2 tunnel to go down after it was initially brought up successfully?

- A. Mismatched quick-mode selectors were detected during the CREATE\_CHILD\_SA exchange.
- B. A mismatched Diffie-Hellman group was detected during the IKE\_SA\_INIT exchange.
- C. A mismatched pre-shared key was detected during the IKE\_AUTH exchange.
- D. A mismatched proposal was detected during the IKE\_AUTH exchange.

**Answer: A**

Explanation:

The correct answer is D.

The study guide explains that IKEv2 has two initial exchanges:

IKE\_SA\_INIT

IKE\_AUTH

and then later exchanges such as:

CREATE\_CHILD\_SA

It also states the roles of those exchanges:

IKE\_SA\_INIT negotiates the security settings for IKE traffic

IKE\_AUTH performs mutual authentication and sets up the piggyback child SA CREATE\_CHILD\_SA creates a new child SA or rekeys an existing child SA Most importantly, the study guide explicitly says:

"By IKEv2 design, no Diffie-Hellman public key is exchanged during an IKE\_AUTH exchange. Consequently, any phase 2 Diffie-Hellman group configuration mismatch between FortiGate and the peer is experienced only during the first rekey (CREATE\_CHILD\_SA exchange) of the child SA created during IKE\_AUTH." This proves the key idea behind the question: an IKEv2 tunnel can come up successfully first, then fail later during a CREATE\_CHILD\_SA rekey/renegotiation event because of a phase 2 mismatch. Among the provided options, the matching later-stage cause is mismatched quick-mode selectors during CREATE\_CHILD\_SA.

Why the other options are wrong:

A is wrong because if the proposal mismatch were in the initial negotiation path, the tunnel would fail during establishment, not after it was already up. The study guide places initial tunnel establishment in IKE\_SA\_INIT and IKE\_AUTH B is wrong because a mismatch in IKE\_SA\_INIT affects the initial establishment stage, not a tunnel that was already brought up successfully C is wrong because a pre-shared key mismatch is part of authentication during IKE\_AUTH, so the tunnel would not come up successfully in the first place

### NEW QUESTION # 110

Refer to the exhibit, which shows the output of the BGP database.

```

router info bgp network
0 BGP table version is 3, local router ID is 1.1.1.1
as codes: s suppressed, d damped, h history, * valid, > best, i - internal,
          S Stale
asn codes: i - IGP, e - EGP, ? - incomplete

Network          Next Hop          Metric      LocPrf  Weight  RouteTag Path
0.0.0.0/0         100.64.2.254     0           0       0       0 ? <-/->
                  100.64.2.1       32768       0       0       0 ? <-/1>
1.2.2.1/32        100.64.2.254    0           100      0       0 ? <-/1>
8.8.8.8/32        100.64.2.254    0           100      0       0 ? <-/1>
0.20.30.0/24      172.16.54.115   0           100      0       0 i <-/1>

1 number of prefixes 4
  
```

Which two statements are correct? (Choose two.)

- A. The advertised prefix of 10.20.30.0/24 is being advertised through the redistribution of another routing protocol.
- B. The output shows all prefixes advertised by all neighbors as well as the local router.
- C. The advertised prefix of 10.20.30.0/24 was configured using the network command.
- D. The first four prefixes are being advertised using a legacy route advertisement.

**Answer: B,C**

Explanation:

\* For Option A: In Fortinet BGP (and standard BGP), when a prefix is displayed with an "i" (lowercase i) in the Path column, it represents an internal prefix that originated from the local router, typically configured via the BGP "network" command. In the exhibit, the prefix 10.20.30.0/24 is listed with a Path value of i, indicating it was injected into BGP by the local router using the network statement, not via redistribution from another routing protocol. The same logic applies to i as documented: "Origin code 'i' means the route was injected via the network command."

\* For Option D: The get router info bgp network output is a summary table displaying both local and received BGP routes. It lists all known routes to the BGP process, whether received from peers or originated locally. The exhibit shows all BGP prefixes known to the local router, matching the official admin guide's description of this command's output.

\* Explanation for B and C:

\* The phrase "legacy route advertisement" is not formalized in BGP documentation or Fortinet's admin guide; the output uses standard BGP mechanics.

\* If a route was redistributed into BGP from another routing protocol, the Path field would display a "?" (question mark) for incomplete (redistributed) origin. Here the /24 route has "i" so it is NOT a redistribution.

FortiOS Administration Guide: BGP Configuration and Route Table Interpretation Official BGP Command Reference: Show BGP Network, Path Codes, Route Origination Indicators

#### NEW QUESTION # 111

Refer to the exhibit, which shows the output of a BGP debug command.

```
# get router info bgp summary
VRF 0 BGP router identifier 0.0.0.117, local AS number 65060
BGP table version is 3
3 BGP AS-PATH entries
0 BGP community entries

Neighbor      V      AS MsgRcvd MsgSent  TblVer  InQ  OutQ  Up/Down  State/PfxRcd
10.125.0.60   4      65060  1698    1756    103   0     0 03:02:49  1
10.127.0.75   4      65075  2204    2250    102   0     0 02:45:55  1
100.64.3.1    4      65501  100     115     0     0     0 never     Active

Total number of neighbors 3
```

What can you conclude about the router in this scenario?

- A. All of the neighbors displayed are part of a single BGP configuration on the local router with the neighbor-range set to a value of 4.
- B. The router 100.64.3.1 needs to update the local AS number in its BGP configuration in order to bring up the BGP session with the local router.
- C. An inbound route-map on local router is blocking the prefixes from neighbor 100.64.3.1.
- D. The BGP session with peer 10.127.0.75 is up.

**Answer: D**

#### NEW QUESTION # 112

Exhibit.

```

NGFW-1 # get sys ha status
HA Health Status: OK
Model: FortiGate-VM64
Mode: HA A-P
Group: 0
Debug: 0
Cluster Uptime: 0 days 0:1:25
Cluster state change time: 2023-04-18 12:07:47
Primary selected using:
<2023/04/18 12:07:47> FGVM010000077649 is selected as the primary because its override priority is larger than peer member
FGVM010000077650.
ses_pickup: disable
override: disable
Configuration Status:
  FGVM010000077649(updated 4 seconds ago): in-sync
  FGVM010000077650(updated 1 seconds ago): out-of-sync
System Usage stats:
  FGVM010000077649(updated 4 seconds ago):
    sessions=166, average-cpu-user/nice/system/idle=1%/0%/0%/99%, memory=45%
  FGVM010000077650(updated 1 seconds ago):
    sessions=3, average-cpu-user/nice/system/idle=0%/0%/0%/100%, memory=44%
HBDEV stats:
  FGVM010000077649(updated 4 seconds ago):
    port7: physical/1000auto, up, rx-bytes/packets/dropped/errors=167663/567/0/0, tx=262623/656/0/0
  FGVM010000077650(updated 1 seconds ago):
    port7: physical/1000auto, up, rx-bytes/packets/dropped/errors=271373/680/0/0, tx=176013/592/0/0
Primary   : NGFW-1           , FGVM010000077649, HA cluster index = 1
Secondary : NGFW-2           , FGVM010000077650, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM010000077649, HA operating index = 0
Secondary: FGVM010000077650, HA operating index = 1

```

Refer to the exhibit, which shows the output of get system ha status.

NGFW-1 and NGFW-2 have been up for a week.

Which two statements about the output are true? (Choose two.)

- A. If port 7 becomes disconnected on the secondary, both FortiGate devices will elect itself as primary.
- B. If a configuration change is made to the primary FortiGate at this time, the secondary will initiate a synchronization reset.
- C. If FGVM...649 is rebooted. FGVM...650 will become the primary and retain that role, even after FGVM...649 rejoins the cluster.
- D. If no action is taken, the primary FortiGate will leave the cluster because of the current sync status.

**Answer: A,C**

Explanation:

\* FortiGate HA Troubleshooting and Synchronization Guides

\* Fortinet Admin Guide: HA Primary Role Retention, Cluster Break-up Due to Out-of-Sync Status

### NEW QUESTION # 113

What are two reasons you might see iprobe\_in\_check() check failed, drop when using the debug flow? (Choose two.)

- A. Packet was dropped because of policy route misconfiguration.
- B. Trusted host list misconfiguration.
- C. Packet was dropped because of traffic shaping.
- D. VIP or IP pool misconfiguration.

**Answer: A,B**

### NEW QUESTION # 114

.....

We have always believed that every user has its own uniqueness. In order to let you have a suitable way of learning. The staff of FCSS\_NST\_SE-7.6 study materials also produced three versions of the system: the PDF, Software and APP online. Although the content is the same in all the three versions of our FCSS\_NST\_SE-7.6 Exam Questions, the displays are totally different. And you will find that in our FCSS\_NST\_SE-7.6 practice engine, the content and versions as well as plans are the best for you.

**FCSS\_NST\_SE-7.6 Free Exam:** [https://www.pass4test.com/FCSS\\_NST\\_SE-7.6.html](https://www.pass4test.com/FCSS_NST_SE-7.6.html)

Fortinet Top FCSS\_NST\_SE-7.6 Questions Submit a ticket here, We will inform you at the first time once the FCSS\_NST\_SE-7.6 exam software updates, and if you can't fail the FCSS\_NST\_SE-7.6 exam we will full refund to you and we are responsible for

your loss, We will provide the after-sale service for twenty four hours a day & seven days a week in order to contact with our customers of FCSS\_NST\_SE-7.6 test simulate materials from different countries, You will get high passing score in test with the help of FCSS\_NST\_SE-7.6 updated pdf dumps.

Our company happened to be designing the FCSS\_NST\_SE-7.6 exam question, Understand how to resolve Unified Presence issues with built-in tools and diagnostic utilities.
