Google-Workspace-Administrator Latest Material | Latest Google-Workspace-Administrator Exam Labs

There are free demos giving you basic framework of Google-Workspace-Administrator practice materials. All are orderly arranged in our practice materials. After all high-quality demos rest with high quality Google-Workspace-Administrator practice materials, you can feel relieved with help from then. We offer free demos as your experimental tryout before downloading our real Google-Workspace-Administrator practice materials. For more textual content about practicing exam questions, you can download our Google-Workspace-Administrator practice materials with reasonable prices and get your practice begin within 5 minutes.

Google-Workspace-Administrator certification is an important credential for IT professionals who are responsible for managing Google Workspace deployments. By earning this certification, candidates can demonstrate their expertise in deploying, configuring, and managing Google Workspace services, which can help them advance their careers and increase their value to their organization.

To become certified, candidates must pass the 2-hour exam, which consists of multiple-choice and scenario-based questions. Google-Workspace-Administrator Exam is administered online and can be taken from anywhere in the world. Upon passing, candidates will receive a digital badge and certificate, which they can use to showcase their expertise and credibility as a Google Workspace administrator. Google Cloud Certified - Professional Google Workspace Administrator certification is valuable for IT professionals who work with Google Workspace or who are interested in pursuing roles that require expertise in managing cloud-based productivity tools.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q66-Q71):

NEW QUESTION # 66
You work for a global organization that has offices in the United States and the European Union (EU). There is an organizational unit (OU) for employees in the United States and a separate OU for employees in the EU.
Your company regulations need you to ensure that your users data is located in the same region as their physical office. What should you do?

- A. Set a data region policy for each region's OU.
- B. Turn on advanced settings and select Enable features that may process data across multiple regions.
- C. Set the OU data location to No preference.
- D. Turn on advanced settings and select Disable features that may process data across multiple regions.

Answer: A

Explanation:
Google Workspace allows organizations to control the geographic location of their data for compliance and regulatory reasons, often referred to as "data regions" or "data locality." To ensure user data is located in the same region as their physical office, especially for compliance with regulations like those in the EU, you need to set a data region policy for the respective organizational units.
Here's why the other options are incorrect:
* A. Set the OU data location to No preference. "No preference" means Google can store the data wherever it deems appropriate, which goes against the requirement of ensuring data is located in a specific region (e.g., EU for EU users, US for US users).
* B. Turn on advanced settings and select Enable features that may process data across multiple regions. This option would allow data to be processed across multiple regions, which directly contradicts the company regulation that requires data to be located in the same region as their physical office.
* C. Turn on advanced settings and select Disable features that may process data across multiple regions. While this might seem related to controlling data flow, the primary mechanism for specifying data residency for OUs is through data region policies, not simply disabling cross-region processing features. Disabling such features might limit functionality without directly setting the data storage region.
References from Google Workspace Administrator:
* Choose a data region for your data: Google Workspace provides options for administrators to choose a data region for covered Google Workspace services, which applies to primary customer data at rest.
This can be set at the organizational unit (OU) level.
Reference: Google Workspace Admin Help: Choose a data region for your data Data regions FAQ: This resource provides more details on what data is covered, how data regions work, and the implications of setting them. It emphasizes that you can set the data region at the OU level.

NEW QUESTION # 67
You work for a small organization and are planning to deploy an upcoming Google Workspace feature. You want users to have access to the feature as soon as possible. What should you do?

- A. Do nothing. No extra configuration is needed as all Workspace customers receive new features at the same time.
- B. Confirm that your organization is set to the rapid release option to ensure that your users receive new features when Google releases them.
- C. Confirm that your organization is set to the scheduled release option to ensure that your users receive new features when Google releases them.
- D. Enable the new feature in a Workspace Sandbox organization, and roll out to users only after testing.

Answer: B

Explanation:

NEW QUESTION # 68
Your client is a 5,000-employee company with a high turn-over rate that requires them to add and suspend user accounts. When new employees are onboarded, a user object is created in Active Directory. They have determined that manually creating the users in Google Workspace Admin Panel is time-consuming and prone to error. You need to work with the client to identify a method of creating new users that will reduce time and error.
What should you do?

- A. Install Google Workspace Sync for Microsoft Outlook on all employees' computers.
- B. Install Google Cloud Directory Sync on all Domain Controllers.
- C. Install Google Apps Manager to automate add-user scripts.
- D. Install Google Cloud Directory Sync on a supported server.

Answer: D

Explanation:
* Prepare Environment: Ensure you have a supported server to install Google Cloud Directory Sync (GCDS).
* Download GCDS:
* Download Google Cloud Directory Sync from the Google Workspace Downloads page.
* Install GCDS:
* Follow the installation instructions provided by Google to install GCDS on the server.
* Configuration:
* Configure GCDS to synchronize user data from Active Directory to Google Workspace.
* Set up synchronization rules and schedules to ensure that user data is kept up to date automatically.
* Testing and Deployment:
* Test the synchronization to ensure that new user accounts are created accurately in Google Workspace.
* Deploy GCDS in the production environment after successful testing.

NEW QUESTION # 69
Your company uses a whitelisting approach to manage third-party apps and add-ons. The Senior VP of Sales
& Marketing has urgently requested access to a new Marketplace app that has not previously been vetted. The company's
Information Security policy empowers you, as a Google Workspace admin, to grant provisional access immediately if all of the
following conditions are met:
Access to the app is restricted to specific individuals by request only.
The app does not have the ability to read or manage emails.
Immediate notice is given to the Infosec team, followed by the submission of a security risk analysis report within 14 days.
Which actions should you take first to ensure that you are compliant with Infosec policy?

- A. Confirm that the Senior VP's OU has the following Gmail setting disabled before whitelisting the app: "Let users delegate access to their mailbox."
- B. Search the Google Workspace support forum for feedback about the app to include in the risk analysis report.
- C. Add the Marketplace app, then review the authorized scopes in Security > Manage API client access.
- D. Move the Senior VP to a sub-OU before enabling Marketplace Settings > "Allow Users to Install Any App from Google Workspace Marketplace."

Answer: C

NEW QUESTION # 70
Your organization is increasingly concerned about its environmental impact. You want to assess the environmental impact of using
Google Workspace services. Which report should you use?

- A. Apps Monthly Uptime report
- B. Accounts report
- C. Carbon footprint report
- D. Google Environmental Report

Answer: C

Explanation:
To assess the environmental impact of using Google Workspace services, you should refer to the Google Environmental Report.
Google publishes comprehensive reports detailing its environmental efforts, including the energy efficiency of its data centers, its use

of renewable energy, and its overall carbon footprint, which includes the impact of services like Google Workspace.

Here's why option B is the correct choice and why the others are not relevant to assessing the overall environmental impact of using Google Workspace:

B). Google Environmental Report

Google regularly publishes detailed environmental reports that cover various aspects of its sustainability initiatives, including its progress towards using renewable energy, its efforts to improve energy efficiency in its operations (which power Google Workspace), and its overall carbon footprint. These reports provide insights into the environmental impact associated with using Google services.

Associate Google Workspace Administrator topics guides or documents reference: While there might not be a specific "Google Workspace Environmental Impact Report" as a standalone document within the Admin console, Google's overarching "Environmental Report" (often found on Google's sustainability or environmental responsibility websites) encompasses the infrastructure and practices that support all Google services, including Google Workspace. Administrators looking for this information would be directed to these publicly available Google reports.

A). Carbon footprint report

While the concept of a "carbon footprint report" is relevant to environmental impact, Google typically includes this information within its broader "Environmental Report" rather than providing a separate report specifically for Google Workspace usage within an organization's Admin console. You would likely find data related to the carbon efficiency of Google's infrastructure in their main environmental disclosures.

Associate Google Workspace Administrator topics guides or documents reference: Google's communication about its carbon footprint and environmental efforts is usually consolidated in their public sustainability reports.

C). Apps Monthly Uptime report

The Apps Monthly Uptime report provides information about the reliability and availability of Google Workspace services. It focuses on service performance and uptime metrics, not on environmental impact or sustainability.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on service-level agreements (SLAs) and service status provides information about uptime guarantees and how to monitor service availability, which is the focus of the Apps Monthly Uptime report.

D). Accounts report

The Accounts report in the Google Admin console provides details about user accounts within your organization, such as the number of active users, account status, and other user-related information. It does not contain any data or analysis related to the environmental impact of using Google Workspace services.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on reporting and user accounts describes the information available in the Accounts report, which is focused on user management and activity metrics.

Therefore, to assess the environmental impact of using Google Workspace services, your organization should refer to the publicly available Google Environmental Report, which details Google's sustainability efforts and overall environmental performance.

NEW QUESTION # 71

......

The Google Cloud Certified - Professional Google Workspace Administrator (Google-Workspace-Administrator) examination is necessary for career advancement, therefore, doing your best to prepare for the Google Cloud Certified - Professional Google Workspace Administrator (Google-Workspace-Administrator) certification exam is essential.
