After the advent of the ValidTorrent's latest Cisco certification 300-620 exam practice questions and answers, passing Cisco certification 300-620 exam is no longer a dream of the IT staff. All of ValidTorrent's practice questions and answers about Cisco Certification 300-620 Exam have high quality and 95% similarity with the real exam questions. ValidTorrent is worthful to choose. If you choose ValidTorrent's products, you will be well prepared for Cisco certification 300-620 exam and then successfully pass the exam.

Cisco 300-620 Exam is a highly regarded certification in the IT industry. Implementing Cisco Application Centric Infrastructure certification validates a candidate's ability to implement and configure Cisco ACI technology in a data center environment. Implementing Cisco Application Centric Infrastructure certification is highly valued by IT professionals, employers, and organizations looking to implement ACI technology in their data centers. Implementing Cisco Application Centric Infrastructure certification is an excellent opportunity for IT professionals to enhance their knowledge and skills to further excel in their careers.

Cisco 300-620 exam is a challenging certification exam that tests the skills and knowledge of IT professionals in implementing Cisco ACI solutions. It is a valuable credential for IT professionals who work in data center environments and want to demonstrate their expertise in Cisco's latest data center networking technologies. With the growing demand for ACI solutions in the industry, the ACI Implementation certification is a great way to enhance your career prospects and stay ahead of the competition.

Associated Certification

Exam 300-620 DCACI: Implementing Cisco Application Centric Infrastructure serves dual purposes. First, it functions as a viable concentration test for the CCNP Data Center certification. This is a professional-level accreditation demonstrating exceptional expertise in fabricating crucial data center solutions. The complete path to it also involves taking 350-601 exam that is dedicated to core concepts of the field.

Secondly, taking up this exam enables the candidate to earn the Cisco Certified Specialist – Data Center ACI Implementation certificate. It showcases intermediate expertise over Cisco Switches. In both cases, steadfast career growth and obtaining adequate opportunities is a sure thing.

100% Pass Quiz 2026 Cisco Updated Pass4sure 300-620 Pass Guide

Our Desktop version is an application software that runs without an internet connection. It helps you to test yourself by giving the Implementing Cisco Application Centric Infrastructure (300-620) practice test. Our desktop version also keeps a record of your previous performance and it shows the improvement in your next 300-620 Practice Exam. With the help of ValidTorrent Implementing Cisco Application Centric Infrastructure (300-620) exam questions, you will be able to pass the Cisco 300-620 certification exam with ease. When you invest in our product it will surely benefit your Implementing Cisco Application Centric Infrastructure (300-620) exam dumps.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q284-Q289):

NEW QUESTION # 284

Which statements are correct regarding ACI support for BFD? (Choose two.)

- A. BFD is supported on L3Out loopback interfaces.
- B. BFD is supported on routed interfaces, routed subinterfaces, and SVIs.
- C. BFD is supported for BGP prefix peers (dynamic neighbors).
- D. BFD is supported for EIGRP, OSPF, and BGP in ACI.

Answer: B,D

NEW QUESTION # 285

What must be enabled in the bridge domain to have the endpoint table learn the IP addresses of endpoints?

- A. unicast routing
- B. subnet scope
- C. L2 unknown unicast: flood
- D. GARP based detection

Answer: A

Explanation:

Section: ACI Packet Forwarding

Explanation/Reference: <https://hsvglobalschool.in/dhkycw/cisco-aci-bridge-domain.html>

NEW QUESTION # 286

Refer to the exhibit.

Refer to the exhibit. An engineer configures communication between the EPGs in different tenants. Which action should be taken to create the subnet?

- A. Add the L3Out for Route Profile value.
- B. Leave Scope set to Private to VRF.
- C. Change Scope to Shared between VRFs.
- D. Change Scope to Advertised Externally.

Answer: C

Explanation:

To configure communication between the EPGs in different tenants, the subnet scope should be set to "Shared between VRFs". This allows the subnet to be shared across different VRFs, enabling communication between EPGs that are in different tenants but within the same VRF. By marking the subnet as shared, it becomes visible to other VRFs, which is necessary for inter-tenant communication.

NEW QUESTION # 287

An organization deploys active-active data centers and active-standby firewalls in each data center. Which action should be taken in a Cisco ACI Multi-Pod to maintain traffic symmetry through the firewalls?

- A. Disable Resilient Hashing.
- B. Disable service node Health Tracking.
- C. Enable Pod ID Aware Redirection.
- D. Enable Endpoint Dataplane Learning.

Answer: C

In a Cisco ACI Multi-Pod environment with active-active data centers and active-standby firewalls in each data center, enabling Pod ID Aware Redirection is the action that should be taken to maintain traffic symmetry through the firewalls. This feature ensures that traffic is consistently directed through the active firewall based on the pod identifier, thus maintaining the desired traffic flow and symmetry².

Cisco ACI Multi-Pod and Service Node Integration White Paper

What do Pods use to allow Pod-to-Pod communication in a Cisco ACI Multi-Pod environment?

- [illegible]
