Valid Test AWS-Advanced-Networking-Specialty Tips | AWS-Advanced-Networking-Specialty Reliable Test Dumps

All our regular candidates have impulse to choose again when they have the similar AWS-Advanced-Networking-Specialty exam. So they totally trust us. All exams are not insuperable obstacle anymore with our AWS-Advanced-Networking-Specialty training materials. Our credibility is unquestionable. In the course of obtaining success, we need a number of helps, either external or internal, but to the exam, the quality of AWS-Advanced-Networking-Specialty practice materials are of great importance. So our AWS-Advanced-Networking-Specialty learning dumps are acclaimed as masterpieces.

Amazon ANS-C00 is an advanced-level certification exam offered by Amazon Web Services (AWS) for networking professionals. The AWS Certified Advanced Networking Specialty (ANS-C00) exam is designed to validate the skills and knowledge required to design and implement advanced networking solutions using AWS technologies. AWS Certified Advanced Networking Specialty (ANS-C00) Exam certification is ideal for individuals who have experience in networking and want to demonstrate their expertise in AWS networking.

The ANS-C00 exam tests the candidate's ability to design, implement, and troubleshoot complex networking solutions using AWS services. AWS-Advanced-Networking-Specialty Exam covers topics such as network architecture, design and implementation of hybrid IT networks, AWS services for networking, and network security. AWS-Advanced-Networking-Specialty exam also includes questions related to monitoring and optimization of network performance.

Amazon AWS Certified Advanced Networking Specialty (ANS-C00) Exam

Sample Questions (Q47-Q52):

NEW QUESTION # 47

An organization runs a consumer-facing website on AWS. The Amazon EC2-based web fleet is load balanced using the AWS Application Load Balancer, Amazon Route 53 is used to provide the public DNS services.

The following URLs need to server content to end users:

test.example.com

web.example.com

example.com

Based on this information, what combination of services must be used to meet the requirement? (Select two.)

- A. Path condition in ALB listener to route example.com to appropriate target groups.
- B. Host condition in ALB listener to route \$\$\$\$example.com to appropriate target groups.
- C. Host condition a ALB listener to route example.com to appropriate target groups.
- D. Path condition in ALB listener to route *.example.com to appropriate target groups.
- E. Host condition in ALB listener to route *.example.com to appropriate target groups.

Answer: C,E

Explanation:

Explanation

NEW QUESTION # 48

Your VPC has a DX connection that is advertising 99 routes. You have two more prefixes to add:

10.223.1.0/24 and 10.223.2.0/24. You have several locations, so you need to be as exact as possible with your routing. How would you do this? Choose the correct answer:

- A. Summarize the routes into a 10.223.0.0/12 and advertise that route instead.
- B. Summarize the routes into a 10.223.0.0/22 and advertise that route instead.
- C. Add the prefixes; AWS allows for as many BGP routes as you need but not static.
- D. Contact AWS to extend the number of prefixes you are allowed to advertise. .

Answer: B

Explanation:

BGP has a strict 100 prefix limit. 10.223.0.0/12 includes both routes but is not very specific.

10.223.0.0/22 is the proper summarization of both routes.

NEW QUESTION # 49

A company has an AWS Direct Connect connection between its on-premises data center and Amazon VPC. An application running on an Amazon EC2 instance in the VPC needs to access confidential data stored in the on-premises data center with consistent performance. For compliance purposes, data encryption is required.

What should the network engineer do to meet these requirements?

- A. Configure a private virtual interface on the Direct Connect connection.
Set up an AWS Site-to-Site VPN between the customer gateway and the virtual private gateway in the VPC.
- B. Configure a public virtual interface on the Direct Connect connection.
Set up an AWS Site-to-Site VPN between the customer gateway and the virtual private gateway in the VPC.
- C. Configure an internet gateway in the VPC.
Set up a software VPN between the customer gateway and an EC2 instance in the VPC.
- D. Configure an internet gateway in the VPC.
Set up an AWS Site-to-Site VPN between the customer gateway and the virtual private gateway in the VPC.

Answer: B

NEW QUESTION # 50

Your organization's corporate website must be available on `www.acme.com` and `acme.com`. How should you configure Amazon Route 53 to meet this requirement?

- A. Configure `acme.com` with an A record targeting the ELB. `www.acme.com` with a CNAME record targeting the `acme.com` record.
- **B. Configure `acme.com` using a second ALIAS record with the ELB target. `www.acme.com` using a PTR record with the `acme.com` record target.**
- C. Configure `acme.com` with a CNAME record targeting the ELB. `www.acme.com` with a CNAME record targeting the `acme.com` record.
- D. Configure `acme.com` with an ALIAS record targeting the ELB. `www.acme.com` with an ALIAS record targeting the ELB.

Answer: B

Explanation:

NEW QUESTION # 51

Your company maintains an Amazon Route 53 private hosted zone. DNS resolution is restricted to a single, pre-existing VPC. For a new application deployment, you create an additional VPC in the same AWS account.

Both this new VPC and your on-premises DNS infrastructure must resolve records in the existing private hosted zone.

Which two activities are required to enable DNS resolution both within the new VPC and from the on-premises infrastructure? (Select two.)

- A. Update the on-premises DNS to include forwarders to the Route 53 nameserver IP addresses.
- **B. Update the Route 53 private hosted zone's VPC associations to include the new VPC.**
- C. Launch Amazon EC2-based DNS proxies in the new VPC. Specify the proxies as forwarders in the on-premises DNS.
- **D. Update the DHCP options set for the new VPC with the Route 53 nameserver IP addresses.**
- E. Launch Amazon EC2-based DNS proxies in the new VPC. Specify the proxies in the DHCP options set.

Answer: B,D

NEW QUESTION # 52

.....

As an IT field top company Amazon certifications are verified as senior products expert standards. Amazon field reputation and products market share improve certification engine's high gold content. AWS-Advanced-Networking-Specialty latest vce exam simulator can help you pass exam and get certification so that you can obtain senior position soon. Senior engineers with professional certification have 60% opportunities and 30% salary or so more than normal engineers.
