CISI UAE Financial Rules and Regulations Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

If the perpetrator of a money laundering crime is a repeat offender, what impact does this have on the minimum fine compared to a first offence?

- A. It is tripled
- B. It is quadrupled
- C. It is doubled
- D. It is increased by 50%

Answer: C

Explanation:

Under Federal Law No. 20 of 2018 and CISI UAE Financial Rules and Regulations, if a person convicted of a money laundering offence is a repeat offender, the minimum fine imposed is doubled compared to the first offence. This increased penalty reflects the heightened regulatory and punitive response to repeated non-compliance, emphasizing deterrence and the protection of the financial system. Repeat offenders face more severe consequences to underscore the seriousness of continued illegal activity and to promote adherence to AML laws.

NEW QUESTION # 71

Which category of firm is required to provide accounts using a 'Unified Centralised Back Office System'?

- A. Category 4 - Credit rating agencies
- B. Category 2 - Dealing in investments
- C. Category 1 - Dealing in securities
- D. Category 3 - Custody, clearing and recording

Answer: D

Explanation:

Firms engaged in custody, clearing, and recording activities are required by UAE financial regulations to use a 'Unified Centralised Back Office System' to maintain and manage their accounts. This requirement is outlined in the CISI UAE Financial Rules and Regulations under Category 3 firms, which include those involved in custodial services, clearing, and recording of transactions. The centralized system ensures that these firms can manage large volumes of transaction data securely and efficiently while adhering to regulatory standards for reporting and transparency. It is designed to streamline operational processes and reduce risks related to errors, fraud, or data mismanagement.

- C. 50%
- D. 60%

Answer: B

Explanation:

According to CISI UAE Financial Rules and Regulations, brokerage companies must use 70% of the market value of securities they own to increase the value of their guarantee. This guarantee acts as a financial safeguard to ensure the firm's stability and protect

clients and counterparties against default risk. The 70% proportion strikes a balance between maximizing the leverage of owned securities and maintaining prudent risk management. It reflects the regulatory emphasis on requiring sufficient collateral and guarantees to support brokerage operations, maintaining market confidence and financial soundness within the UAE capital markets. These substantial fines underscore the UAE's commitment to stringent AML/CTF enforcement and deterrence. - B. is able to suspend operations in an emergency
- **C. has access to sufficient resources**
- D. can report confidentially to the regulator

Answer: C
