

HPE7-A03 Valid Exam Camp | Valid Exam HPE7-A03 Registration

The HPE7-A03 mock exam setup can be configured to a particular style and arrive at unique questions. Exams-boost HPE7-A03 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. Our HP HPE7-A03 Practice Test software is suitable for computer users with a Windows operating system. Exams-boost HP HPE7-A03 practice exam support team cooperates with users to tie up any issues with the correct equipment.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Topic 2	<ul style="list-style-type: none">Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 3	<ul style="list-style-type: none">Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.
Topic 4	<ul style="list-style-type: none">Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.

HP Aruba Certified Campus Access Architect Exam evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for HP HPE7-A03 exam questions for three months after the purchase to ensure you are studying the most recent solutions. Furthermore, Exams-boost is a very responsible and trustworthy platform dedicated to certifying you as a specialist. We provide a free sample before purchasing HP HPE7-A03 valid questions so that you may try and be happy with its varied quality features. Learn for your HP with confidence by utilizing the Exams-boost HPE7-A03 study guide, which is always forward-thinking, convenient, current, and dependable.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

You are going with a 3-tier design and need to calculate the oversubscription ratio on the Access, Distribution, Core, and ToR Layer. What is a suitable oversubscription ratio for each layer?

Answer:

Explanation:

Explanation:

Access - 20:1 Aggregation - 4:1 Core - 2:1

ToR - Not typically applicable in a 3-tier design; however, if ToR were used, it could be 24:1 or better depending on the specific design and requirements.

NEW QUESTION # 22

Which alternative source is best suited for site surveys or simulations if no floor plans are available?

- A. Google Maps
- **B. fire escape plan**
- C. simple wall drawings
- D. blank sheet of paper

Answer: B

Explanation:

When floor plans are not available for site surveys or simulations, the best alternative source to use is the fire escape plan (Option D). Fire escape plans are typically available in most buildings and provide a simplified layout of the premises, including walls, doors, and sometimes the location of permanent fixtures. While not as detailed as architectural floor plans, fire escape plans can offer enough information for initial site survey estimations and RF planning. They allow network designers to understand the basic layout and potential RF obstacles or coverage areas, making them a practical tool for preliminary wireless network planning and simulations in the absence of more detailed floor plans.

NEW QUESTION # 23

A global furniture retail company called 'No-Stair Inc.' requests you design their new WLAN infrastructure for a global footprint. Each location of 'No-Stair Inc.' has a similar layout: three small manager offices, a warehouse, and a 'retail' area. The 'retail' area and the warehouse together amount to 95% of the location. The IT department of the company is minimally engaged in their LAN refresh so the CTO of the company has shared the information below.

Current WLAN Infrastructure is based on the 802.11n "WIFI4Less" access-points series (both model 2013-INT (2.4 only internal antenna) and model 2019-EXT (dual-band external antenna only)). These AP models are standalone without any centralized management. Last year 'No-Stair Inc.' ran a project called 'secure-it' ensuring that all needed network security was implemented to be fully compliant with their security standards. During this project, they also upgraded the AAA.

Infrastructure to handle the increased AAA requests. No additional Wi-Fi or security requirements are listed for this WLAN refresh, which means that 'No-Stair Inc.' will continue to use bridged SSIDs, with local breakout into different VLANs.

The CTO of 'No-Stair Inc.' understands the need for you to ask additional questions to deliver the design. The questions may be sent in written form and will be answered within two weeks.

What is a possible constraint?

- A. Does the existing WAN infrastructure support an upgraded Wi-Fi Network?
- B. Does the existing wired network support enough drops for an upgraded Wi-Fi Network?
- C. Does the existing AAA infrastructure support an upgraded Wi-Fi Network?

- **D. Does the existing core switch support an upgraded Wi-Fi Network?**

Answer: D

Explanation:

Because the design will continue to use bridged SSIDs with local VLAN breakout, all wireless traffic depends on the existing LAN/core, so whether the existing core switch can support the upgraded Wi-Fi network is a key infrastructure limitation and thus a valid constraint.

NEW QUESTION # 24

You are presenting your network design solution to your customer. What is important to include in your presentation?

- A. your rollback plan
- B. protocols that will be used to make your solution work
- **C. tangible and intangible returns for the customer**
- D. your experience with this kind of project

Answer: C

Explanation:

When presenting a network design solution to a customer, it is crucial to focus on the benefits that the solution will bring to their business. This includes both tangible returns, such as cost savings, increased efficiency, and improved performance, and intangible returns, such as enhanced security, scalability, and user satisfaction.

Highlighting how the solution addresses the customer's specific needs and challenges, and how it aligns with their business objectives, helps in demonstrating the value of the solution and facilitates decision-making.

Including tangible and intangible returns in the presentation makes it more compelling and relevant to the customer's business goals, thereby increasing the likelihood of the proposal's acceptance.

NEW QUESTION # 25

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands. Their US-based headquarters HQ1 was refreshed last year based on the HPE Aruba Networking ESP architecture. You have created the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x 8360-16Y2C in VSX (ISL 2x100GbE DAC)

Access Stack: 10 x Stack of 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links) (2 x 10GbE uplink per stack) During the presentation of your design to the CTO of 'Don't Buy at Us' you were informed about the updated fiber infrastructure that Don't Buy at Us' has installed in HQ2.

The core stack is installed in the MDF and per IDF there is one access stack installed. Based on best practice, what is the most cost-effective update to the switch BOM?

- **A.**
- B.
- C.
- D.

Answer: A

Explanation:

This option uses the Aruba 6200F access switches, which are appropriate for a cost-effective solution while meeting the uplink requirements. The selection of optics (SR for shorter distances and LR for longer distances) is based on the fiber infrastructure provided, ensuring efficient connectivity across the MDF and IDFs.

NEW QUESTION # 26

.....

Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the

paper, because they think that studying on the computer too much does harm to their eyes. HPE7-A03 test questions have the function of supporting printing in order to meet the need of customers. A good deal of researches has been made to figure out how to help different kinds of candidates to get Aruba Certified Campus Access Architect Exam certification. We revise and update the HPE7-A03 Test Torrent according to the changes of the syllabus and the latest developments in theory and practice.
