We have free update for one year, that is to say, you can get free update version for 365 days after purchasing. In addition, we will pass guarantee and money back guarantee.

The SAFe 5 Practitioner certification exam is a challenging one, and individuals are required to demonstrate their knowledge and expertise in agile practices using the SAFe framework. SAFe-Practitioner exam comprises multiple-choice questions that test an individual's understanding of SAFe methodologies and their ability to apply them to real-world scenarios. SAFe-Practitioner exam is designed to assess an individual's ability to implement SAFe practices in a team or organization and their ability to lead and facilitate agile teams.

To prepare for the exam, you will need to study the SAFe methodology in depth and familiarize yourself with its key concepts and principles. You can do this by taking a SAFe training course, reading SAFe literature, and practicing SAFe principles in your own projects. It is also recommended that you take practice exams and participate in study groups to reinforce your knowledge and boost your confidence.

The Scrum SAFe-Practitioner Exam evaluates the candidate's ability to apply the principles of SAFe in real-world scenarios, including the ability to understand and implement Agile Release Trains (ARTs), coordinate and execute Agile programs, and facilitate the Agile ceremonies. Additionally, the exam assesses the candidate's knowledge of Lean-Agile principles and practices, Agile Product Development, and Agile DevOps practices. Passing the SAFe 5 Practitioner (SP) certification exam demonstrates that the candidate has acquired the necessary skills and knowledge to lead and manage Agile transformation in large enterprises and implement Agile methodologies effectively.

In such a way, you will get a leisure study experience as well as a doomed success on your coming SAFe-Practitioner Exam.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q154-Q159):

NEW QUESTION # 154

Team A is a maintenance team that cannot always predictably plan their work. They like to meet daily to review the needs of the

system and plan for how they can quickly address those needs during the workday.

Which of the following SAFe Lean-Agile methods should Team A use to plan and execute their work?

- A. SAFe XP Team
- B. SAFe Platform Team
- C. SAFe Enabling Team
- **D. SAFe Team Kanban**

Answer: D

Explanation:

SAFe Team Kanban is a method that enables teams to manage their flow of work using a visual board and a set of policies. It is especially suitable for teams that have unpredictable or interrupt-driven work, such as maintenance, support, or operations teams¹. SAFe Team Kanban helps teams to visualize their work, limit their work in progress (WIP), measure and improve their flow, and implement feedback loops². Team A is a maintenance team that cannot always predictably plan their work. They like to meet daily to review the needs of the system and plan for how they can quickly address those needs during the workday. Therefore, SAFe Team Kanban is the most appropriate SAFe Lean-Agile method for Team A to plan and execute their work. References: Team Kanban - Scaled Agile Framework, SAFe Lean-Agile Principles - Scaled Agile Framework SAFe Team Kanban is a method that helps teams facilitate the flow of value by visualizing workflow, establishing Work In Process (WIP) limits, measuring throughput, and continuously improving their process¹. It is suitable for teams that have a rapid and uneven arrival of work and fast-changing priorities, such as maintenance teams². The other options are not appropriate for Team A's context. SAFe Platform Team is organized around developing and supporting platforms that provide services to other teams³. SAFe Enabling Team is organized to assist other groups with specialized capabilities and help them become proficient in new technologies⁴. SAFe XP Team is an Agile Team method that combines the power of Scrum with Extreme Programming (XP) practices and operates within the ART iteration cadence⁵.

NEW QUESTION # 155

What is used to brainstorm potential Portfolio future states?

- **A. SWOT and TOWS**
- B. Epics and Enablers
- C. Enterprise business drivers
- D. KPIs and Lean budget Guardrails

Answer: A

Explanation:

The portfolio's Strategic Themes and SWOT and TOWS analysis are critical inputs to exploring alternatives for the future state. LPM uses the current state portfolio canvas as a starting point to explore the different ways in which the portfolio could evolve in alignment with the strategic themes. SWOT stands for Strengths, Weaknesses, Opportunities, and Threats, and TOWS stands for Threats, Opportunities, Weaknesses, and Strengths. These are tools for identifying and analyzing the internal and external factors that affect the portfolio. SWOT and TOWS help LPM to brainstorm potential portfolio future states and prioritize the most promising ones. NEW QUESTION # 156

Which SAFe Lean-Agile Principle includes an emphasis on "deliver early and often"?

- A. Take an economic view
- B. Make value flow without interruptions
- **C. Build incrementally with fast, integrated learning cycles**
- D. Organize around value

Answer: C

Explanation:

Building incrementally with fast, integrated learning cycles is one of the ten SAFe Lean-Agile Principles. It means that the enterprise delivers value in small batches of work, frequently and reliably, to provide fast feedback and foster innovation. By building incrementally, the enterprise can reduce risk, complexity, and uncertainty, and validate assumptions before committing to large investments. By integrating frequently, the enterprise can ensure quality, collaboration, and alignment across the value stream. By

creating learning cycles, the enterprise can test hypotheses, measure outcomes, and pivot as needed to achieve the desired results¹.

NEW QUESTION # 157

What does the I in the INVEST mnemonic for good user stories stand for?

- A. Interesting
- **B. Independent**
- C. Immutable
- D. Implementable

Answer: B

NEW QUESTION # 158

Who has content authority to make decisions at the User Story level during PI Planning?

- **A. Product Owner**
- B. Release Train Engineer
- C. Scrum Master/Team Coach
- D. Agile Team

Answer: A

Explanation:

The Product Owner (PO) is the Agile team member primarily responsible for maximizing the value delivered by the team by ensuring that the team backlog is aligned with customer and stakeholder needs¹. The PO has content authority to make decisions at the User Story level during PI Planning, as they are the team's primary customer advocate and primary link to business and technology strategy¹. The PO also works with Product Management and other stakeholders to define the features and enablers that are part of the Program Backlog². During PI Planning, the PO presents the team backlog, reviews and revises the draft plan, and defines and communicates the team PI objectives². References: Product Owner, PI Planning

NEW QUESTION # 159

.....
