PRINCE2 인증 PRINCE2-Practitioner 덤프 공부 가이드로 시험준비공부를 하시면 시험패스가 쉬워집니다. 공부하는 시간도 적어지고 다른 공부자료에 투자하는 돈도 줄어듭니다. PassTIP의 PRINCE2 인증 PRINCE2-Practitioner 덤프는 PRINCE2 인증 PRINCE2-Practitioner 시험패스의 특효약입니다.

최신 PRINCE2 Certification PRINCE2-Practitioner 무료 샘플문제 (Q173-Q178):

질문 # 173

Project Scenario - Health and Safety Training Project:

ABC Company is a well-established training company that uses a standard model to develop training materials and deliver courses to customers.

ABC Company has commissioned a project in response to recent changes in government legislation relating to health and safety on construction sites. The project will deliver "capability to provide health and safety training", including the materials needed for classroom-based training and e-learning. The expected benefits for construction companies include a reduction in lost days and legal costs due to accidents.

The e-learning course will be developed by a specialist external consultancy. The materials for classroom-based training will be delivered by ABC Company's development team. All course materials will be piloted before they are used. ABC Company will deliver training to its customers and also hopes to sell the course materials to other training companies as part of their operational business. ABC Company will use their own sales and marketing departments to promote the courses.

The legislation requires construction companies to comply with the new legislation within two years. The course materials and trainers have to be accredited by a government agency before courses can be delivered. ABC Company is planning to deliver pilot courses within five months of starting the project.

The ABC Company standard development model for new courses recommends the following stages:

□ End of the Project scenario.

Additional Information:

The Chief Executive Officer (CEO) founded the company five years ago. Under her leadership, ABC Company has grown quickly into a successful training company. It delivers a range of accredited professional training.

The Finance Director is also a founder member of ABC Company and is responsible for authorizing budgets for the Operations and Development Teams. She authorizes all large contracts personally.

The Purchasing Manager reports to the Finance Director and is responsible for managing and monitoring supplier contracts.

The Operations Director is responsible for the delivery of all training and for the training development budget. His department organizes courses, venues and trainers. They work with the Product and the Sales teams to provide a comprehensive training schedule. ABC Company's IT manager reports to the Operations Director.

The Business Development Director has recently been appointed to identify new training needs and propose new products. She will work with the Operations Director to ensure a cost-conscious approach and that appropriate development technologies are used for the health and safety course.

The Training Development Manager reports to the Business Development Director and is responsible for developing training materials and gaining accreditation, in accordance with the standard course development model. Course developers in his team have skills in a range of development technologies and are allocated to projects as needed.

The Training Delivery Manager, who reports to the Operations Director, is responsible for ensuring that internal and external trainers deliver ABC Company training courses to the required standard. He also checks course materials to ensure they are fit for purpose and of the required quality.

The Central Services Director has responsibility for corporate communications, facilities management and configuration management. He recently led a project to consolidate all company quality systems into one quality management system and set up a corporate quality department, now managed by the Corporate Quality Manager.

The Corporate Document Manager reports to the Central Services Director. She helped establish the company's document management system and now operates it across the business. She manages a team of administrators and contracts staff when workload is high.

The Sales Director joined ABC Company two months ago and is keen to establish himself by suggesting new markets for the courses and material. All account managers and the marketing team report to him.

They promote existing training courses to other training companies and existing customers.

End of the additional information.

In order for ABC Company to achieve the expected sales of the health and safety training course, the senior user will need to ensure that all staff understand the objectives and target audience for the course.

In addition, these sales will need to be added to each individual's sales targets. These activities have been included in the benefits management approach.

Is this appropriate, and why?

- A. Yes, because how the benefits will be measured needs to be documented.
- B. No, because the expected sales increase should be recorded in the business case.
- C. No, because actions to deliver the outputs should be recorded in the stage plan.
- D. Yes, because the actions required to achieve the outcomes need to be documented.

정답: A

질문 # 174

Which of the following activities is the Executive responsible for?

- A. Ensure the desired outcome of the project is specified
- B. Assess and update the Business Case at the end of each stage
- C. Responsible for the Benefits Review Plan post project
- D. Responsible for the benefits review plan

정답: D

질문 # 175

During stage 1 the level of performance expected from the service provider was changed. After this change was agreed which of these products will require updating?

- A. Quality Management Strategy because this is where all of the customer's quality expectations of the project's products should be documented.
- B. Project Brief because this is maintained throughout the project to reflect the customer's quality expectations.
- C. Project Product Description because this contains details of the expected performance of the project's products.

정답: C

질문 # 176

The project is in stage 3. The BuildyBrick construction teams are unsure about using the required environmentally friendly concrete technique. As the team has not used the technique before, the work could take longer than originally planned. The Regeneration Manager has arranged a visit to another site where the technique is being used.

Which principle is being applied, and why?

- A. Manage by exception, because work package time tolerance may be exceeded
- B. Learn from experience, because a field trip provides an opportunity to learn from others
- C. Learn from experience, because lessons should only be reviewed at project start
- D. Manage by exception, because the CEO should resolve the concern

정답: B

설명:

PRINCE2's learn from experience principle requires that lessons are sought, recorded, and applied throughout the project lifecycle. PRINCE2 explicitly states that projects should "seek lessons from previous projects and from current experiences" and apply them proactively to improve outcomes.

In this scenario, the construction team lacks experience with a specialist technique. Instead of proceeding blindly, the Regeneration Manager arranges a visit to another site where the technique is already in use. This is a textbook example of learning from external experience and applying proven practices to reduce risk, uncertainty, and inefficiency.

Option A correctly reflects this principle. Option B is incorrect because PRINCE2 clearly states that lessons are not limited to the start of the project; they must be sought continuously. Options C and D incorrectly invoke manage by exception, which applies when tolerances are forecast to be exceeded- not when proactively reducing risk through learning.

Who is responsible for appointing the Project Manager?

- 정답: D**
