Pass Guaranteed Salesforce - Analytics-DA-201 - Useful VCE Salesforce Certified Tableau Data Analyst Exam Simulator

To help customers pass the Salesforce Analytics-DA-201 exam successfully. ValidTorrent with 365 days updates. Valid Analytics-DA-201 Analytics-DA-201 exam dumps, exam cram and exam dumps demo. You can download these at a preferential price. We continually improve the versions of our Analytics-DA-201 Exam Guide so as to make them suit all learners with different learning levels and conditions.

Salesforce Certified Tableau Data Analyst Sample Questions (Q93-Q98):

NEW QUESTION # 93
You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.
You need to configure be shapes to be much larger than the line.
What should you do?

- A. Duplicate Population Drag the duplicate to the second Marks card and configure the see of the marks independently
- B. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository
- C. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset
- D. Change Population to a discrete dimension

Answer: A

Explanation:
To configure the shapes to be much larger than the line, you need to duplicate Population and drag it to the second Marks card. This will create a dual axis chart with two measures on one axis. You can then select Shape on one Marks card and Line on another

Marks card, and adjust the size of each mark independently using the Size slider or menu. References:
https://help.tableau.com/current/pro/desktop/en-us
/multiplemeasures_dualaxes.htm https://help.tableau.com/current/pro/desktop/en-us
/marks_markproperties_size.htm
In a dual-axis chart in Tableau, if you want to have two different visual mark types (like a shape and a line) and configure them differently (such as making one larger than the other), you would need to duplicate the measure. You then drag this duplicate to the second Marks card (which represents the second axis). There, you can adjust the size of the marks (shapes, in this case) independently of the line marks on the first Marks card.

NEW QUESTION # 94
Open the link to Book1 found on the desktop. Open the Line worksheet.
Modify the chart to show only main and max values of both measures in each region.

Answer:

Explanation:
check the steps below in explanation.
Explanation:
To modify the chart to show only min and max values of both measures in each region, you need to do the following steps:
* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Line worksheet.
* Click on the Line tab at the bottom of the workbook to open the worksheet. You will see a line chart that shows the sales and profit for each month by region.
* Drag Month from the Columns shelf to Filters shelf. This will open a dialog box that allows you to filter by different criteria.
* Select Range of Dates from the dialog box. This will show you options to filter by a range of dates or values.
* Select Minimum and Maximum from the drop-down list next to Month. This will filter by the minimum and maximum values of Month for each region. You can also enter specific values or use the sliders to adjust the range.
* Click OK to apply the filter. You will see that the line chart now shows only min and max values of both measures in each region.
References: https://help.tableau.com/current/pro/desktop/en-us/filtering.htm https://help.tableau.com/current/pro/desktop/en-us/filtering_range.htm

NEW QUESTION # 95
You have the following dashboard.
From the context menu of Sales over time, select Ignore Actions.
Several Lays later, you decide that you want to filter both Sales over time and Detail table by selecting a data point on the map.
What should you do?

- A. From the context menu of Profits by state, deselect Use as Filter and then select Use as Filter.
- B. From the context menu of Detail table, select Ignore Actions.
- C. From the context menu of Sales over time, select Use as Filter and then deselect Use as Filter
- D. From the context menu of Sales over lime, select Filters and then select Enable Auto Update.

Answer: A

NEW QUESTION # 96
You want to ensure that when you click a bar on a dashboard, a tooltip appears that contains a link named
"Click here to know more!" as shown in the following exhibit.

Answer:

Explanation:
Explanation:

NEW QUESTION # 97
Open the link to Book1 found on the desktop. Open the sales dashboard.

Add the Sales by State sheet in a Show/Hide button to the right side of the dashboard.

Answer:

Explanation:
check the steps below in explanation.
Explanation:
To add the Sales by State sheet in a Show/Hide button to the right side of the dashboard, you need to do the following steps:
* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the sales dashboard.
* Click on the sales dashboard tab at the bottom of the workbook to open the dashboard. You will see a dashboard that shows various charts and filters related to sales data.
* Drag Sales by State from the Sheets pane to the right side of the dashboard. This will add the sheet as a floating element on the dashboard. You can resize and position it as you like.
* Right-click on Sales by State and select Add Show/Hide Button from the menu. This will add a button that allows you to show or hide the sheet on the dashboard. You can customize the appearance and behavior of the button by clicking on it and using the options on the Marks card.
* Optionally, you can drag a vertical layout container from the Objects pane to the right side of the dashboard and place Sales by State and its button inside it. This will help you organize your dashboard elements and align them neatly.
