

# Free USGBC LEED-Green-Associate Test Questions & LEED-Green-Associate Reliable Test Guide

## LEED Green Associate Test Bank| Questions with Complete Solution 2024/2025 Latest Update Graded A+

Who can use the USGBC Member Logo? ✓✓ Only USGBC Members in good standing.

What can be used to assist with the certification of projects in a campus of multi-building setting such as corporate campuses, college campuses and government installations? ✓✓\*\* The LEED for Multiple Buildings and On-Campus Building rating system provides direction in applying LEED for New Construction to projects in a campus or multi-building settings

-> It is intended for projects where either

- (1) several buildings are constructed at once or in phases, or
- (2) a single building is constructed in a setting or existing buildings with common ownership or planning with the ability to share amenities or common design features.

What is the EPAct of 1992? ✓✓ The Energy Policy Act of 1992 covers many products and services related to energy. It also sets standards for toilets and other water fixtures in both commercial and residential models.

What does an Energy Star rating refer to? ✓✓ The Energy Star rating is a measure of a buildings energy performance compared with that of similar buildings, as determined by Energy Star Portfolio Manager. A score of 50 represents average building performance.

What does Certification by Forest Stewardship Council mean? ✓✓ Certification means forest managers have adopted environmentally and socially responsible forest management practices. And certification allows companies to manufacture and sell products made from sustainable wood.

CIRs can be used for what purpose? ✓✓ CIRs are used to ask one clear and concise question for technical and administrative guidance on MPRs, Prerequisites and Credits.

Exams like the USGBC LEED-Green-Associate exam provided by USGBC are crucial for the advancement of your career. Candidates want to succeed on their LEED Green Associate Exam exam. For candidates to study for and successfully pass their chosen certification exam the first time, VCE4Dumps provides LEED Green Associate Exam LEED-Green-Associate Exam Questions. You may use the top LEED-Green-Associate study resources from VCE4Dumps to prepare for the LEED Green Associate Exam exam. USGBC LEED-Green-Associate exam questions are a dependable and trustworthy source of training.

## USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.</li> </ul>

## LEED-Green-Associate Study Materials & LEED-Green-Associate Exam Preparatory & LEED-Green-Associate Test Prep

To help you learn with the newest content for the LEED-Green-Associate preparation materials, our experts check the updates status every day, and their diligent works as well as professional attitude bring high quality for our LEED-Green-Associate practice materials. You may doubtful if you are newbie for our LEED-Green-Associate training engine, free demos are provided for your reference. The free demo of LEED-Green-Associate exam questions contains a few of the real practice questions, and you will love it as long as you download and check it.

### USGBC LEED Green Associate Exam Sample Questions (Q119-Q124):

#### NEW QUESTION # 119

LEED considers products to be environmentally preferable materials when they are

- A. locally extracted, manufactured and purchased
- B. materials with more life-cycle impact
- C. cost effective
- D. transported by air rather than rail

**Answer: A**

**Explanation:**

LEED considers products to be environmentally preferable when they are locally extracted, manufactured, and purchased. This is because local sourcing reduces the environmental impact associated with transportation, supports local economies, and can often ensure that the materials are suitable for the local climate and conditions. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### NEW QUESTION # 120

What is the primary purpose of using low cubicle partitions in office buildings?

- A. To reduce CO levels
- **B. To increase the spread of daylight**
- C. To increase thermal comfort
- D. To reduce Volatile Organic Compounds (VOCs) levels

**Answer: B**

Explanation:

Low cubicle partitions enhance the spread of daylight deeper into office spaces, improving natural lighting and reducing dependence on artificial lighting. This supports LEED credits under Indoor Environmental Quality, which aim to optimize daylight for better occupant health, productivity, and energy savings.

### NEW QUESTION # 121

A salvaged wood door from another site qualifies under what Materials and Resources sustainable criteria?

- A. Bio-based materials
- B. Certified wood
- **C. Materials reuse**
- D. Waste diversion

**Answer: C**

Explanation:

A salvaged wood door from another site qualifies under the Materials and Resources sustainable criteria of materials reuse. Materials reuse is the practice of using existing materials or products for new purposes without altering their form or composition. Materials reuse reduces the demand for virgin materials, saves energy and resources, and prevents waste generation. The other options are not applicable to a salvaged wood door from another site. Certified wood is wood that has been harvested from forests that are managed in an environmentally responsible, socially beneficial, and economically viable manner according to the standards of an accredited certification system such as the Forest Stewardship Council (FSC). Bio-based materials are materials that are derived from plants or animals, such as bamboo, cork, wool, or cotton. Waste diversion is the practice of diverting waste from landfills or incinerators by recycling, reusing, salvaging, or donating materials. References: LEED Green Associate Candidate Handbook, page 28; USGBC, [Materials and Resources], page 4.

### NEW QUESTION # 122

Which label or certification indicates reduced water consumption for appliances?

- **A. ENERGY STAR**
- B. ISO 14001:2015
- C. GREENGUARD
- D. ASHRAE 90.1

**Answer: A**

Explanation:

ENERGY STAR is a program run by the U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy that promotes energy efficiency. Products that earn the ENERGY STAR label meet strict criteria for energy efficiency and often for water efficiency as well, helping consumers save money on utility bills and protect the environment through energy-efficient products and practices. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### NEW QUESTION # 123

Select the type of approach that promotes the conservation of materials and resources by linking elements in order to form relationships with their function

- A. Open Systems
- **B. Closed Systems**
- C. Closed Flow
- D. Open Flow

**Answer: B**

Explanation:

Explanation

A closed system is a type of approach that promotes the conservation of materials and resources by linking elements in order to form relationships with their function<sup>1</sup>. A closed system is one that does not exchange matter or energy with its surroundings, and therefore minimizes waste and maximizes efficiency<sup>2</sup>. A closed system aims to achieve a circular economy, where resources are reused, recycled, or recovered, rather than disposed of<sup>3</sup>. A closed system can also enhance resource productivity, reduce environmental impacts, and foster innovation<sup>4</sup>.
