Whether you are at home or traveling anywhere, you can do I27001F exam preparation with our CertiProf I27001F Dumps. Certified ISO/IEC 27001:2022 Foundation (I27001F) test candidates with different learning needs can use our three formats to meet their needs and prepare for I27001F test successfully in one go. Read on to check out the features of these three formats.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q18-Q23):

NEW QUESTION # 18

According to ISO/IEC 27001:2022, who is required to carry out the ISMS review to ensure its suitability, adequacy, and effectiveness?

- A. The internal audit team
- B. Process owners
- C. Top management
- D. The external certification audit company

Answer: C

Explanation:

The standard requires top management to review the ISMS at planned intervals. This review is intended to confirm the continuing suitability, adequacy, and effectiveness of the ISMS. While auditors, process owners, and certification bodies may provide inputs or findings, the management review itself is a responsibility of top management. Therefore, option D is the correct answer.

NEW QUESTION # 19

Identify the missing words in the following sentence.

The organization shall establish, _____, maintain, and continually improve an information security management system.

- A. implement
- B. monitor
- C. administer
- D. exploit

Answer: A

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 requires the organization to establish, implement, maintain, and continually improve an information security management system. This is one of the core statements of the standard and defines the lifecycle expectation for the ISMS. Therefore, the missing word is implement, making option A correct.

NEW QUESTION # 20

What does ISO/IEC 27001:2022 require for the control of documented information?

- A. Hire a consultancy to determine how documented information should be controlled in order to achieve certification
- B. Have an internal auditor validate that documented information control is performed externally
- C. Acquire a technological tool to control documented information effectively
- D. Control documented information so that it is available and suitable for use, where and when it is needed

Answer: D

Explanation:

ISO/IEC 27001:2022 requires documented information to be controlled so that it is available and suitable for use where and when needed, and adequately protected. The standard does not require purchasing software, hiring consultants, or assigning external validation as mandatory conditions for compliance. Those may be organizational choices, but they are not requirements of the standard. Therefore, option A is the correct answer.

NEW QUESTION # 21

What are the phases of the PDCA cycle?

- A. Plan, Do, Verify, Assure
- **B. Plan, Do, Check, Act**
- C. Propose, Do, Validate, Act
- D. Plan, Validate, Verify, Act

Answer: B

Explanation:

The PDCA cycle stands for Plan, Do, Check, Act. It is a management model commonly associated with management systems, including the implementation and continual improvement of an ISMS. In the context of ISO/IEC 27001:2022, this logic supports planning the ISMS, implementing and operating it, monitoring and reviewing performance, and taking actions for continual improvement. Therefore, option B is correct.

NEW QUESTION # 22

Which statement describes the difference between ISO/IEC 27001:2022 and ISO/IEC 27002:2022?

- A. ISO/IEC 27002:2022 provides mandatory requirements for a risk management approach, and ISO/IEC 27001:2022 contains mandatory requirements for an ISMS
- B. ISO/IEC 27002:2022 contains mandatory requirements, while ISO/IEC 27001:2022 provides guidance on information security controls
- **C. ISO/IEC 27001:2022 contains mandatory requirements, while ISO/IEC 27002:2022 provides guidance on information security controls**
- D. ISO/IEC 27002:2022 provides guidance on measurement, and ISO/IEC 27001:2022 provides guidance on information security controls

Answer: C

Explanation:

ISO/IEC 27001:2022 is the certifiable standard that contains requirements for establishing, implementing, maintaining, and continually improving an Information Security Management System. ISO/IEC 27002:2022 is not a certifiable requirements standard. It provides guidance for selecting, implementing, and managing information security controls, including the controls referenced in Annex A of ISO/IEC 27001:2022.

Therefore, option C is correct.

NEW QUESTION # 23

.....

If you are the first time to prepare the I27001F exam, it is better to choose a type of good study materials. After all, you cannot understand the test syllabus in the whole round. It is important to predicate the tendency of the I27001F study materials if you want to easily pass the exam. Now, all complicate tasks have been done by our experts. They have rich experience in predicating the I27001F exam. Then you are advised to purchase the study materials on our websites. Also, you can begin to prepare the I27001F Exam. You are advised to finish all exercises of our I27001F study materials. In fact, you do not need other reference books. Our study materials will offer you the most professional guidance. In addition, our I27001F study materials will be updated according to the newest test syllabus. So you can completely rely on our I27001F study materials to pass the exam.
