CrowdStrike Certified Falcon Hunter Sample Questions (Q33-Q38):

NEW QUESTION # 33

What information is shown in Host Search?

- A. Quarantined Files
- B. Intel Reports
- **C. Processes and Services**
- D. Prevention Policies

Answer: C

Explanation:

Processes and Services is one of the information that is shown in Host Search. Host Search is an Investigate tool that allows you to view events by category, such as process executions, network connections, file writes, etc. Processes and Services is one of the categories that shows information such as process name, command line, parent process name, parent command line, etc. for each process execution event on a host. Quarantined Files, Prevention Policies, and Intel Reports are not shown in Host Search.

NEW QUESTION # 34

Which of the following is a suspicious process behavior?

- **A. Non-network processes (eg, notepad.exe) making an outbound network connection**
- B. An Internet browser (eg, Internet Explorer) performing multiple DNS requests
- C. PowerShell launching a PowerShell script
- D. PowerShell running an execution policy of RemoteSigned

Answer: A

Explanation:

Non-network processes are processes that are not expected to communicate over the network, such as notepad.exe. If they make an outbound network connection, it could indicate that they are compromised or maliciously used by an adversary. PowerShell running an execution policy of RemoteSigned is a default setting that allows local scripts to run without digital signatures. An Internet browser performing multiple DNS requests is a normal behavior for web browsing. PowerShell launching a PowerShell script is also a common behavior for legitimate tasks.

NEW QUESTION # 35

Which Falcon documentation guide should you reference to hunt for anomalies related to scheduled tasks and other Windows related artifacts?

- A. Customizable Dashboards
- B. Events Data Dictionary
- C. MITRE-Based Falcon Detections Framework
- **D. Hunting and Investigation**

Answer: D

Explanation:

The Hunting and Investigation guide is the Falcon documentation guide that you should reference to hunt for anomalies related to scheduled tasks and other Windows related artifacts. The Hunting and Investigation guide provides sample hunting queries, select walkthroughs, and best practices for hunting with Falcon. It covers various topics such as process execution, network connections, registry activity, scheduled tasks, and more.

NEW QUESTION # 36

What information is provided when using IP Search to look up an IP address?

- **A. External IPs only**
- B. Both internal and external IPs
- C. Internal IPs only
- D. Suspicious IP addresses

Answer: A

Explanation:

IP Search is an Investigate tool that allows you to look up information about external IPs only. It shows information such as geolocation, network connection events, detection history, etc. for each external IP address that has communicated with your hosts. It does not show information about internal IPs, suspicious IPs, or both internal and external IPs.

NEW QUESTION # 37

Adversaries commonly execute discovery commands such as netexe, ipconfig.exe, and whoami.exe. Rather than query for each of these commands individually, you would like to use a single query with all of them. What Splunk operator is needed to complete the following query?

- A. NOT
- B. IN
- **C. OR**
- D. AND

Answer: C

Explanation:

The OR operator is needed to complete the following query, as it allows to search for events that match any of the specified values. The query would look like this:
 event_simpleName=ProcessRollup2 FileName=net.exe OR FileName=ipconfig.exe OR FileName=whoami.exe
 The OR operator is used to combine multiple search terms or expressions and return events that match at least one of them. The IN, NOT, and AND operators are not suitable for this query, as they have different functions and meanings.

NEW QUESTION # 38

.....
