

Pass Guaranteed 2026 High-quality 1Z0-771: Best Oracle APEX Cloud Developer Professional Vce

2025 Latest TestsDumps 1Z0-771 PDF Dumps and 1Z0-771 Exam Engine Free Share: https://drive.google.com/open?id=1jo4_Rk8RNKaHUhZyl28-PAvw17A1i8m

As the old saying goes, "Everything starts from reality, seeking truth from facts." This means that when we learn the theory, we end up returning to the actual application. Therefore, the effect of the user using the latest 1Z0-771 exam dump is the only standard for proving the effectiveness and usefulness of our products. I believe that users have a certain understanding of the advantages of our 1Z0-771 Study Guide, but now I want to show you the best of our 1Z0-771 training Materials - Amazing pass rate. Based on the statistics, prepare the exams under the guidance of our 1Z0-771 practice materials, the user's pass rate is up to 98% to 100%, And they only need to practice latest 1Z0-771 exam dump to hours.

The countless candidates have already passed their Oracle APEX Cloud Developer Professional (1Z0-771) certification exam and they all used the real, valid, and updated 1Z0-771 exam questions. So, why not, take a decision right now and ace your Oracle APEX Cloud Developer Professional (1Z0-771) exam preparation with top-notch Oracle 1Z0-771 exam questions?

>> Best 1Z0-771 Vce <<

Pass-Sure Oracle - Best 1Z0-771 Vce

According to the survey, the average pass rate of our candidates has reached 99%. High passing rate must be the key factor for choosing, which is also one of the advantages of our 1Z0-771 real study dumps. Our 1Z0-771 exam questions have been widely acclaimed among our customers, and the good reputation in industry prove that choosing our study materials would be the best way for you, and help you gain the 1Z0-771 Certification successfully. With about ten years' research and development we still keep updating our 1Z0-771 prep guide, in order to grasp knowledge points in accordance with the exam, thus your study process would targeted and efficient.

Oracle 1Z0-771 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments. |
| Topic 2 | <ul style="list-style-type: none">• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX. |

| | |
|----------|--|
| Topic 3 | <ul style="list-style-type: none"> Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management. |
| Topic 4 | <ul style="list-style-type: none"> Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management. |
| Topic 5 | <ul style="list-style-type: none"> Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications. |
| Topic 6 | <ul style="list-style-type: none"> Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding. |
| Topic 7 | <ul style="list-style-type: none"> Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development. |
| Topic 8 | <ul style="list-style-type: none"> Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications. |
| Topic 9 | <ul style="list-style-type: none"> Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions. |
| Topic 10 | <ul style="list-style-type: none"> Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development. |
| Topic 11 | <ul style="list-style-type: none"> Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction. |
| Topic 12 | <ul style="list-style-type: none"> Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features. |
| Topic 13 | <ul style="list-style-type: none"> Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures. |
| Topic 14 | <ul style="list-style-type: none"> Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions. |
| Topic 15 | <ul style="list-style-type: none"> Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences. |
| Topic 16 | <ul style="list-style-type: none"> Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments. |

- Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.

Oracle APEX Cloud Developer Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which two tasks can be performed by the APEX Assistant when you create an application using the "Create App using Generative AI" option?

- A. Add a Dashboard page.
- B. Create a Generative AI service.
- C. Create the application blueprint.
- D. Update the App icon with a custom image.

Answer: A,C

Explanation:

The "Create App using Generative AI" feature in APEX Assistant leverages natural language processing to automate application creation. When invoked:

Create the application blueprint: APEX Assistant generates a foundational structure (blueprint) for the application, including pages, regions, and navigation, based on the user's natural language input (e.g., "Create an app to manage employees"). This blueprint serves as the starting point, which developers can refine.

Add a Dashboard page: The Assistant can interpret requests for specific page types, such as dashboards, and include them in the generated app. Dashboards typically feature charts, summaries, or key metrics, and this is a common task supported by the AI-driven creation process.

Create a Generative AI service: This is not a task performed during app creation; instead, it's a prerequisite configuration step done separately in the Instance Administration settings.

Update the App icon: While app icons can be customized manually post-creation, this is not an automated task performed by APEX Assistant during the generative process.

This feature streamlines development by interpreting intent and building functional components, saving significant time compared to manual creation.

NEW QUESTION # 52

You must use a Static Content region type to display messages about the employee of the month. Which text, when placed in this region, will display the message correctly?

- A. Join me in congratulating: P1_ENAME as the new employee of the month!
- B. Join me in congratulating: &P1_ENAME. as the new employee of the month!
- C. Join me in congratulating & P1_ENAME. as the new employee of the month!
- D. Join me in congratulating V('P1_ENAME') as the new employee of the month!

Answer: B

Explanation:

Static Content regions display fixed text with substitution:

B . &P1_ENAME.: The &ITEM_NAME. syntax substitutes the value of P1_ENAME at runtime (e.g., "Join me in congratulating: John as..."), correctly rendering the item's value. The dot ensures proper parsing.

A . P1_ENAME: Treated as literal text, not substituted.

C . V('P1_ENAME'): A PL/SQL function, invalid in static content; it's for server-side code.

D . & P1_ENAME.: Space before P1_ENAME breaks substitution syntax.

Pitfall: Ensure P1_ENAME is populated (e.g., via a page process) to avoid blank output.

NEW QUESTION # 53

Which three statements are true about Data Workshops in Oracle APEX?

- A. You can load or unload multiple tables at a time.

- B. You can load or unload a single table at a time.
- C. You can load data into a new or existing table.
- D. You can unload data from a new or existing table.

Answer: B,C,D

Explanation:

Data Workshop in SQL Workshop is a powerful tool for importing/exporting table data:

B . You can load or unload a single table at a time: The wizard focuses on one table per operation. For loading, you upload a file (e.g., CSV) and map it to a single table; for unloading, you select one table to export (e.g., EMP to CSV). This granularity ensures precision and simplicity.

C . You can unload data from a new or existing table: Unloading (exporting) works on any table in the schema, whether newly created (e.g., via Quick SQL) or pre-existing (e.g., DEPT). The "Unload" option generates a file (e.g., CSV, JSON) from the table's data.

D . You can load data into a new or existing table: Loading supports creating a new table from the uploaded file (e.g., CSV defines NEW_EMP) or appending/overwriting an existing one (e.g., EMP). The wizard prompts for table creation or selection.

A . You can load or unload multiple tables at a time: False; Data Workshop processes one table per wizard run. Multiple tables require separate operations or custom SQL scripts.

Technical Insight: Loading uses APEX_DATA_LOADING internally, parsing files into rows, while unloading leverages APEX_DATA_EXPORT. For example, uploading emp.csv with "Create New Table" generates a table with inferred columns.

Use Case: Migrating EMP data from a legacy system (CSV) into APEX, then exporting it later for analysis.

Pitfall: Multi-table operations need SQL Scripts or external tools like SQL Developer.

NEW QUESTION # 54

Which two Query Source types can be used to create a dynamic LOV?

- A. Function Returning SQL Query
- B. SQL Query
- C. Procedure
- D. Select List

Answer: A,B

Explanation:

A dynamic List of Values (LOV) in APEX populates options based on a query source. The supported types include:

Function Returning SQL Query: A PL/SQL function that returns a SQL query string (e.g., RETURN 'SELECT ename, empno FROM emp;'). This offers flexibility for dynamic conditions or complex logic.

SQL Query: A direct SQL statement (e.g., SELECT ename, empno FROM emp) executed at runtime to fetch LOV values. It's the simplest and most common approach.

Procedure: Procedures execute logic but don't return query results in the format required for an LOV (they don't produce a result set directly).

Select List: This is a UI component, not a query source type for defining an LOV.

Dynamic LOVs enhance user interaction by providing real-time, data-driven options, critical for forms and filters.

NEW QUESTION # 55

Which two layout modes are available for Page Designer under Utilities?

- A. Three Pane
- B. Four Pane
- C. Single Pane
- D. Two Pane

Answer: A,D

Explanation:

Page Designer's layout modes under Utilities adjust the workspace:

A . Two Pane: Splits into two vertical sections (e.g., tree and properties), ideal for focused editing.

B . Three Pane: Adds a third section (e.g., tree, grid, properties), offering a balanced view for complex pages.

C . Four Pane: Not available; APEX limits to three for usability.

Developers toggle these via the Utilities menu to optimize screen real estate based on task complexity.
