ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q114-Q119):

NEW QUESTION # 114

SNMP Credentials require which of the following?

- A. port 135 access
- B. write community strings
- C. usernames
- **D. read community strings**

Answer: D

Explanation:

SNMP credentials are used by Discovery to communicate with devices that support the Simple Network Management Protocol (SNMP). SNMP credentials do not include a user name, just a password, called the community string. The default read-only community string for many SNMP devices is public, and Discovery will try that automatically. Enter the appropriate SNMP credentials if they differ from the public community string.

1: SNMP credentials - Product Documentation: Utah - Now Support Portal

NEW QUESTION # 115

Port Probe classification priority is specified in the _____ .

Response:

- **A. Port Probes module**
- B. Classifier
- C. Scamer field
- D. IP Services module

Answer: A

NEW QUESTION # 116

By default, which of the following are automatically available as variables for horizontal discovery patterns?

(Choose two.)

- **A. infrastructure_system**
- B. The CI Type on the Discovery Pattern form
- C. windows_cmdb_ci
- **D. computer_system**

Answer: A,D

Explanation:

Horizontal discovery patterns are a series of operations that tell Discovery which CIs to find on your network, what credentials to use, and what tables to populate in the CMDB. Horizontal discovery patterns use variables to store and pass information between the operations. By default, there are two variables that are automatically available for horizontal discovery patterns: `infrastructure_system` and `computer_system`. These variables store the information about the infrastructure and the computer system of the target CI, respectively. They are populated by the Horizontal Pattern probe and sensor, which enable Discovery to use patterns for horizontal discovery¹²³.
