

# Desktop Based 1Z0-771 Oracle APEX Cloud Developer Professional Practice Test Software

What's more, part of that ActualtestPDF 1Z0-771 dumps now are free: <https://drive.google.com/open?id=1p4HKm8ZdDPEUnhSSxt5CK7S3HPKU7CS>

Our 1Z0-771 exam training' developers to stand in the perspective of candidate, fully consider their material basis and actual levels of knowledge, formulated a series of scientific and reasonable learning mode, meet the conditions for each user to tailor their learning materials. What's more, our 1Z0-771 guide questions are cheap and cheap, and we buy more and deliver more. The more customers we buy, the bigger the discount will be. In order to make the user a better experience to the superiority of our 1Z0-771 Actual Exam guide, we also provide considerate service, users have any questions related to our study materials, can get the help of our staff in a timely manner.

## Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>

## Free PDF 2026 Oracle Reliable 1Z0-771: Latest Oracle APEX Cloud Developer Professional Dumps

Now we can say that Oracle APEX Cloud Developer Professional (1Z0-771) exam questions are real and top-notch Oracle 1Z0-771 exam questions that you can expect in the upcoming Oracle APEX Cloud Developer Professional (1Z0-771) exam. In this way, you can easily pass the 1Z0-771 exam with good scores. The countless 1Z0-771 Exam candidates have passed their dream 1Z0-771 certification exam and they all got help from real, valid, and updated 1Z0-771 practice questions, You can also trust on ActualtestPDF and start preparation with confidence.

### Oracle APEX Cloud Developer Professional Sample Questions (Q51-Q56):

#### NEW QUESTION # 51

Which step is mandatory to make an existing Oracle APEX application Progressive Web App (PWA) enabled?

- A. Verify that Friendly URLs are turned on in the Application Definition.
- **B. Enable the PWA flag in the Application Definition.**
- C. Add custom JavaScript to support offline functionality.
- D. Enable RESTful Web Services in the application.

**Answer: B**

Explanation:

To enable an existing APEX application as a Progressive Web App (PWA), the mandatory step is:

Enable the PWA flag in the Application Definition: In the Application Definition attributes under "Progressive Web App," setting "Enable PWA" to "Yes" activates PWA features like installability, push notifications, and service worker generation. This is the foundational step, after which optional customizations (e.g., icons, manifest) can be added.

Friendly URLs: While recommended for modern apps, they're not required for PWA functionality.

Custom JavaScript: Optional for offline capabilities, but not mandatory for basic PWA enablement.

RESTful Web Services: Unrelated to PWA features.

This step transforms the app into a PWA, enhancing user experience on mobile and desktop devices with native-like behavior.

### NEW QUESTION # 52

What happens when you regenerate credentials for Push Notifications in Oracle APEX?

- A. Push Notifications will be disabled for the application.
- **B. Existing Push Subscriptions for the application will be invalidated.**
- C. A new notification server must be created.

**Answer: B**

### NEW QUESTION # 53

In which two formats can the GetCurrentPosition Dynamic Action in Oracle APEX return coordinates?

- A. State and Pincode
- B. Function Body returning SQL Query
- **C. Latitude and Longitude**
- **D. GeoJSON**

**Answer: C,D**

Explanation:

The GetCurrentPosition Dynamic Action retrieves geolocation data from the user's device. It supports:

Latitude and Longitude: Returns coordinates as separate numeric values (e.g., lat: 37.7749, lon: -122.4194).

GeoJSON: Returns coordinates in a structured JSON format compliant with the GeoJSON standard (e.g., { "type": "Point", "coordinates": [-122.4194, 37.7749] }).

Function Body returning SQL Query is a dynamic action type, not a coordinate format, and State and Pincode is unrelated to geolocation coordinates.

### NEW QUESTION # 54

Which two actions are performed by using the Object Browser?

- A. Create and run SQL scripts.
- **B. Browse database objects of the current schema.**
- C. Restore dropped database objects.
- **D. Create a lookup table based on a column in the current table.**

**Answer: B,D**

Explanation:

Object Browser in SQL Workshop is a GUI for managing schema objects:

B . Browse database objects of the current schema: Displays tables, views, procedures, etc., in a tree view, allowing inspection of definitions (e.g., columns, constraints) and data previews.

D . Create a lookup table based on a column in the current table: From a table's column (e.g., DEPTNO), you can generate a lookup table (e.g., DEPT\_LOOKUP) with unique values, automating reference table creation.

A . Restore dropped objects: Not supported; this requires DBA tools (e.g., FLASHBACK TABLE).

C . Create and run SQL scripts: This is a SQL Scripts feature, not Object Browser.

Practical tip: Use "Create Lookup Table" to normalize data efficiently.

### NEW QUESTION # 55

Which two tasks can be performed by the APEX Assistant when you create an application using the "Create App using Generative AI" option?

- **A. Add a Dashboard page.**
- **B. Create the application blueprint.**
- C. Update the App icon with a custom image.
- D. Create a Generative AI service.

**Answer: A,B**

The "Create App using Generative AI" feature in APEX Assistant leverages natural language processing to automate application creation. When invoked:

Add a Dashboard page: The Assistant can interpret requests for specific page types, such as dashboards, and include them in the generated app. Dashboards typically feature charts, summaries, or key metrics, and this is a common task supported by the AI-driven creation process.

Update the App icon: While app icons can be customized manually post-creation, this is not an automated task performed by APEX Assistant during the generative process.

**NEW QUESTION # 56**

There are three different versions for all customers to choose. The three different versions include the PDF version, the software version and the online version, they can help customers solve any questions and meet their all needs. Although the three different versions of our 1Z0-771 study materials provide the same demo for all customers, they also have its particular functions to meet different the unique needs from all customers. The most important function of the online version of our 1Z0-771 Study Materials is the practicality. The online version is open to any electronic equipment, at the same time, the online version of our 1Z0-771 study materials can also be used in an offline state.
