And after using our CIS-SPM learning prep, they all have marked change in personal capacity to deal with the ServiceNow CIS-SPM Exam intellectually. The world is full of chicanery, but we are honest and professional in this area over ten years.

ServiceNow CIS-SPM Exam Syllabus Topics:

Topic	Details

Topic 1	• Software Development Security: This section emphasizes securing the software development lifecycle, including application security testing, code review, secure coding practices, and third-party software management.
Topic 2	• Identity and Access Management: This section explores authentication methods and technologies, authorization and access control models, and the identity management lifecycle.
Topic 3	• Regulatory Compliance and Legal Issues: This section addresses risk management and risk assessment methodologies, including threat modeling and vulnerability assessment. It also explores various risk mitigation strategies.
Topic 4	• Asset Security: This section focuses on information and asset classification, data security controls, privacy protection measures, and intellectual property protection.
Topic 5	• Information Security Governance: This section of the exam delves into security management concepts and principles, examining organizational structures and roles in security. It also covers developing and implementing security policies, standards, and procedures.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q89-Q94):

NEW QUESTION # 89
What are the default project template configuration records available in the Template Config module?
Choose 3 answers

- A. Task
- B. Project
- C. Project template
- D. Project subtask
- E. Project task

Answer: B,C,E

Explanation:
Explanation
the default project template configuration records available in the Template Config module are Project task, Project, and Project template. These records define the fields and values that are copied from the template to the project when a project is created from a template. The other options are incorrect because:
B: Project subtask: Project subtask is not a valid record in the Template Config module, as it is a child of the Project task record2.
D: Task: Task is not a valid record in the Template Config module, as it is a parent of the Project task record3.

NEW QUESTION # 90
The combination of the user and the assigned portfolio must be unique when adding a user to which registry?

- A. Stakeholder Registry.
- B. Event Registry.
- C. Application Registry.
- D. UX Page Registry.

Answer: A

Explanation:
According to the Stakeholder Registry document, the combination of the user and the assigned portfolio must be unique when adding a user to the stakeholder registry. The stakeholder registry is a table that stores information about the stakeholders of a

portfolio. The other options are not correct, as they are not registries that require a unique combination of user and portfolio. The application registry is a table that stores information about the applications in the system. The event registry is a table that stores information about the events that trigger notifications. The UX page registry is a table that stores information about the UX pages that are available for portfolios.

NEW QUESTION # 91
In which table can you find cost information for a specific fiscal period?

- A. pm_project
- B. expense_line
- C. cost_plan_breakdown
- D. cost_plan

Answer: C

Explanation:
According to the ServiceNow documentation1, the cost_plan_breakdown table stores the cost information for a specific fiscal period. This table contains the fields such as cost plan, fiscal period, amount, and currency. The other options are incorrect because:
B . pm_project: The pm_project table stores the information about projects, such as name, description, state, and status2.
C . cost_plan: The cost_plan table stores the information about cost plans, such as name, type, and project3.
D . expense_line: The expense_line table stores the information about expense lines, such as expense type, amount, and date4.

NEW QUESTION # 92
Idea [im_idea_core] is directly extended from which table?

- A. Task
- B. Project
- C. Idea Modules
- D. It is not extended from any table

Answer: D

Explanation:
Explanation
According to the ServiceNow documentation1, the Idea [im_idea_core] table is a base table that is not extended from any other table. It stores information about ideas and their categories. The other options are incorrect because:
Task: The Task table is a base table that is extended by many other tables, such as Project, Demand, Incident, etc2.
Idea Modules: The Idea Modules table is a child table of the Idea [im_idea_core] table that defines the idea modules displayed on the Idea Portal3.
Project: The Project table is a child table of the Task table that stores information about projects.

NEW QUESTION # 93
Which statement defines the Project Workspace?

- A. A central location transform the navigation of lists and forms into an interactive graphical experience

- B. A central location to view of all projects in a portfolio to prioritize work
- C. A central location for creating and managing projects
- D. A central location for viewing and assessing business demands

Answer: C

Explanation:
According to the ServiceNow documentation1, the Project Workspace is a central location for creating and managing projects. It provides a graphical interface that allows users to view and edit project information, such as tasks, resources, risks, issues, and dependencies. The Project Workspace also enables users to collaborate with team members and stakeholders, track project progress, and generate reports.
The other options are incorrect because:
A . A central location to view of all projects in a portfolio to prioritize work: This describes the Portfolio Workbench, not the Project Workspace2.
C . A central location transform the navigation of lists and forms into an interactive graphical experience: This describes the Lens, not the Project Workspace3.
D . A central location for viewing and assessing business demands: This describes the Demand Workbench, not the Project Workspace.
