Check Point Certified Security Expert - R82 Exam Questions Pdf & 156-315.82 Test Training Demo & Check Point Certified Security Expert - R82 Test Online Engine

If you want to sail through the difficult CheckPoint 156-315.82 Exam, it would never do to give up using exam-related materials when you prepare for your exam. If you would like to find the best certification training dumps that suit you, PrepAwayPDF is the best place to go. PrepAwayPDF is a well known and has many excellent exam dumps that relate to IT certification test. Moreover all exam dumps give free demo download. If you want to know whether PrepAwayPDF practice test dumps suit you, you can download free demo to experience it in advance.

CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q71-Q76):

NEW QUESTION # 71

To which directory does CPTA transfer policy files to the Security Gateway?

- A. \$FWDIR/state/_tmp/FW1
- B. \$CPDIR/state/tmp/FW1
- C. \$FWDIR/state/local/FW1
- D. \$FWDIR/state/_tmp/FW1

Answer: D

Explanation:

CPTA transfers the compiled policy files to the temporary directory \$FWDIR/state/_tmp/FW1 on the Security Gateway, where they are staged before being loaded and enforced by the firewall.

NEW QUESTION # 72

Which statement concerning Network Feeds is most correct?

- A. Network Feeds are generated on external HTTP/HTTPS servers that provides an ability to add custom cyber intelligence feeds into the Access Control engine
- **B. Network Feeds are generated on external HTTP/HTTPS servers that are fetched by Security Gateways**
- C. Network Feeds are the objects manually created in the SmartConsole with a name but no IP address. They are used in security policies and resolve to an IP address locally on each Security Gateway
- D. Network Feeds are external services like Zoom, Office365. Ips are maintained on the Check Point Cloud and objects are automatically synced with the cloud at regular intervals

Answer: B

Explanation:

Network Feeds are dynamically updated lists hosted on external HTTP or HTTPS servers that Security Gateways periodically fetch to automatically retrieve IP addresses or networks, allowing these external threat intelligence feeds to be used directly in policy enforcement.

NEW QUESTION # 73

What is true about the magg1 and Sync interfaces on an ElasticXL Cluster?

- A. magg1 is only available in Maestro and is a disabled and unused port in ElasticXL. Sync is the Sync Port
- B. magg1 is a bonded interface, Sync is also a bonded interface
- C. magg1 is a secondary interface of the Mgmt Port, Sync is the Sync port
- **D. magg1 is a bonded interface, Sync is an individual Sync Port**

Answer: D

Explanation:

In an ElasticXL Cluster, magg1 functions as a bonded management aggregate interface that combines multiple links for management connectivity and redundancy, while the Sync interface is a dedicated individual port used specifically for state synchronization between cluster members.

NEW QUESTION # 74

CoreXL is NOT supported when one of the following features is enabled:

- A. IPS
- B. Route-based VPN
- **C. Overlapping NAT**
- D. IPv6

Answer: C

NEW QUESTION # 75

What does the CPTA (Check Point Transfer Agent) do?

- A. CPTA is the process that finds and downloads licenses and contracts from the UserCenter to the Security Management Server.
- B. CPTA is the agent built into Gaia that downloads new software updates, including JHFAs and major version installation packages.
- **C. CPTA transfers the policy files from the Security Management Server to the Security Gateway for policy installation.**
- D. CPTA communicates with the ThreatCloud to transfer anonymized attack log data and download new signatures.

Answer: C
