ABOUT ADOBE CERTIFIED EXPERT EXAMS

 **Certified Expert**
ADOBE EXPERIENCE MANAGER:
DEVELOPER

To be an Adobe Certified Expert is to demonstrate expertise in helping clients realize value in an Adobe solutions.

Adobe's Certification exams follow industry-accepted procedures to ensure validity and reliability. We work with industry experts to create our exams, which represent real-world requirements and objectives for the job roles we certify.

This guide is designed to provide the recommendations needed to prepare for your Adobe Certified Expert exam, and help you determine when you are ready to take the exam. It will outline the knowledge and skills required of a "minimally qualified candidate" for a specific job role, which will be evaluated in the exam.

What's more, part of that TestkingPass Archer-Expert dumps now are free: https://drive.google.com/open?id=1VNoy1tgnkBhGsHc-_Y1SSowfZFXucqX

With our Archer-Expert practice test software, you can simply assess yourself by going through the Archer-Expert practice tests. We highly recommend going through the Archer-Expert answers multiple times so you can assess your preparation for the Archer-Expert exam. Make sure that you are preparing yourself for the Archer-Expert test with our practice test software as it will help you get a clear idea of the real Archer-Expert exam scenario. By passing the exams multiple times on practice test software, you will be able to pass the real Archer-Expert test in the first attempt.

With the principles of serve first and customers first, we will company you during you whole preparation. We offer you free demo before buying Archer-Expert exam dumps of us, and you can get your downloading link and password when you finish your payment. And you can get them about ten minutes after your payment. What's more, we have free update for one year after purchasing, and the updated version will send to your email automatically. If you have any questions about the Archer-Expert Exam Dumps, you can consult our online service stuff.

Archer-Expert Study Plan | Archer-Expert Valid Test Guide

Some candidates may considerate whether the Archer-Expert exam guide is profession, but it can be sure that the contents of our study materials are compiled by industry experts after them refining the contents of textbooks, they have good knowledge of exam

Archer-Expert test questions also has an automatic scoring function, giving you an objective rating after you take a mock exam to let you know your true level. With Archer-Expert Exam Guide, you only need to spend 20-30 hours to study and you can successfully pass the exam. You will no longer worry about your exam because of bad study materials. If you decide to choose and practice our Archer-Expert test questions, our life will be even more exciting.

Archer Certified Administrator-Expert Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which of the following are automatically assigned by Archer when a new user is created?

- A. One time password, Default Email Address
- **B. Default Security Parameter and Default Access Role**
- C. Default Access Role, Default Email Address
- D. Username, default Security Parameter, and default Access Role

Answer: B

Explanation:

In the Manage Users section of Archer, the platform uses global defaults to ensure that new accounts are created with a baseline security posture. According to the Archer Administration II security module, every new user record is automatically assigned the Default Security Parameter and the Default Access Role defined in the instance settings.

The Security Parameter (Option D) governs password complexity, expiration, and session timeouts. The Default Access Role typically provides very limited "Read" access to ensure the user can at least log in to the workspace, but usually requires further administrative adjustment to grant functional permissions. A Username (Option A) must be manually entered or mapped from LDAP; Archer cannot guess a unique username. Similarly, email addresses and passwords require specific input or integration triggers. By automatically assigning the default Security Parameter and Access Role, Archer ensures that no user is created without essential security governance already in place.

NEW QUESTION # 17

Which of the following is TRUE about limiting the number of records in your search results using the Advanced Search feature?

- A. You cannot limit the number of records in your search results without the use of filters.
- B. You can only limit results to a specific number of records.
- C. You can only limit results to a percentage of the total number of records.
- **D. You can either limit results to a specific number of records or a percentage of the total number of records.**

Answer: D

Explanation:

Archer's Advanced Search provides sophisticated control over how data is returned to the user. Within the search configuration tabs, there is a section dedicated to Result Limits . As detailed in the Archer Administration II search module, this feature is essential for optimizing performance and creating specific types of reports (like "Top 10" or "Bottom 5%").

The administrator has the flexibility to limit the results in two ways:

* Fixed Number: For example, "Show only the first 50 records."

* Percentage: For example, "Show only the top 10% of records."

This is often combined with sorting; if you sort by "Risk Score" descending and limit the results to the top 10 records, you have successfully created a "Top 10 Risks" report. These limits are applied after the filters have narrowed down the dataset but before the data is rendered in the UI or exported. This dual-capability ensures that administrators can build reports that meet precise business requirements, whether they are based on a specific count or a statistical distribution.

NEW QUESTION # 18

Dynamic Filtering can be found in which of the following areas? Select all that apply:

- A. Advanced Search
- **B. Calculated Cross Reference**
- **C. Report Object**
- **D. Record Lookup**

Answer: B,C,D

Explanation:

Dynamic Filtering is a sophisticated feature that allows Archer to filter data based on the context of the current record or the current user. In Archer Administration II, this is highlighted as a tool for improving the user experience by reducing "data noise."

* Record Lookup (A): Allows you to filter the available records in a lookup based on a value in the current record (e.g., only show "Users" that belong to the "Department" selected on the form).

* Calculated Cross Reference (B): Uses dynamic logic to automatically link records based on matching field values.

* Report Object (C): When a report is placed on a record as a "Record-Level Report," Dynamic Filtering ensures the report only shows data related to that specific record (e.g., showing only "Findings" related to "Asset A" when viewing Asset A).

Advanced Search (D) does NOT support Dynamic Filtering in the same "contextual" sense; Advanced Searches use static filters or "Current User" filters, but they do not dynamically react to field values in a specific source record during the search build process like the other three objects.

NEW QUESTION # 19

Which would be an accurate function(s) description for Archer LDAP Synchronization?

- A. None of these answers are correct
- B. Only associates Archer users/groups with domain users/groups
- C. Only creates accounts for new users found on the LDAP server
- D. Updates user profile data and deactivates accounts based on LDAP changes

Answer: D

Explanation:

This question reinforces a critical security concept in Archer Administration II. LDAP Synchronization is not just a "one-time" user creation tool; it is a lifecycle management service. While it does create accounts and associate groups, its most vital ongoing function is the synchronization of state.

If a user's title changes in Active Directory, the next LDAP sync will update that title in Archer, ensuring that reports and workflows based on user attributes remain accurate. Furthermore, if a user is removed from the corporate directory, the LDAP sync identifies them as a "Missing Person" based on the administrator's configuration and can automatically deactivate the Archer account. This automated deactivation is a core compliance requirement for most organizations to ensure that terminated employees lose access to sensitive GRC data immediately. Options A and C are incorrect because they use the word "Only," which ignores the broader, dynamic maintenance capabilities of the service.

NEW QUESTION # 20

What type of Data Feed Transporter would you use to move information from one application into another application within the same Archer instance?

- A. Database Query Transporter
- B. JavaScript Transporter
- C. File Transporter
- D. Archer Web Services Transporter

Answer: D

Explanation:

When moving data between two applications within the same Archer environment (often called an "Archer-to-Archer" feed), the Archer Web Services Transporter is the standard and recommended method. As detailed in the Archer Administration II Data Feed module, this transporter uses Archer's own API (Web Services) to authenticate and "read" a report from the source application. The transporter then passes that data to the Target section of the feed for mapping. Using a Database Query Transporter (Option C) directly against the Archer back-end SQL tables is strongly discouraged and often unsupported because it bypasses the application logic and security layers. The File Transporter (Option B) would require an intermediate step of exporting data to a CSV first. The Web Services Transporter allows for a direct, secure, and API-compliant way to keep data synchronized between internal applications, such as feeding "Findings" from various modules into a centralized "Master Findings" application.

NEW QUESTION # 21

.....

TestkingPass has made these formats so the students don't face issues while preparing for Archer Certified Administrator-Expert (Archer-Expert) certification exam dumps and get success in a single try. The web-based format is normally accessed through browsers. This format doesn't require any extra plugins so users can also use this format to pass Archer Archer-Expert test with pretty good marks.
