- A. Linked Indicators column in incident screen
- B. Linked Incidents column in indicator screen
- **C. Related Incidents column in indicator screen**
- D. Related Indicators column in incident screen

**Answer: C**

#### NEW QUESTION # 157

Which step is required to prepare the virtual desktop infrastructure (VDI) golden image?

- A. Run the VDI conversion tool.
- **B. Review any portable executable (PE) files WildFire determined to be malicious.**
- C. Set the memory dumps to manual setting.
- D. Ensure the latest content updates are installed.

**Answer: B**

#### NEW QUESTION # 158

A Cortex XSOAR customer wants to send a survey to users asking them to input their manager's email for a training use case so the manager can receive status reports on the employee's training. However, the customer is concerned users will provide incorrect information to avoid sending status updates to their manager.

How can Cortex XSOAR most efficiently sanitize user input prior to using the responses in the playbook?

- A. Create a task that sends the survey responses to the analyst via email. If the responses are incorrect, the analyst fills out the correct response in the survey.
- B. Create a conditional task comparison to check if the response contains a valid email address.
- **C. Create a sub-playbook and import a list of manager emails into XSOAR. Use a conditional task comparison to check if the response matches an email on the list. If no matches are found, loop the sub-playbook and send the survey back to the user until a match is found.**
- D. Create a manual task to ask the analyst to validate the survey response in the platform.

**Answer: C**
