Where can the user find the Recycle Bin?

- A. Setup
- **B. App Launcher**

問題 #48

A marketing manager wants to make the Reason Lost field required on the opportunity when the stage is changed to Closed Lost. What should the salesforce associate do to enforce this requirement?

- A. Make the field required on the page layout.
- B. Make the field universally required.
- **C. Create a validation rule on the Opportunity object.**

答案: C

解題說明:

A validation rule on the Opportunity object is the best way to enforce the requirement that the Reason Lost field is required when the stage is changed to Closed Lost. A validation rule can specify a condition and an error message to display when the condition is not met. For example, the condition could be AND (ISPICKVAL(StageName, "Closed Lost"), ISBLANK(Reason_Lost__c)) and the error message could be

"Please enter a reason for losing the opportunity." Making the field required on the page layout or universally required would not work, because the field should only be required when the stage is changed to Closed Lost, not for other stages.
