C_S4PM2_2507 최신버전 인기 덤프자료, C_S4PM2_2507 최신버전 덤프 공부

DumpTOP는 여러분의 꿈을 이루어줄 뿐만 아니라 일년 무료 업데이트 서비스도 따릅니다. DumpTOP에서 제공하는 덤프로 여러분은 1000% 시험을 패스하실 수 있고 SAP C_S4PM2_2507 자격증을 취득하실 수 있습니다. 지금 바로 사이트에서 SAP C_S4PM2_2507 덤프 데모 즉 덤프의 일부 문제와 답을 다운 받으셔서 체험하실 수 있습니다.

최신 SAP Certified Associate C_S4PM2_2507 무료 샘플문제 (Q78-Q83):

질문 # 78

How do you define the term Organizational Change Management?

- A. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with intended business benefits.

- B. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a current to a future state with focus on the added value for the impacted users.
- C. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with focus on the added value for the impacted users.
- D. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state with intended business benefits.

정답: D

질문 # 79

What findings do you document in the Explore Phase Fit-to-standard workshops? Note: There are 3 correct answers to this question.

- A. Process models
- B. Key user documentation
- C. Key business decisions
- D. Detailed design of extensions
- E. Confirmation of scope

정답: A,C,E

설명:

During the Explore Phase of the SAP Activate methodology, Fit-to-Standard workshops are conducted to validate the predefined SAP Best Practices business processes against the customer's business requirements.

The goal is to confirm the project scope, identify necessary configurations, and document key decisions and findings.

A). Detailed design of extensions

Detailed design activities are not part of the Explore Phase. These tasks are performed later during the Realize Phase, after the Fit-to-Standard workshops have been completed and the requirements have been validated.

Therefore, documenting detailed extension designs does not occur at this stage.

B). Key user documentation

Key user documentation is created later in the project, typically during testing or training preparation phases.

It is not an output of the Fit-to-Standard workshops and is therefore not documented during the Explore Phase.

C). Confirmation of scope

Confirmation of scope is a critical output of the Fit-to-Standard workshops. During these sessions, the project team verifies which SAP Best Practices processes are in scope and confirms that the defined scope aligns with the agreed project objectives. Any deviations or required adjustments are documented for follow-up.

D). Key business decisions

Fit-to-Standard workshops also result in documenting key business decisions that affect how standard processes will be used or adapted. These include process ownership decisions, master data responsibilities, and whether certain optional features or process variants will be implemented.

E). Process models

The business process models from SAP Best Practices are reviewed and discussed in the workshops. Any required adjustments, confirmations, or accepted changes are documented to ensure a clear understanding of the end-to-end processes to be implemented.

질문 # 80

What should you do if you encounter an issue with the "RISE with SAP system transition workbench"? Note: There are 3 correct answers to this question.

- A. Check for Version Updates
- B. Create an SAP Incident
- C. Review Known Limitations
- D. Perform Manual Database Synchronization
- E. Utilize the Built-in AI Assistant

정답: B,C,E

질문 # 81

Which technologies should you use to integrate SAP S/4HANA Cloud Private Edition with an SAP public cloud solution? Note: There are 2 correct answers to this question.

- A. SAP Integration Suite
- B. SAP Process Orchestration
- C. SAP HANA Cloud
- D. SAP Connectivity service

정답: A,D

질문 # 82

Which technologies should you use to integrate SAP S/4HANA Cloud Private Edition with an SAP public cloud solution? Note: There are 2 correct answers to this question.

- A. SAP Integration Suite
- B. SAP Process Orchestration
- C. SAP HANA Cloud
- D. SAP Connectivity service

정답: A,D

설명:

Step 1 - Understanding the Question

The question asks which technologies are used to integrate SAP S/4HANA Cloud, Private Edition with SAP public cloud solutions (for example, SAP SuccessFactors, SAP Ariba, SAP Concur, or SAP Business Network).

SAP recommends cloud-native integration technologies that support secure, scalable, and managed connectivity between private and public cloud systems.

Step 2 - Evaluate Each Option

A). SAP Process Orchestration

* SAP Process Orchestration (PO) is an on-premise middleware combining Process Integration (PI) and Business Process Management (BPM).

* It is not part of SAP's recommended integration architecture for cloud-to-cloud scenarios.

* SAP Integration Suite has replaced PO for modern cloud integrations.

Result: Incorrect - Legacy tool, not used for cloud integration.

B). SAP HANA Cloud

* SAP HANA Cloud is a database-as-a-service, not an integration platform.

* It stores and processes data but does not handle integration flows or connectivity between cloud solutions.

Result: Incorrect - Not used for system-to-system integration.

C). SAP Connectivity service

* The SAP Connectivity service is part of SAP Business Technology Platform (BTP).

* It enables secure communication between SAP BTP applications (including SAP Integration Suite) and on-premise or private systems like SAP S/4HANA Cloud, Private Edition.

* It provides the tunnel connection and secure channel required for data exchange between systems hosted in different environments.

Result: Correct - Used for secure connection between SAP BTP and Private Edition systems.

D). SAP Integration Suite

* SAP Integration Suite (part of BTP) is SAP's strategic cloud integration platform.

* It provides capabilities such as:

* API management

* Cloud integration (iFlows)

* Event mesh for event-driven communication

* Connectivity with public cloud and on-premise systems

* It is the primary tool for integrating SAP S/4HANA Cloud (Private or Public) with other SAP cloud solutions.

Result: Correct - Core integration technology for hybrid and cloud landscapes.

질문 # 83
