The CISM Certification is a highly respected certification in the field of information security management. It validates the skills and knowledge of professionals in the industry and provides a competitive edge. The CISM exam covers four domains and is designed to test the candidate's understanding of information security governance, risk management and compliance, information security program development and management, and information security incident management. Certified Information Security Manager certification is ideal for professionals who want to advance their careers in the field of information security management and take on leadership roles.

## ISACA Certified Information Security Manager Sample Questions (Q174-Q179):

### NEW QUESTION # 174

Which of the following BEST prepares an organization for disaster recovery?

- A. An incident response policy
- B. Failover testing
- C. Penetration testing
- D. Help desk training

**Answer: A**

### NEW QUESTION # 175

Which of the following is MOST important to include in an incident response plan to ensure incidents are responded to by the appropriate individuals?

- A. A detailed incident notification process
- B. Skills required for the incident response team
- C. A list of external resources to assist with incidents
- D. Service level agreements (SLAs)

**Answer: A**

### NEW QUESTION # 176

Which of the following actions should be taken when an information security manager discovers that a hacker is foot printing the network perimeter?

- A. Enable server trace logging on the DMZ segment
- B. Check IDS logs and monitor for any active attacks
- C. Reboot the border router connected to the firewall
- D. Update IDS software to the latest available version

**Answer: B**

Explanation:

Information security should check the intrusion detection system (IDS) logs and continue to monitor the situation. It would be inappropriate to take any action beyond that. In fact, updating the IDS could create a temporary exposure until the new version can be properly tuned. Rebooting the router and enabling server trace routing would not be warranted.

### NEW QUESTION # 177

Which of the following is the BEST indication that an organization has integrated information security governance with corporate governance?

- A. Security performance metrics are measured against business objectives.
- B. Service levels for security vendors are defined according to business needs.
- C. Impact is measured according to business loss when assessing IT risk.
- D. Security policies are reviewed whenever business objectives are changed.

**Answer: A**

### NEW QUESTION # 178

What is the MOST important item to be included in an information security policy?

- A. The definition of roles and responsibilities
- B. Reference to procedures and standards of the security program
- C. The key objectives of the security program
- D. The scope of the security program

**Answer: C**

Explanation:

**Explanation/Reference:**

Explanation:

Stating the objectives of the security program is the most important element to ensure alignment with business goals. The other choices are part of the security policy, but they are not as important.

### NEW QUESTION # 179

• • • • •
