Peoplecert ITIL-4-Practitioner-Release-Management試験関連赤本 & ITIL-4-Practitioner-Release-Management前提条件

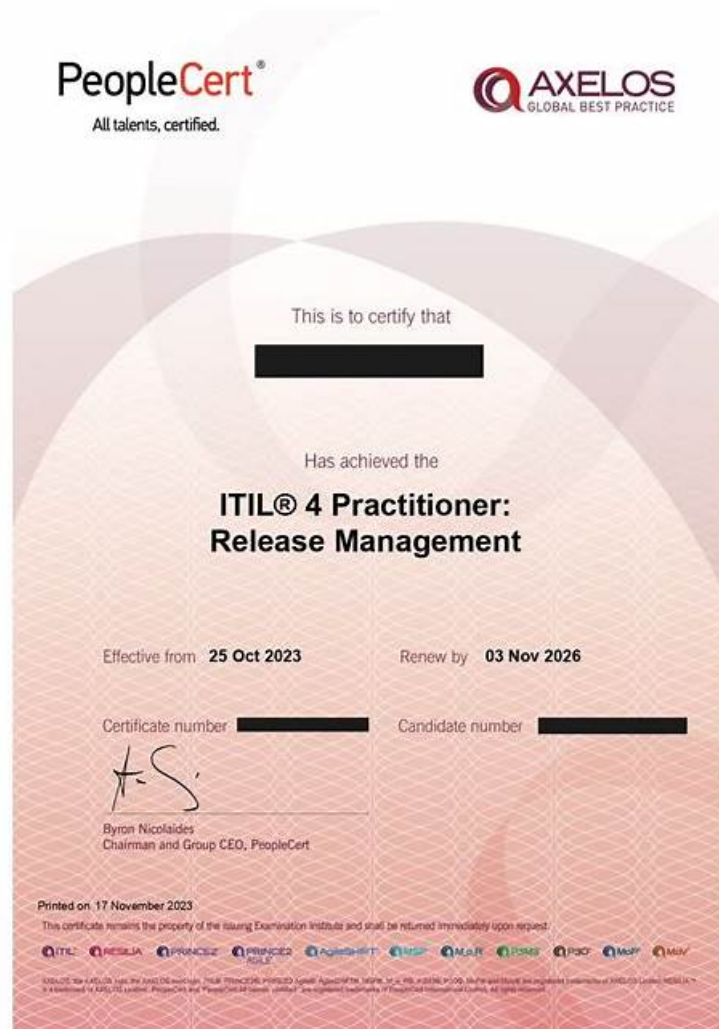

ちなみに、JPNTest ITIL-4-Practitioner-Release-Managementの一部をクラウドストレージからダウンロードできます：https://drive.google.com/open?id=1bMiNz0iMooiMtzvuFuqmCEIugZl9oJKm

優れた学習プラットフォームには、豊富な学習リソースがあるだけでなく、最も本質的なものが非常に重要であり、ユーザーにとって最も直感的なものも不可欠です。ITIL-4-Practitioner-Release-Managementテスト資料はプロの編集チームであり、各テスト製品のレイアウトと校正の内容は経験豊富なプロが実施するため、細かい組版と厳格なチェックのエディターにより、最新のITIL-4-Practitioner-Release-Management試験トレントが各ユーザーのページに表示されます更新し、あらゆる種類のITIL-4-Practitioner-Release-Management学習教材の精度が非常に高いことを保証します。

今日、社会での競争はより激しく、専門知識がなければ競争で有利な地位を占めることができず、除かれることもあります。テストITIL-4-Practitioner-Release-Management認定に合格すると、一部の分野で有能になり、労働市場で競争上の優位性を獲得できます。ITIL-4-Practitioner-Release-Management学習教材を購入すると、ITIL-4-Practitioner-Release-Managementテストにスムーズに合格します。当社Peoplecertの製品は多くの利点を高め、テストの準備をするのに最適です。ITIL-4-Practitioner-Release-Management学習準備は、一流の専門家チームによってコンパイルされ、実際の試験と密接にリンクしています。

検証する-完璧なITIL-4-Practitioner-Release-Management試験関連赤本試験-試験の準備方法ITIL-4-Practitioner-Release-Management前提条件

ここで無料にJPNTestが提供したPeoplecertのITIL-4-Practitioner-Release-Management試験の部分練習問題と解答をダウンロードできて、一度JPNTestを選ばば、弊社は全力に貴方達の合格を頑張ります。貴方達の試験に合格させることができないと、すぐに全額で返金いたします。

Peoplecert ITIL-4-Practitioner-Release-Management 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• サービス設計：このセクションでは、ITリリースマネージャーのスキルを評価し、実用的で有用であり、ステークホルダーの期待に応えるサービスと製品の設計に関わる原則と実践を網羅します。組織とそのパートナーが効果的にサービスを提供し、サポートできるように設計されていることに重点を置いています。
トピック 2	• 変更：このセクションでは、DevOpsエンジニアのスキルを評価し、IT環境における変更の管理と制御方法に焦点を当てます。変更の計画、実行、監視、伝達、そして関係者への変更の進捗状況と影響に関する継続的な情報提供など、業務の中断を最小限に抑えることが重要です。
トピック 3	• AIと自動化：このセクションでは、IT運用マネージャーのスキルを評価し、ユーザーニーズに合ったITシステムとアプリケーションの提供におけるAIと自動化の活用について検証します。最新のツールとインテリジェントテクノロジーを活用し、ソフトウェアリリースが品質基準を満たし、期限通りに、そして予算内で提供されることを保証します。

Peoplecert ITIL 4 Practitioner: Release Management Exam 認定 ITIL-4-Practitioner-Release-Management 試験問題 (Q10-Q15):

質問＃10
A release manager has noticed that the organization has many standardized services provided to international organizations. Which aspect of release management will this situation directly affect?

- A. The release plans
- B. Continuous delivery
- C. Continuous integration
- D. The release models

正解：D

解説：
Standardized services provided to international organizations imply a need for consistency and scalability in how releases are managed across diverse contexts. The ITIL 4 Practitioner: Release Management document explains that release models are used to standardize the approach to releases:"Release models define the structure, contents, and schedule of releases... They ensure consistent and repeatable processes, which is particularly important for organizations with standardized services"(Section 3.2.2).
* Option A (The release plans) refers to specific plans for individual releases, which may be affected indirectly but are not the primary aspect impacted by standardization needs.
* Option B (Continuous integration) and Option C (Continuous delivery) are development practices that may interact with release management but are not directly affected by the need for standardization across international services.
* Option D (The release models) is directly affected, as standardized services require well-defined release models to ensure consistency, repeatability, and scalability across international contexts.
The situation directly impacts the design and application of release models to accommodate standardized services globally. Thus, the correct answer is D.

質問 # 11
What is MOST LIKELY to affect how significantly an organization's release management activities are dependent on partners and suppliers?

- A. The amount of automation in the release management practice
- B. The knowledge level of the organization's users
- C. The source of the organization's products and technology solutions
- D. The maturity of the release management practice

正解： C

解説：
The dependency on partners and suppliers in release management is influenced by the extent to which an organization relies on external products or services. TheITIL 4 Practitioner: Release Management document explains:"The source of the organization's products and technology solutions significantly affects the dependency on partners and suppliers, as reliance on externalsoftware, hardware, or services increases the need for coordination during releases"(Section 3.4).
* Option A (The knowledge level of users) impacts user adoption but not the dependency on suppliers for release activities.
* Option B (The maturity of the practice) affects internal efficiency, not the structural dependency on external parties.
* Option C (The amount of automation) influences how releases are executed but doesn't determine the dependency on suppliers.
* Option D (The source of products and technology solutions) directly determines how much the organization relies on external parties, affecting release management dependency.
The correct answer is D, as the source of technology solutions most significantly impacts supplier dependency.

質問 # 12
An organization manually checks that releases of new or changed products/services have been successfully completed. Which tools should be used to automate this process?

- A. Analysis and reporting tools
- B. Monitoring and event management tools
- C. Enterprise architecture tools
- D. Workflow management and collaboration tools

正解： B

解説：
Automating the verification of release success involves tracking the performance and stability of the released services. TheITIL 4 Practitioner: Release Managementdocument notes:"Monitoring and event management tools can automate the verification of release success by tracking system performance and detecting anomalies post-release, ensuring the release meets its objectives"(Section 4.2).
* Option A (Monitoring and event management tools) is correct, as these tools can automatically check system health and performance after a release, replacing manual checks.
* Option B (Workflow management and collaboration tools) focuses on process coordination, not post- release verification.
* Option C (Enterprise architecture tools) is used for dependency mapping, not release verification.
* Option D (Analysis and reporting tools) provides retrospective insights but doesn't automate real-time verification.
The correct answer is A, as monitoring tools are best suited for automating release verification.

質問 # 13
A service provider is reviewing its release management practice. It has been found that most releases meet their objectives and are delivered on time. However, teams and organizations using the service provider's services are complaining that sometimes software updates interrupt their work during peak business hours.
What should the service provider do to improve the release management practice by applying the 'collaborate and promote visibility' guiding principle?

- A. Optimize the practice for the value streams
- B. Review the effectiveness of release models
- C. Do not overcomplicate the practice
- D. Ensure an excellent user experience

正解：**D**

解説：
The 'collaborate and promote visibility' guiding principle in ITIL 4 emphasizes working with stakeholders to ensure transparency and alignment with their needs. TheITIL 4 Practitioner: Release Management document advises:"Applying the 'collaborate and promote visibility' principle involves working closely with stakeholders, such as service consumers, to understand their needs and ensure releases do not disrupt their operations, thereby ensuring an excellent user experience"(Section 5.1).
* The issue is that updates interrupt work during peak hours, indicating a lack of collaboration with users to understand their schedules and needs.
* Option A (Ensure an excellent user experience) directly addresses this by implying collaboration with users to schedule releases at non-disruptive times, aligning with the principle.
* Option B (Review the effectiveness of release models) is an internal activity and doesn't directly involve collaboration with stakeholders.
* Option C (Optimize the practice for the value streams) focuses on value stream efficiency but doesn't specifically address user collaboration.
* Option D (Do not overcomplicate the practice) is unrelated to the collaboration principle.
The correct answer is A, as ensuring an excellent user experience through collaboration directly applies the principle to address the issue.

質問 # 14
A service provider is conducting a capability assessment of the release management practice. It has been found that although the practice's performance is regularly reported and reviewed, most recommendations based on the reports are never implemented. What is the MAXIMUM capability level that could be given to the release management practice?

- A. Level 4
- B. Level 2
- C. Level 5
- D. Level 3

正解：**B**

解説：
The ITIL capability model assesses practices based on their maturity and ability to improve. TheITIL 4 Practitioner: Release Managementdocument outlines the capability levels:"Level 2 (Managed) indicates that the practice is planned and tracked, with performance regularly reported. Level 3 (Defined) requires standardized processes and the ability to improve based on feedback. If recommendations from performance reviews are not implemented, the practice cannot achieve Level 3"(Section 5.2).
* The scenario indicates that performance is reported and reviewed (meeting Level 2 requirements), but recommendations are not implemented, meaning there's no improvement or standardization beyond basic management.
* Level 3 requires consistent improvement and standardization, which is not met due to the lack of implementation.
* Levels 4 (Quantitatively Managed) and 5 (Optimizing) require even higher maturity, including data- driven improvements and continuous optimization, which are not applicable here.
The maximum capability level is A (Level 2), as the practice is managed but not improving.

質問 # 15
......

テストITIL-4-Practitioner-Release-Managementの認定に合格すると、あなたの就労能力が社会から認められ、良い仕事を見つけることができます。 ITIL-4-Practitioner-Release-Managementクイズトレントを習得して試験に合格した場合。同僚、上司、親relative、友人、社会から尊敬されます。総じて、ITIL-4-Practitioner-Release-Managementテスト準備を購入すると、試験に合格するだけでなく、キャリアと将来についての夢を実現するのに役立ちます。ですから、ITIL-4-Practitioner-Release-Management試験の教材を購入してすぐに行動を起こすことをheしないでください。
