The Designing Cisco Enterprise Wireless Networks (300-425) certification is a valuable credential that every Cisco professional should earn it. The 300-425 certification exam offers a great opportunity for beginners and experienced professionals to demonstrate their expertise. With the Designing Cisco Enterprise Wireless Networks (300-425) certification exam everyone can upgrade their skills and knowledge. There are other several benefits that the Cisco 300-425 exam holders can achieve after the success of the Designing Cisco Enterprise Wireless Networks (300-425) certification exam.

The Cisco 300-425 exam consists of 60-70 multiple-choice questions that must be completed within 90 minutes. It is conducted by Pearson VUE, a leading provider of computer-based testing and assessment services. To pass the exam, candidates must score at least 750 out of 1000 points. 300-425 Exam Fee is \$300, and it can be taken at any Pearson VUE testing center worldwide.

Exam 300-425 Discount | 300-425 Valid Test Tips

We are committed to helping you pass the exam, and you can pass the exam just one time by using 300-425 exam materials of us. 300-425 exam braindumps contain both questions and answers, so that you can have a convenient check after finish practicing. And we offer you free demo for you to have a try before buying 300-425 Exam Materials, so that you can have a better understanding of what you are going to buy. In addition, we are pass guarantee and money back guarantee if you fail to pass the exam. We have online and offline service, and if you are bothered by any questions for 300-425 exam braindumps, you can consult us.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q110-Q115):

NEW QUESTION # 110

A network engineer is preparing for an office site survey with a height of 2.5 meters. Which three components are recommended to complete the survey? (Choose three.)

- A. Use a drawing of the office space to draw AP and client placements.
- B. Use a battery pack to power APs.
- C. Use DoS attack on APs while measuring the throughput.
- D. Use APs with directional antennas.
- E. Use APs with built-in antennas.
- F. Use APs with external antennas.

Answer: A,B,E

Explanation:

Section: Wireless Site Survey

NEW QUESTION # 111

A customer uses a Cisco 5520 WLC that is connected via a single 10-GB interface to manage the wireless network. The wireless network includes 500 APs for the campus network. The customer wants to add 300 APs and is concerned about traffic load and lack of redundancy. The purchase of a second controller is not an option. Which design approach mitigates the customer concerns?

- A. Implement a vWLC and configure N+1 redundancy with the WLC.
- B. Connect a second 10-GB interface on the WLC and implement LAG.
- C. Connect a second 10-GB interface on the WLC and set the port as a secondary port.
- D. Implement a vWLC and configure SSO with the WLC.

Answer: B

NEW QUESTION # 112

A network engineer is configuring high availability on an access point. What is the maximum number of controllers that can be configured?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

When configuring high availability on an access point, a network engineer can configure a maximum of two controllers. One serves as the primary controller, and the other serves as the secondary controller.

NEW QUESTION # 113

A wireless engineer is designing a wireless network to support real-time applications over wireless. Which IEEE protocol must the engineer enable on the WLC so that the number of packets that are exchanged between an access point and client are reduced and fast roaming occurs?

- A. 802.11k
- B. 802.11r
- C. 802.11w
- D. 802.11i

Answer: A

Explanation:

802.11r reduces the number of packets that are exchanged between the client and an AP. The client preauthenticates to the AP it will roam to before actually roaming. This means the roam itself occurs faster because the AP already has the client authentication credentials cached, resulting in fewer packets required between the client and the AP.

NEW QUESTION # 114

What causes the most signal attenuation, based on the wireless design tools?

- A. glass wall
- B. cinder block wall
- C. office window
- **D. metal door**

Answer: D

Explanation:

It is important to note that metal chair legs and desk components will interact with the antenna of the AP and change the pattern of the radiation. Surveying the results of placement decisions with a good tool is necessary

NEW QUESTION # 115

.....

Our 300-425 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our 300-425 study materials. For instance, PC version of our 300-425 training quiz is suitable for the computers with the Windows system and supports the MS Operation System. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our 300-425 learning guide at any time.
