Mule-Dev-201 Pdf Format, Sample Mule-Dev-201 Test Online

Mule-Dev-201 questions & answers are valid, covering the whole chapter in the actual test and the key points. You can take Mule-Dev-201 pdf torrent as your study reference.After you get the Mule-Dev-201 exam dumps, do not worry about the update, because one year free update is provided to you. Please pay attention to your payment email and check if there is any Mule-Dev-201 Updated Dumps. Dear, if you have any questions about Mule-Dev-201 study torrent, you can contact us by email or online chat as you like. In addition, we have money back guarantee, in case of failure, we will give you full refund.

The curtain of life stage may be opened at any time, the key is that you are willing to show, or choose to avoid. Most of People who can seize the opportunityin front of them are successful. So you have to seize this opportunity of ValidBraindumps. Only with it can you show your skills. ValidBraindumps Salesforce Mule-Dev-201 Exam Training materials is the most effective way to pass the certification exam. With this certification, you will achieve your dreams, and become successful.

2026 Mule-Dev-201 Pdf Format | Pass-Sure Mule-Dev-201: Salesforce Certified MuleSoft Developer 100% Pass

Free demo for Mule-Dev-201 training materials is available, and you can have a try before buying ,so that you can have a deeper understanding of what you are going to buy. We recommend you have a try before buying. In addition, Mule-Dev-201 exam materials contain most of knowledge points of the exam, and you can master major knowledge points as well as improve your professional ability in the process of learning. We also pass guarantee and money back guarantee for Mule-Dev-201 Training Materials , if you fail to pass the exam in your first attempt, we will give you full refund ,and no other questions will be asked.

Salesforce Certified MuleSoft Developer Sample Questions (Q13-Q18):

NEW QUESTION # 13
Refer to the exhibit.
☐
The main flow contains a Flow Reference for the child flow.
What
values are accessible in the child flow after a web client submits a request to http://localhost:8Q81/order?
color=red?

- A. payloadquantity var
- B. payload
- C. payloadquantity var color query param
- D. payloadcolor query param

Answer: C

Explanation:
Flow Reference Component

Flow Reference routes the Mule event to another flow orsubflow, executes all processors in the referenced flow, and then routes the event back within the same Mule application. The following diagram shows the order of processing when one flow references another:

When the main flow is triggered, the Muleevent travels through and executes the flow until the event reaches the Flow Reference. The event then travels through and executes the referenced flow from beginning to end, and then returns to the main flow. This process enables you to treat the entire referenced flow like a single component in your current flow.

Mule Ref Doc : https://docs.mulesoft.com/mule-runtime/4.3/flowref-about Correct answer is

* payload
* quantityvar
* colorquery param

NEW QUESTION # 14

There are three routes configured for Scatter-Gather and incoming event has a payload is an Array of three objects. How routing will take place in this scenario?

- A. Incoming array objects would be split into three and each part would be sent to one route each in parallel
- B. Incoming array objects would be split into three and each part would be sent to one route each in sequential manner
- C. Entire event would be sent to each route sequentially
- D. Entire event would be sent to each route in parallel

Answer: D

Explanation:
Entire event would be sent to each route in parallel.
Scatter-Gather works as follows :
- TheScatter-Gather component receives a Mule event and sends a reference of this Mule event to each processing route.
- Each of the processing routes starts executing in parallel. After all processors inside a route finish processing, the route returns a Muleevent, which can be either the same Mule eventwithout modifications or a new Mule event created by the processors in the route as a result of the modifications applied.
- After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

NEW QUESTION # 15

Mule application contains ActiveMQ JMS dependency. Mule application was compiled and run successfully in Anypoint Studio. The mule application must now beexported from Anypoint Studio and shared with other developer. What export options should be selected to create the smallest JAR file that can be imported into other developer's Anypoint Studio and run successfully?

- A. Select the Include project modules and dependencies option only
- B. De-select both Attach Project Sources and Include project modules and dependencies option
- C. Select both Attach Project Sources and Include project modules and dependencies option
- D. Select only Attach Project Sources only

Answer: D

Explanation:
Correct answer is Select only Attach Project Sources only
You must keep the Attach Project Sources option selected to be able to import the packaged JAR file back into a Studio workspace.
Deselect the Include project modules and dependencies option.
This option skips bundling the actual modules and external dependencies required to run the Mule application in a Mule runtime engine, creating a lightweight JAR file package that does not include any dependencies specified in the Mule application's pom.xml file.
The generated JAR file is not a functional deployable archive and cannot be deployed to a Mule runtime engine, but instead offers a way to archive only the source files that make up the Mule application. This is the same as using the -lightWeightPackage flag when packaging using the Mule Maven Plugin and is useful if you want to distribute your project to other Studio installations because it only keeps a reference to all its dependencies. When you import a lightweight package into Studio, all your dependencies are automatically downloaded MuleSoft Doc Ref : https://docs.mulesoft.com/studio/7.8/import-export-packages

NEW QUESTION # 16

Refer to the exhibits.

In the requestFlow an HTTP Request operation is configured to send an HTTP request with an XML payload.

The request is sent to the HTTP Listener in the transform Flow.

That flow transforms the incoming payload into JSON format and returns the response to the HTTP request.

The response of the request is stored in a target variable named the Result.

What is the payload at the Logger component after the HTTP Request?

- **A. The original XML payload**
- B. A non-empty Java object
- C. null
- D. The returned JSON response

Answer: A

NEW QUESTION # 17

Refer to the exhibit.

The error occurs when a project is run in Anypoint Studio. The project, which has a dependency that is not in the MuleSoft Maven repository, was created and successfully run on a different computer.

What is the next step to fix the error to get the project to run successfully?

- A. Deploy the dependency to MuleSoft's Maven repository
- **B. Install the dependency to thecomputer's local Maven repository**
- C. Add the dependency to the MULE_HOME/bin folder
- D. Edit the dependency in the Mule project's pom.xml file

Answer: B

Explanation:

As dependency is not present in Mulesoft Maven repository, we need to install the dependency on computer's local Maven repository.
