最新的 ISO/IEC 27001 ISO-IEC-27001-Foundation 免費考試真題 (Q49-Q54):

問題 #49
To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Only staff with accountability for ISMS operation
- B. Relevant personnel and relevant interested parties
- C. Employees within the scope of the ISMS
- D. Top management

答案：B

解題說明：
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:
Annex A.5.1 (Policies for information security) clearly specifies:
"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: allrelevant personnel and relevant interested partiesmust be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer isD.

問題 #50
Which statement describes a requirement for information security objectives?

- A. They shall be consistent with the information security policy
- B. They shall all be measurable
- C. They shall be reviewed at least annually
- D. They shall be contractually transferred to third parties

答案：A

解題說明：
Clause 6.2 (Information security objectives) requires that objectives:
* "be consistent with the information security policy"
* "be measurable (if practicable)"
* "take into account applicable information security requirements"

* "be monitored, communicated, and updated as appropriate."
From this, option A is correct since consistency with policy is an explicit requirement. Option B is incorrect because the standard allows objectives to be measurable "if practicable" (not mandatory for all). Option C is incorrect-objectives are not transferred contractually to third parties, though third-party agreements may include security requirements. Option D is incorrect because the standard requires regular review "as appropriate," not a fixed annual cycle.
Thus, the verified requirement isA: They shall be consistent with the information security policy.

問題 #51
What is required to be reported by the Information security event reporting control?

- A. Asset disposal
- B. Unauthorized access
- C. Information disclosure
- D. Observed or suspected events

答案：D

解題說明：
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:
Annex A, control 6.8 (Information security event reporting) specifies:
"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers"observed or suspected events."Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.
Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).
Therefore, the verified correct answer isD: Observed or suspected events.

問題 #52
Identify the missing word(s) in the following sentence.
When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- A. apply competent resources to
- B. improve the effectiveness of
- C. evaluate the effectiveness of
- D. communicate

答案：C

解題說明：
Clause 6.1.1 (Planning) states:
"The organization shall plan:
d) actions to address these risks and opportunities; and
e) how to:
* integrate and implement the actions into its ISMS processes; and
* evaluate the effectiveness of these actions."
This confirms the missing words are"evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

問題 #53
What is the definition of a threat according to ISO/IEC 27000?

- A. The risk remaining after risk treatment
- B. A single or a series of unwanted or unexpected information security events
- C. A weakness of an asset or a control that can be exploited
- D. A potential cause of an unwanted incident which can result in harm to a system or organization

答案：D

解題說明：

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, athreatis defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause

6.1.2). Thus, the correct definition per ISO/IEC 27000 isA.
