The answers of Actual4Cert's exercises is 100% correct and they can help you pass Cisco Certification 300-725 Exam successfully. You can free download part of practice questions and answers of Cisco certification 300-725 exam online as a try.

Additionally, the exam covers the integration of Cisco Web Security Appliance with other security solutions, such as email security and cloud security. This includes understanding how to configure and manage the Cisco Web Security Appliance in a multi-layered security environment to ensure comprehensive protection against cyber threats.

## Cisco Securing the Web with Cisco Web Security Appliance Sample Questions (Q22-Q27):

### NEW QUESTION # 22

Which information in the HTTP request is used to determine if it is subject to the referrer exceptions feature in the Cisco WSA?

- A. version
- **B. header**
- C. payload
- D. protocol

**Answer: B**

Explanation:

Explanation

Requests for embedded content usually include the address of the site from which the request originated (this is known as the "referrer" field in the request's HTTP header). This header information is used to determine categorization of the referred content.
