

# 300-620 Exam Questions Vce, 300-620 Reliable Exam Practice

## QUESTION 1

An engineer is extending EPG connectivity to an external network. The external network houses the Layer 3 gateway and other end hosts. Which ACI bridge domain configuration should be used?

- A. Forwarding: Custom L2 Unknown Unicast; Hardware Proxy L3 Unknown Multicast Flooding: Flood Multi Destination Flooding; Flood in BD ARP Flooding: Enabled
- B. Forwarding: Custom L2 Unknown Unicast; Flood L3 Unknown Multicast Flooding: Flood Multi Destination Flooding; Flood in BD ARP Flooding: Enabled
- C. Forwarding: Custom L2 Unknown Unicast; Hardware Proxy L3 Unknown Multicast Flooding: Flood Multi Destination Flooding; Flood in BD ARP Flooding: Disabled
- D. Forwarding: Custom L2 Unknown Unicast; Flood L3 Unknown Multicast Flooding: Flood Multi Destination Flooding; Flood in BD ARP Flooding: Disabled

Correct Answer: B

## QUESTION 2

What is the purpose of the Overlay Multicast TEP in a Cisco ACI Multi-Site deployment?

- A. to source and receive unicast VXLAN data plane traffic
- B. to establish MP-BGP EVPN adjacencies with the spine nodes in remote sites
- C. to encapsulate multicast traffic in a common multicast group
- D. to perform head-end replication for BUM traffic

Correct Answer: D

Overlay Multicast TEP (O-MTEP): This common anycast address is shared by all the spine nodes in the same site and is used to perform head-end replication for BUM traffic. BUM traffic is sourced from the O-UTEP address defined on the local spine nodes and destined for the O-MTEP of remote sites to which the given bridge domain is being stretched.

## QUESTION 3

A Cisco ACI leaf switch learns the source IP address of a packet that enters the front panel port of the switch. Which bridge domain setting is used?

- A. ARP Flooding
- B. L3 Unknown Multicast Flooding - Flood

Our braindumps for 300-620 real exam are written to highest standard of technical profession, tested by our senior IT experts and certified trainers. You can totally trust our 300-620 exam prep materials because we guarantee the best quality of our products. With our latest 300-620 Training Materials, you will pass the certification exam in your first try. We hope you clear exam successfully with our products.

Cisco 300-620 Exam covers a wide range of topics, including ACI fabric infrastructure, policies, virtualization, automation, and network services. 300-620 exam is designed to test one's knowledge and skills in deploying and configuring ACI fabric, implementing policies for application and network services, configuring virtualization, and automating network tasks. It is a comprehensive exam that requires a deep understanding of the technology and its associated concepts.

To prepare for the Cisco 300-620 exam, it is recommended that candidates take the Implementing Cisco Application Centric Infrastructure (DCACI) course. This course provides in-depth knowledge of ACI architecture, fabric discovery, and policy-driven application profiles. Additionally, candidates can also use Cisco's official study materials and practice exams to prepare for the exam. With the right preparation and hard work, passing the Cisco 300-620 Exam can be a significant step in advancing your career in network infrastructure and data center management.

## Quiz 2026 Cisco Perfect 300-620: Implementing Cisco Application Centric Infrastructure Exam Questions Vce

Based on the credibility in this industry, our 300-620 study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. The system of 300-620 test guide will keep track of your learning progress in the whole course. Therefore, you can have 100% confidence in our 300-620 exam guide. According to our overall evaluation and research, seldom do we have cases that customers fail the 300-620 Exam after using our study materials. But to relieve your doubts about failure in the test, we guarantee you a full refund from our company by virtue of the related proof of your report card. Of course you can freely change another 300-620 exam guide to prepare for the next exam. Generally speaking, our company takes account of every client' difficulties with fitting solutions.

### Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q275-Q280):

#### NEW QUESTION # 275

An engineer is implementing a Cisco ACI environment that consists of more than 20 servers. Two of the servers support only Cisco Discovery Protocol with no order link discovery protocol. The engineer wants the servers to be discovered automatically by the Cisco ACI fabric when connected. Which action must be taken to meet this requirement?

- A. Configure a higher order interface policy that enables Cisco Discovery Protocol for the interface on the desired leaf switch.
- B. Create an interface profile for the interface that disables LLDP on the desired switch that is referenced by the interface policy group.
- C. Create an override policy that enables Cisco Discovery Protocol after LLDP is enabled in the default policy group.
- D. Configure a lower order policy group that enables Cisco Discovery Protocol for the interface on the desired leaf switch.

**Answer: C**

Explanation:

A leaf interface override policy allows interfaces that have interface policy group assignments to apply an alternate interface policy group.

Imagine that a group of ports have been configured on Node 101, using a specific interface policy group.

One of the interfaces connects to a firewall, and security policies dictate that LLDP and CDP toward the firewall need to be disabled on all firewall-facing interfaces.

It might be impossible to modify the interface policy group associated with the port because it might be part of a port block.

In this case, a leaf interface override can be used to assign an alternative interface policy group to the port of interest.

#### NEW QUESTION # 276

What do Pods use to allow Pod-to-Pod communication in a Cisco ACI Multi-Pod environment?

- A. over Layer 3 directly connected back-to-back spines
- B. over Layer 3 Out connectivity via border leafs
- C. over Layer 3 IPN connectivity via spines
- D. over Layer 3 IPN connectivity via border leafs

**Answer: C**

Explanation:

#### NEW QUESTION # 277

Refer to the exhibit A customer must back up the current Cisco ACI configuration securely to the remote location using encryption and authentication. The backup job must run once per day The customer s security policy mandates that any sensitive information

including passwords, must not be exported from the device Which set of steps meets these requirements?

- A. Option D
- B. Option C
- **C. Option B**
- D. Option A

**Answer: C**

#### NEW QUESTION # 278

An engineer is configuring ACI VMM domain integration with Cisco UCS-B Series. Which type of port channel policy must be configured in the vSwitch policy?

- **A. MAC Pinning**
- B. LACP Passive
- C. MAC Pinning-Physical-NIC-load
- D. LACP Active

**Answer: A**

#### NEW QUESTION # 279

Refer to the exhibit.

Refer to the exhibit A Cisco ACI fabric is using out-of-band management connectivity The APIC must access a routable host with an IP address of 192.168.11.2 Which action accomplishes this goal?

- A. Change the switch APIC Connectivity Preference to in-band management
- **B. Remove the in-band management address from the APIC.**
- C. Modify the Pod Profile to use the default Management Access Policy
- D. Add a Fabric Access Policy to allow management connections.

**Answer: B**

#### NEW QUESTION # 280

.....

We have hired professional staff to maintain 300-620 practice engine and our team of experts also constantly updates and renew the question bank according to changes in the syllabus. With 300-620 learning materials, you can study at ease, and we will help you solve all the problems that you may encounter in the learning process. If you have any confusion about our 300-620 Exam Questions, just contact us and we will help you out.
