NEW QUESTION # 129

A company is implementing Dynamics 365 Supply Chain Management

You have two test scenarios. Both scenarios have the same functional steps. The outputs for the scenarios can differ based on the values entered for parameters.

You need to create a single derived test case in the Regression suite automation tool (RSAT).

Which test case type should you use? To answer, drag the appropriate test case types to the correct actions. Each test case type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Test case types <input type="checkbox"/> RSAT chain <input type="checkbox"/> DevOps child <input type="checkbox"/> DevOps parent	Answer Area Action Attach a task recording. Attach a Microsoft Excel parameters file.	Test case type <input type="checkbox"/> DevOps parent <input type="checkbox"/> DevOps child
--	--	--

Answer:

Explanation:

Test case types <input type="checkbox"/> RSAT chain <input type="checkbox"/> DevOps child <input type="checkbox"/> DevOps parent
--

Answer Area Action Attach a task recording. Attach a Microsoft Excel parameters file.	Test case type <input type="checkbox"/> DevOps parent <input type="checkbox"/> DevOps child
--	--

Explanation

Test case types <input type="checkbox"/> RSAT chain <input type="checkbox"/> DevOps child <input type="checkbox"/> DevOps parent
--

Answer Area Action Attach a task recording. Attach a Microsoft Excel parameters file.	Test case type <input type="checkbox"/> DevOps parent <input type="checkbox"/> DevOps child
--	--

NEW QUESTION # 130

You need to resolve the IT team's concerns at the appropriate phase for implementation with Microsoft engineers.

Which phases should you use? To answer, move the appropriate phases to the correct issues. You may use each phase once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft application window with a title bar. On the left, a 'Phases' pane lists 'Implement', 'Initiate', 'Operate', and 'Prepare'. On the right, an 'Implementation Phases' pane shows 'Concerns' for 'Admin1' and 'Admin2' and a 'Phases' pane with empty boxes. The Microsoft logo is visible at the bottom.

Answer:

Explanation:

The screenshot shows the same Microsoft application window. The 'Phases' pane now has 'Implement' and 'Initiate' in a green-highlighted box, and 'Operate' and 'Prepare' in a green-highlighted box. The 'Implementation Phases' pane shows 'Concerns' for 'Admin1' and 'Admin2' and a 'Phases' pane with 'Implement' and 'Initiate' in red-highlighted boxes. The Microsoft logo is visible at the bottom.

Explanation:

The screenshot shows the Microsoft application window. The 'Phases' pane has 'Implement' and 'Initiate' in a green-highlighted box, and 'Operate' and 'Prepare' in a green-highlighted box. The 'Implementation Phases' pane shows 'Concerns' for 'Admin1' and 'Admin2' and a 'Phases' pane with 'Implement' and 'Initiate' in red-highlighted boxes. The Microsoft logo is visible at the bottom.

NEW QUESTION # 131

You need to identify the security configuration required for new users and for the manufacturing managers.

Which security configurations should you use? To answer, move the appropriate security configurations to the correct requirements. You may use each security configuration once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

The screenshot shows a Microsoft application window. On the left, a 'Security configurations' pane lists 'Discretionary access control', 'Mandatory access control', 'Record-level security', and 'Role-based security'. On the right, a 'Security Configuration Requirements' pane lists 'Requirements' for 'New users' and 'Manufacturing managers'. The Microsoft logo is visible at the bottom.

Answer:

Explanation:

The screenshot shows the Microsoft application window. The 'Security configurations' pane has 'Discretionary access control' and 'Mandatory access control' in a green-highlighted box, and 'Record-level security' and 'Role-based security' in a green-highlighted box. The 'Security Configuration Requirements' pane shows 'Requirements' for 'New users' and 'Manufacturing managers' and a 'Security configurations' pane with 'Mandatory access control' and 'Record-level security' in red-highlighted boxes. The Microsoft logo is visible at the bottom.

Explanation:

The screenshot shows the Microsoft application window. The 'Security configurations' pane has 'Discretionary access control' and 'Mandatory access control' in a green-highlighted box, and 'Record-level security' and 'Role-based security' in a green-highlighted box. The 'Security Configuration Requirements' pane shows 'Requirements' for 'New users' and 'Manufacturing managers' and a 'Security configurations' pane with 'Mandatory access control' and 'Record-level security' in red-highlighted boxes. The Microsoft logo is visible at the bottom.
