UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q62-Q67):

NEW QUESTION # 62

For your trigger you want to set some non-working days restrictions based on a Calendar Where should you define such a calendar?

- A. Directly at trigger level, when creating the Trigger

- B. At Host level
- C. At Folder level
- **D. At Tenant level**

Answer: D

Explanation:

Non-working days restrictions based on a calendar should be defined at the Tenant level in UiPath Orchestrator. This allows for the management of non-working days across multiple processes and departments within the same tenant. Once defined, these calendars can be applied to triggers to ensure that automation jobs respect the non-working days settings¹.

NEW QUESTION # 63

What is the purpose of creating an AS IS process map during the business analysis phase for RPA?

- A. To identify potential automation opportunities
- **B. To understand the current state of the business process**
- C. To evaluate the feasibility of the automation solution
- D. To design the automation solution

Answer: B

Explanation:

The purpose of creating an AS IS process map during the business analysis phase for RPA is to understand the current state of the business process. This mapping is crucial as it provides a detailed visualization of the process as it currently operates, including all steps, decision points, and interactions, which is essential for identifying inefficiencies and areas suitable for automation.

NEW QUESTION # 64

Who is responsible for preparing the test data?

- A. The process owner with the Business Analyst
- **B. The SME with the Business Analyst**
- C. The SME with the development team
- D. The process owner with the IT team or system owners

Answer: B

Explanation:

In the context of RPA (Robotic Process Automation), preparing the test data is a collaborative effort that typically involves the Subject Matter Expert (SME) and the Business Analyst. The SME provides the domain knowledge and understanding of the process, while the Business Analyst has the technical know-how and understanding of the RPA tools and capabilities. Together, they ensure that the test data is representative of the actual data that the RPA solution will handle, which is crucial for effective testing and validation of the automated workflows¹.

References: The role of the SME and Business Analyst in preparing test data is outlined in the UiPath Documentation Portal, specifically in the section "Data-Driven Testing" found at <https://docs.uipath.com/studio/standalone/2023.10/user-guide/data-driven-testing1>.

NEW QUESTION # 65

Can an attended user run multiple processes in parallel in Assistant?

- A. Yes. but only multiple background processes
- B. Yes. multiple foreground and background processes
- C. No, only one process can run in Assistant at a time
- **D. Yes. but only one foreground process and multiple background processes**

Answer: D

Explanation:

In UiPath Assistant, an attended user can run multiple processes in parallel, but only one foreground process and multiple background processes at the same time. This setup allows users to interact with a single process actively while other processes operate in the background, optimizing productivity without compromising user experience.
