

H12-821_V1.0 PDF Question, H12-821_V1.0 Training Tools

P.S. Free 2023 Huawei H12-821_V1.0 dumps are available on Google Drive shared by 2Pass4sure: <https://drive.google.com/open?id=1I5nadQC6FrdEyAG7D9w5Hf9pic3gdESy>

Maybe now you are leading a quite comfortable life. But you also need to plan for your future. Getting the H12-821_V1.0 training guide will enhance your ability. Also, various good jobs are waiting for you choose. Your life will become wonderful if you accept our guidance on [H12-821_V1.0](#) study questions. We warmly welcome you to try our free demo of the H12-821_V1.0 preparation materials before you decide to purchase.

In today's competitive IT industry, passing Huawei certification H12-821_V1.0 exam has a lot of benefits. Gaining Huawei H12-821_V1.0 certification can increase your salary. People who have got Huawei H12-821_V1.0 certification often have much higher salary than counterparts who don't have the certificate. But Huawei [Certification H12-821_V1.0 Exam](#) is not very easy, so 2Pass4sure is a website that can help you grow your salary.

Your aspiring wishes such as promotion chance, or higher salaries or acceptance from classmates or managers and so on. And if you want to get all benefits like that, our H12-821_V1.0 training quiz is your rudimentary steps to begin. So it is undisputed that you can be prepared to get striking outcomes if you choose our [H12-821_V1.0 Study Materials](#). And so many of our loyal customers have achieved their dreams with the help of our H12-821_V1.0 exam questions.

H12-821_V1.0 Practice Questions & H12-821_V1.0 Actual Lab Questions: HCIP-Datcom-Core Technology V1.0

P.S. Free 2026 Huawei H12-821_V1.0 dumps are available on Google Drive shared by ValidExam: https://drive.google.com/open?id=1JP6fQ1ft1rdweloIK9Z_1tz9WdkggTqD

Our H12-821_V1.0 cram materials will help you gain the success in your career. You can be respected and enjoy the great fame among the industry. When applying for the jobs your resumes will be browsed for many times and paid high attention to. The odds to succeed in the job interview will increase. So you could see the detailed information of our H12-821_V1.0 Exam Questions before you decide to buy them.

How to get a good job? If you are a freshman, a good educational background and some useful qualifications certification will make you outstanding. If you are dreaming for obtaining a IT certificate, our H12-821_V1.0 test dumps pdf will help you clear exam easily. If you are a working man, a valid certification will make you obtain an advantage over others while facing job promotion competition. Our H12-821_V1.0 Test Dumps Pdf can help you clear exam and obtain exam at the first attempt.

We have applied the latest technologies to the design of our Huawei H12-821_V1.0 exam prep not only on the content but also on

the displays. As a consequence you are able to keep pace with the changeable world and remain your advantages with our Huawei H12-821_V1.0 training braindumps. Besides, you can consolidate important knowledge for you personally and design customized study schedule or to-do list on a daily basis.

Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q725-Q730):

NEW QUESTION # 725

The shortest path from the multicast source to the receiver is called the shortest path tree SPT.

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 726

When configuring the multicast routing protocol, you first need to execute the () routing-enable command, and then perform related configurations of the PIM protocol.

Answer:

Explanation:
multicast

NEW QUESTION # 727

Which of the following descriptions about the difference between DIS in IS-IS and DR in OSPF are correct? (Multiple choice)

- A. The election of DIS and DR follow the principle of preemption
- B. In the IS-IS broadcast network, routers of the same level on the same network segment will form adjacency relationships, including all non-DIS routers will also form adjacency relationships. In OSPF, the router only establishes an adjacency relationship with the DR port BDR
- C. The election of DIS and DR is to compare the priority first, and then compare the MAC address
- D. In the IS-IS broadcast network, routers with a priority of 0 also participate in the election of the DIS, while routers with a priority of 0 in OSPF do not participate in the election of the DR

Answer: B,D

NEW QUESTION # 728

IGMP group entries play an important role in multicast forwarding. An administrator runs a command to view information about a multicast entry. The information is as follows:

```
sql
```

```
Copy
```

```
<HUAWEI> display igmp group
```

```
Interface group report information
```

```
Vlanif100(10.1.6.2):
```

```
Total 1 IGMP Group reported
```

```
Group Address Last Reporter Uptime Expires
```

```
225.1.1.2 10.1.6.10 00:02:04 00:01:17
```

Given this, which of the following statements are true?

- A. This entry can be used to construct the corresponding (S, G) entry.
- B. 225.1.1.2 is the address of the group that the user joins.
- C. Expires indicates the aging time of the IGMP group.
- D. This entry is created when the device receives an IGMP Join message from a user.

Answer: B,C,D

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

1. Understanding the IGMP Group Entry:

The IGMP group entry contains key information about multicast groups on the interface:

- * Group Address (225.1.1.2): The multicast group address that the user has joined.
- * Last Reporter (10.1.6.10): The IP address of the last host that sent an IGMP Report message for this group.
- * Uptime: The duration since the group was first reported.
- * Expires: The remaining time before the group entry ages out if no further reports are received.

2. Analysis of Each Statement:

Option A: This entry can be used to construct the corresponding (S, G) entry.

* Incorrect.

* This is a group entry for IGMP, which contains information about the group (G) but does not include a specific source (S). (S, G) entries are created in PIM (Protocol Independent Multicast), not IGMP.

Option B: This entry is created when the device receives an IGMP Join message from a user.

* Correct.

* IGMP Join messages are used by hosts to signal their intent to join a multicast group. When such a message is received, the group entry is created.

Option C: Expires indicates the aging time of the IGMP group.

* Correct.

* The "Expires" field shows the remaining time before the group entry ages out if no further IGMP reports are received.

Option D: 225.1.1.2 is the address of the group that the user joins.

* Correct.

* The "Group Address" field explicitly states that 225.1.1.2 is the multicast group that the user has joined.

3. Summary:

* Correct Options: B, C, D

NEW QUESTION # 729

The IP prefix list configuration on a Huawei router is shown below. Which of the following routes can match this IP prefix list?

bash

Copy

```
[huawei] ip ip-prefix test index 10 permit 10.0.0.0 8 less-equal 32
```

- A. 10.1.1.0/6
- B. 10.1.1.1/32
- C. 10.1.1.0/24
- D. 10.0.0.0/16

Answer: B,C,D

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

1. Understanding the Prefix List Configuration:

The command `ip ip-prefix test index 10 permit 10.0.0.0 8 less-equal 32` defines the following:

The prefix base is 10.0.0.0 with a mask length of 8 bits.

The `less-equal 32` condition allows routes with mask lengths ranging from 8 to 32 bits to match.

2. Analysis of Each Route:

Option A: 10.1.1.1/32

Correct.

The prefix 10.1.1.1/32 falls within the 10.0.0.0/8 network range and has a mask length of 32 bits, which satisfies the `less-equal 32` condition.

Option B: 10.1.1.0/6

Incorrect.

The prefix 10.1.1.0/6 has a mask length of 6 bits, which is shorter than the base prefix length of 8. It does not satisfy the condition.

Option C: 10.1.1.0/24

Correct.

The prefix 10.1.1.0/24 falls within the 10.0.0.0/8 network range and has a mask length of 24 bits, which satisfies the `less-equal 32` condition.

Option D: 10.0.0.0/16

Correct.

The prefix 10.0.0.0/16 falls within the 10.0.0.0/8 network range and has a mask length of 16 bits, which satisfies the `less-equal 32`

condition.

3. Summary:

The prefixes that match the configuration are 10.1.1.1/32, 10.1.1.0/24, and 10.0.0.0/16.

Huawei HCIA-Datcom Study Guide, Chapter "IP Prefix Lists."
