## Cost Effective NSE6\_FSR-7.3 Dumps, NSE6\_FSR-7.3 Guide

Our NSE6\_FSR-7.3 exam questions are highly praised for their good performance. Customers often value the functionality of the product. After a long period of research and development, our NSE6\_FSR-7.3 learning materials have been greatly optimized. We can promise you that all of our NSE6\_FSR-7.3 practice materials are completely flexible. In addition, we have experts who specialize in research optimization, constantly update and improve our learning materials, and then send them to our customers. We take client's advice on NSE6\_FSR-7.3 training prep seriously and develop it with the advices.

## Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q45-Q50):

### NEW QUESTION # 45

Which edition of license, when deployed, will serve as a primary node in a distributed deployment?

- A. MT
- B. Enterprise
- C. MT\_Tenant
- D. MT\_RegionalSOC

**Answer: A**

#### NEW QUESTION # 46

Which two statements about upgrading a FortiSOAR HA cluster are true? (Choose two.)

- A. Nodes can be upgraded while the primary node or secondary node are in the HA cluster.
- B. The upgrade procedure for an active-active cluster and an active-passive cluster are the same.
- C. It is recommended that the passive secondary node be upgraded first, and then the active primary node.
- D. Upgrading a FortiSOAR HA cluster requires no downtime.

**Answer: B,C**

Explanation:

Upgrading a FortiSOAR HA cluster follows the same procedure regardless of whether it is configured in an active-active or active-passive setup. The process generally involves upgrading one node at a time to minimize service disruption. Best practices recommend upgrading the passive secondary node first before moving to the active primary node. This sequence helps maintain cluster stability and ensures that at least one node remains operational during the upgrade.

#### NEW QUESTION # 47

Which two system monitoring reports are available on the System Monitoring widget? (Choose two.)

- A. CPU Usage
- B. Service Status
- C. RAM Usage
- D. Playbook Health Status

**Answer: A,B**

#### NEW QUESTION # 48

For which two modules on FortiSOAR can you create SLA templates? (Choose two.)

- A. Alerts
- B. Incidents
- C. Tasks
- D. Indicators

**Answer: A,D**

Explanation:

In FortiSOAR, SLA (Service Level Agreement) templates can be created for specific modules, including Alerts and Indicators. These templates are essential for tracking response and resolution times, ensuring compliance with defined service levels. By configuring SLAs on the Alerts and Indicators modules, organizations can monitor the time taken to address these items, which is critical in maintaining efficient incident response and management practices. The SLA templates can be customized according to specific business requirements and are applied to records within these modules to enforce timely actions.

#### NEW QUESTION # 49

Which two roles are default roles configured on FortiSOAR? (Choose two answers)

- A. T1 Analyst
- B. FortiSOAR Agent

- C. T3 Analyst
- D. Connector Administrator

**Answer: A,D**

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

FortiSOAR comes with several pre-defined (out-of-the-box) roles designed to align with common Security Operations Center (SOC) functions. According to the FortiSOAR 7.3 Administration Guide under the "Security Management" section:

\* T1 Analyst (Tier 1): This role is a default configuration intended for front-line analysts who perform initial triaging of alerts and basic incident response tasks.

\* Connector Administrator: This is a specialized default role that grants permissions specifically for configuring, updating, and managing the lifecycle of connectors within the environment.

While FortiSOAR is highly customizable and allows for the creation of T2 or T3 roles, they are not always present as specific "default" named roles in the same way the T1 Analyst is across all base installations.

Furthermore, "FortiSOAR Agent" refers to a technical component or a deployment architecture rather than a standard user RBAC (Role-Based Access Control) role. Other common default roles include Security Administrator, Application Administrator, and Full Access.

## NEW QUESTION # 50
