ACD101 Exam Questions in this Appian ACD101 practice test are similar to the real test.

## Appian ACD101 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
|       |         |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>Appian Development: Interface Design: The exam evaluates capabilities of Appian developers to design and construct interfaces, configure local variables, and use interface components like drop-downs and grids. The ACD101 exam also tests your adherence to best practices in interface design, as well as your skills in testing and troubleshooting interfaces.</li> </ul>                                           |
| Topic 2 | <ul style="list-style-type: none"> <li>Introduction to the Appian Platform: The Appian Associate Developer exam tests the familiarity of aspiring Appian developers with essential Appian resources like online docs and Appian Max, and their abilities to organize application structures. It measures your understanding of how to utilize the capabilities of Appian, such as process mining and RPA, to address business challenges effectively.</li> </ul> |
| Topic 3 | <ul style="list-style-type: none"> <li>Appian Development: Process Models: This topic of the ACD101 Exam focuses on your ability to create, debug, and publish process models within Appian. It includes configuring workflow nodes, Smart Services, and understanding data flow in processes.</li> </ul>                                                                                                                                                        |
| Topic 4 | <ul style="list-style-type: none"> <li>Data Persistence: Here, the Appian Associate Developer test examines your skills in managing data and relational databases, including the use of CDTs and query entities. You will need to demonstrate proficiency in handling records, querying data, and updating data models.</li> </ul>                                                                                                                               |

## Appian Associate Developer Sample Questions (Q113-Q118):

### NEW QUESTION # 113

Review the following expression rule:

`union(ri!fruit, ri!vegetables)`

The rule inputs are configured as text arrays.

What is the expected output?

- A. All items in ri!fruit and ri!vegetables combined, with duplicates removed.
- B. Only items that are in both ri!fruit and ri!vegetables.
- C. All items in ri!fruit followed by items in ri!vegetables, including duplicate values.

**Answer: A**

Explanation:

The `union()` function in Appian combines the elements of two or more arrays into a single array, removing any duplicate values.

Given that the rule inputs ri!fruit and ri!vegetables are configured as text arrays, the expected output of `union(ri!fruit, ri!vegetables)` would be an array containing all unique items from both ri!fruit and ri!vegetables, with any duplicates removed. This function is useful for combining lists without repetition, ensuring a clean, unique set of elements.

Reference: Appian Documentation - Expression Functions

### NEW QUESTION # 114

According to best practices, what is Appian's recommendation for updating Test environments?

- A. Make the same update manually both in Dev and Test environments.
- B. Make the update in the Dev environment, then compare, and deploy the update to the Test environment.
- C. Make the update directly in the Test environment.

**Answer: B**

### NEW QUESTION # 115

Review the following code snippet:

`displayvalue(1, {0, 1, 2}, { " Low ", " Medium ", " High " }, " Unknown ")` The definition of `displayvalue` is:

Tries to match a value in a given array with a value at the same index in a replacement array and returns either the value at the same index or a default value if the value is not found.

What does this code snippet return?

- A. Medium

- B. Low
- C. High

**Answer: A**

Explanation:

The `displayvalue()` function matches a given value with an array and returns the value at the same index from a replacement array or a default value if not found. In the snippet `displayvalue(1, {0, 1, 2}, {"Low", "Medium", "High"}, "Unknown")`, the value 1 is matched in the array {0, 1, 2} at index 1. The function then returns the value at index 1 in the array {"Low", "Medium", "High"}, which is "Medium".

#### NEW QUESTION # 116

You are creating a new application with the prefix ACM.

Which four default folders are created by Appian when you select "Generate groups and folders to secure and organize objects"? (Choose four.)

- A. ACM Knowledge Center
- B. ACM Application Documentation
- C. ACM Rules & Constants
- D. ACM Users
- E. ACM Process Models

**Answer: C,D,E**

#### NEW QUESTION # 117

Where can an Appian Developer connect with and share their expertise with other Appian Developers?

- A. Appian Community discussions
- B. Appian Knowledge Base
- C. Appian Learning Paths via Appian Academy

**Answer: A**

Explanation:

Appian Community discussions provide a platform for Appian Developers to connect with, share expertise, and learn from each other. The community is a vibrant space where developers can ask questions, share solutions, and discuss best practices related to Appian development. While Appian Learning Paths via Appian Academy and Appian Knowledge Base are valuable resources for learning and troubleshooting, the Community discussions specifically facilitate peer-to-peer interaction and knowledge sharing among developers.
