

Cheap FCP_FMG_AD-7.6 Dumps - FCP_FMG_AD-7.6 Passed

P.S. Free 2026 Fortinet FCP_FMG_AD-7.6 dumps are available on Google Drive shared by ExamsReviews: <https://drive.google.com/open?id=1NnjHQ3mbwhBBMC3Qk2Hvh5o30iRhldTS>

All these three Fortinet FCP_FMG_AD-7.6 exam questions formats contain the real and updated FCP_FMG_AD-7.6 exam questions. These FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam questions are being presented in practice test software and PDF dumps file formats. The FCP_FMG_AD-7.6 desktop practice test software is easy to use and install on your desktop computers. Whereas the other Fortinet FCP_FMG_AD-7.6 web-based practice test software is concerned, this is a simple browser-based application that works with all operating systems. Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 2	<ul style="list-style-type: none"> Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.

Topic 3	<ul style="list-style-type: none"> Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 5	<ul style="list-style-type: none"> Troubleshooting
Topic 6	<ul style="list-style-type: none"> This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.

FCP_FMG_AD-7.6 guide torrent & FCP_FMG_AD-7.6 study guide & FCP_FMG_AD-7.6 actual exam

To improve our products' quality we employ first-tier experts and professional staff and to ensure that all the clients can pass the test we devote a lot of efforts to compile the FCP_FMG_AD-7.6 learning guide. As long as you study with our FCP_FMG_AD-7.6 exam questions, we won't let you suffer the loss of the money and energy and you will pass the FCP_FMG_AD-7.6 Exam at the first try. After you pass the FCP_FMG_AD-7.6 test you will enjoy the benefits the certificate brings to you such as you will be promoted by your boss in a short time and your wage will surpass your colleagues.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

Refer to the exhibit.

FortiManager address object

Edit Address - LAN

Category: Address

Name: LAN

Color: Change

Type: Subnet

IP/Netmask: 172.16.5.0/255.255.255.0 Resolve from name

Interface: any

Static Route Configuration:

Comments:
0/255

Add To Groups: Click to select

Advanced Options >

Per-Device Mapping v

<input type="checkbox"/>	Mapped Device	Details
<input type="checkbox"/>	BR1-FGT-1 [root]	IP/Netmask: 10.10.10.5/255.255.255.255
<input type="checkbox"/>	HQ-NGFW-1 [root]	IP/Netmask: 172.16.5.20/255.255.255.255
<input type="checkbox"/>	Remote-Firewall [root]	IP/Netmask: 21.21.2.5/255.255.255.255

3

An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask will be installed on Remote-Firewall [VDOM1] for the LAN firewall address object?

- A. 10.10.10.5/255.255.255.255
- B. 21.21.2.5/255.255.255.255
- C. 172.16.5.20/255.255.255.255
- D. 172.16.5.0/255.255.255.0

Answer: B

Explanation:

The per-device mapping overrides the global IP/netmask setting for the firewall address object. For the device "Remote-Firewall," the mapped IP/netmask is 21.21.2.5/255.255.255.255, so this value will be installed on Remote-Firewall [VDOM1].

NEW QUESTION # 39

What allows FortiManager to run CLI scripts on FortiGate devices without prompting for SSH authentication each time?

- A. The script using the Remote FortiGate Directly (via CLI) option.
- B. FortiGate devices using the legacy login method.
- C. The script on the FortiManager device database.
- **D. The secure management tunnel between FortiManager and FortiGate devices.**

Answer: D

Explanation:

FortiManager uses a secure management tunnel (TCP port 541) to communicate with managed FortiGate devices. This tunnel allows FortiManager to run CLI scripts, push configuration changes, and retrieve information without prompting for SSH authentication each time, as trust is already established through device authorization and certificate exchange.

NEW QUESTION # 40

Refer to the exhibit.

Edit Address - LAN

Category: Address

Name: LAN

Color: Change

Type: Subnet

IP/Netmask: 172.16.5.0/255.255.255.0 Resolve from name

Interface: any

Static Route Configuration:

Comments:
0/255

Add To Groups: Click to select

Advanced Options >

Per-Device Mapping

<input type="checkbox"/>	Mapped Device	Details	
<input type="checkbox"/>	BR1-FGT-1 [root]	IP/Netmask: 10.10.10.5/255.255.255.255	
<input type="checkbox"/>	HQ-NGFW-1 [root]	IP/Netmask: 172.16.5.20/255.255.255.255	
<input type="checkbox"/>	Remote-Firewall [root]	IP/Netmask: 21.21.2.5/255.255.255.255	

3

An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask will be installed on Remote-Firewall [VDOM1] for the LAN firewall address object?

- A. 21.21.2.5/255.255.255.255
- B. 10.10.10.5/255.255.255.255
- C. 172.16.5.20/255.255.255.255
- D. 172.16.5.0/255.255.255.0

Answer: D

Explanation:

The exhibit shows the default value of the LAN address object as 172.16.5.0/255.255.255.0 . It also shows Per-Device Mapping entries only for BR1-FGT-1 [root] , HQ-NGFW-1 [root] , and Remote-Firewall [root] . There is no mapping shown for Remote-Firewall [VDOM1] .

The FortiManager 7.6 Administrator Study Guide gives the exact rule: "The devices in the ADOM that do not have a dynamic mapping for LAN have a default value." It also states that dynamic mappings are configured per device in the Per-Device Mapping section.

Since Remote-Firewall [VDOM1] does not have its own mapping entry, it will use the object's default value , which is 172.16.5.0/255.255.255.0 .

NEW QUESTION # 41

Refer to the exhibit.

The screenshot shows the 'Install Preview of HQ-NGFW-1' window. The 'Assigned Devices' dropdown is set to 'HQ-NGFW-1'. The configuration preview shows the following commands:

```
1 --- Preview result ---
2 config system central-management
3   config server-list
4     edit 1
5       set server-type update rating
6     next
7   end
8 end
9 config vpn certificate ca
10  edit "root_CA3"
11    set ca "-----BEGIN CERTIFICATE-----

```

An administrator assigned a new policy package to FortiGate HQ-NGFW-1. In the installation preview, they noticed some settings they did not modify and are unsure about the changes.

Based on the exhibit, which two things will happen if they continue with the installation? (Choose two.)

- A. FortiManager will install the CA certificate named root_CA3 to authenticate FortiGate-to-FortiManager communication protocol (FGFM) tunnel connections with FortiGate HQ-NGFW-1.
- B. FortiGate HQ-NGFW-1 can contact the FortiManager acting as FortiGuard Distribution Server (FDS) to download FortiGuard updates.
- C. FortiGate HQ-NGFW-1 will use the root_CA3 certificate in firewall address objects or policies.
- D. FortiGate HQ-NGFW-1 can use FortiManager firmware templates to upgrade firmware and ratings.

Answer: A,B

Explanation:

The configuration includes a server-list with server-type set to "update rating," which enables FortiGate HQ-NGFW-1 to contact FortiManager as a FortiGuard Distribution Server (FDS) for FortiGuard updates.

The installation includes a root_CA3 certificate, which FortiManager will install on FortiGate HQ-NGFW-1 to authenticate FGFM tunnel connections between the devices.

NEW QUESTION # 42

Which output is displayed right after moving the ISFW device from one ADOM to another?

- A.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE      OID      SN              HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325      FGVM010000077646 -      10.0.1.200 ISFW      ADOM76    7.00741 (regular) 7.0 MR6 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: retrieved; conn: up
|- vdom:[3]root flags:0 adom:ADOM76 pkg:[unknown]ISFW
```

- B.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE      OID      SN              HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325      FGVM010000077646 -      10.0.1.200 ISFW      ADOM76    7.00741 (regular) 7.0 MR6 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up
|- vdom:[3]root flags:0 adom:ADOM76 pkg:[imported]ISFW
```

- C.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE      OID      SN              HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325      FGVM010000077646 -      10.0.1.200 ISFW      ADOM76    7.00741 (regular) 7.0 MR6 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up
|- vdom:[3]root flags:0 adom:ADOM76 pkg:[never-installed]
```

- D.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE      OID      SN              HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325      FGVM010000077646 -      10.0.1.200 ISFW      ADOM76    7.00741 (regular) 7.0 MR6 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: autoupdated; conn: up
|- vdom:[3]root flags:1 adom:ADOM76 pkg:[out-of-sync]ISFW
```

Answer: C

Explanation:

Right after moving the ISFW device to a new ADOM, the status typically shows the policy package as never- installed, indicating that the device has been assigned to the new ADOM but no policy package has yet been installed in that ADOM.

NEW QUESTION # 43

.....

Individuals who pass the FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) certification exam demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. ExamsReviews is aware that preparing with outdated FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) study material results in a loss of time and money.
